These proceedings present selected research papers from CSNC2017, held during 23th-25th May in Shanghai, China. The theme of CSNC2017 is Positioning, Connecting All. These papers discuss the technologies and applications of the Global Navigation Satellite System (GNSS), and the latest progress made in the China BeiDou System (BDS) especially. They are divided into 12 topics to match the corresponding sessions in CSNC2017, which broadly covered key topics in GNSS. Readers can learn about the BDS and keep abreast of the latest advances in GNSS techniques and applications. Nowadays, job positions are not as clearly defined as they used to be. Increasingly, work is carried out in varying roles where the only constant is the employee - but even he or she has to keep growing and adapting. Our current systems of remuneration are the one thing that has not been moving along. Not only are they unable to keep pace with the dynamics of modern business but they are time consuming and expensive. If you want to abandon them, however, you first have to change the basis for your employees' salaries. That basis is no longer the job position, but the added value that the individual employee contributes. The Baarda Model shows you how to reward your employees' added value with a transparent system of assessment. Rolf Baarda has developed a model which allows employees to gain an insight into their problem-solving capacity and shows them how to take it to the next level. The model describes eight roles that set out who deals with the most difficult problems, who deals with the less challenging ones and who takes on the simplest issues. It not only helps employees develop themselves, but it also increases their engagement and motivation - and happy employees mean happy customers! This book was written for HR managers and other executives who want to reward their employees in a decent and transparent way and thus increase their job commitment. Rolf Baarda is chef de mission of Bureau Baarda, innovators in remuneration management. He has more than 25 years' experience as a consultant and he applied his expertise to devise the Baarda Model, a unique system that precisely maps out employees' added value. In this examination of an extraordinary Islamic anti-Christian polemic, the author describes Q??? 'Abd al-Jabb?'s life, his intellectual heritage and the sectarian controversy of his day. Thus the reader will discover how, and why, a Muslim theologian reinterpreted Christian scripture, history and practice to develop an Islamic doctrine of Christianity. James M. Leonard analyzes the very important early Coptic manuscript of Matthew's Gospel, Codex Schøyen. Through a careful translational analysis, he shows how its close alliance with Vaticanus and

Sinaiticus helps identify an earlier text form which they mutually reflect. Nowadays, job positions are not as clearly defined as they used to be. This book offers a detailed analysis of the Gospel of Thomas in its historic and literary context, providing a new understanding of the genesis of the Jesus tradition. Discovered in the twentieth century, the non-canonical Gospel of Thomas is an important early text whose origins and place in the history of Christianity continue to be subjects of debate. Aiming to relocate the Thomasine community in the wider context of early Christianity, this study considers the Gospel of Thomas as a bridge between the oral and literary phases of the Christian movement. It will therefore, be useful for Religion scholars working on Biblical studies, Coptic codices, gnosticism and early Christianity. The Text of the New Testament in Contemporary Research provides up-to-date discussions of every major aspect of New Testament textual criticism. Written by internationally acknowledged experts, the twenty-four essays evaluate all significant advances in the field since the 1950s. The Gospel of Thomas is one of the most debated early Christian writings. Discovered as a Coptic translation in the Nag Hammadi Library, its date, message and relation to the canonical gospels have been the subject of much divisive argument. This book offers new perspectives on the gospel and demonstrates the various ways in which it sheds light on the ideological and social history of early Christianity. Expert scholars go to the heart of current issues in Thomasine studies, such as the role of oral and written traditions in the composition of the gospel, Thomas' relationship with the Gospel of John and with Gnostic and ascetic tendencies in early Christianity, the gospel's attitude to women followers of Jesus and to Jewish ritual practices. A text for the student & the professional. This study looks at the expression of Christianity in the Eastern Indonesian Island of Halmahera in the years 1941 to 1979. Against the historical, theological and missiological backgrounds, it examines the interactions between pre-literary religion, Islam and Christianity. From this it tries to evaluate the nature of the Gospel in relation to its cultural expressions, and the implications for the Church.

On the outside, Rebecca Cunningham appears to have everything a Boston Brahmin needs--beauty, intelligence, wealth, an MBA, and now a law degree. But on the inside, Becky is in turmoil. She has finally accepted that her knight in shining armor is never going to appear and reluctantly agrees to marry Derek Sanderson, a handsome, upper-crust suitor. Their wedding is to be the social event of the year, if not the entire decade. But there is only one problem: Becky's heart belongs to another man, one who scarcely knows she exists. For years, the man of her dreams, whom Becky only sees occasionally in real life, has had a starring role in her erotic fantasies. Torn between maintaining her reputation of always doing the right thing and wanting to follow her heart, Becky seeks counsel from her friends, who beg her to delay the wedding. Finally convinced, Becky tells Derek the news, setting off a chain of events that lead her down an unexpected path where she discovers secrets lurking within Derek's family--secrets with the potential to ruin all of them. In this

compelling tale, a Boston Brahmin must do all she can to survive with her heart intact as intrigue, heartache, and betrayal invade her life and change it forever. This is the third volume of the immensely useful "Nag Hammadi Bibliography," the first volume of which covered 1948-1969 and was the first publication in the Nag Hammadi Studies series. The second volume covered 1970-1994. This third volume provides a complete integration of Supplements II/1a-II/8 to the Bibliography as published in "Novum Testamentum" 1998-2008, with additions and corrections. This latest update contains 3,063 entries, with the set of three volumes containing 11,580 entries. Nag Hammadi and Gnostic studies continue to be of critical importance for the study of ancient religions in the Graeco-Roman world and for the study of the world of early Christianity, and the present bibliography provides an indispensable reference tool for work in these fields. This volume combines some of the leading voices on the composition and collection of early Christian gospels in order to analyze Tatian's Diatessaron. The rapid rise and sudden suppression of the Diatessaron has raised numerous questions about the nature and intent of this second-century composition. It has been claimed as both a vindication of the fourfold gospel's early canonical status and as an argument for the canon's on-going fluidity; it has been touted as both a premiere witness to the earliest recoverable gospel text and as an early corrupting influence on that text. Collectively, these essays provide the greatest advance in Diatessaronic scholarship in a quarter of a century. The contributors explore numerous questions: did Tatian intend to supplement or supplant the fourfold gospel? How many were his sources and how free was he with their text? How do we identify a Diatessaronic witness? Is it legitimate to use Tatian's Diatessaron as a source in New Testament textual criticism? Is a reconstruction of the Diatessaron still possible? These queries in turn contribute to the question of what the Diatessaron signifies with respect to the broader context of gospel writing, and what this can tell us about how the writing, rewriting and reception of gospel material functioned in the first and second centuries and beyond. This is a sequel to the immensely useful Nag Hammadi Bibliography 1948-1969, which was the first volume to appear in the Nag Hammadi Studies series. The volume provides a complete integration of Supplements I-XXIV to the Bibliography as published in Novum Testamentum 1971-1997, with additions and corrections. In total the update contains over 6092 entries. Nag Hammadi and Gnostic studies continue to be of critical importance for the study of ancient religions in the Graeco-Roman world and for the study of the world of early Christianity, and the present bibliography provides an indispensable reference tool for work in these fields. Sacred Stimulus offers a thorough exploration of Jerusalem's role in the formation and formulation of Christian art in Rome during the fourth and fifth centuries. The visual vocabulary discussed by Galit Noga-Banai gives an alternative access point to the mnemonic efforts conceived while Rome converted to Christianity: not in comparison to pagan art in Rome, not as reflecting the struggle with the emergence of New Rome in the East (Constantinople), but rather as visual expressions of the confrontation with earthly Jerusalem and its holy places. After all, Jerusalem is where the formative events of Christianity occurred and were memorialized. Sacred Stimulus argues that, already in the second half of the fourth century, Rome constructed its own set of holy sites and foundational myths, while expropriating for its own use some of Jerusalem's sacred relics, legends, and sites. Relying upon well-known and central works of art, including mosaic decoration, sarcophagi, wall paintings, portable art, and architecture, Noga-Banai exposes the omnipresence of Jerusalem and its position in the genesis of Christian art in Rome. Noga-Banai's consideration of earthly Jerusalem as a conception that Rome used, or had to take into account, in constructing its own new Christian ideological and cultural topography of the past, sheds light on connections and analogies that have not necessarily been preserved in the written evidence, and offers solutions to long-standing questions regarding specific motifs and scenes. Provides a modern approach to least squares estimation and data analysis for undergraduate land surveying and geomatics programs Rich in theory and concepts, this comprehensive book on least square estimation and data analysis provides examples that are designed to help students extend their knowledge to solving more practical problems. The sample problems are accompanied by suggested solutions, and are challenging, yet easy enough to manually work through using simple computing devices, and chapter objectives provide an overview of the

material contained in each section. Understanding Least Squares Estimation and Geomatics Data Analysis begins with an explanation of survey observables, observations, and their stochastic properties. It reviews matrix structure and construction and explains the needs for adjustment. Next, it discusses analysis and error propagation of survey observations, including the application of heuristic rule for covariance propagation. Then, the important elements of statistical distributions commonly used in geomatics are discussed. Main topics of the book include: concepts of datum definitions; the formulation and linearization of parametric, conditional and general model equations involving typical geomatics observables; geomatics problems; least squares adjustments of parametric, conditional and general models; confidence region estimation; problems of network design and pre-analysis; three-dimensional geodetic network adjustment; nuisance parameter elimination and the sequential least squares adjustment; post-adjustment data analysis and reliability; the problems of datum; mathematical filtering and prediction; an introduction to least squares collocation and the kriging methods; and more. Contains ample concepts/theory and content, as well as practical and workable examples Based on the author's manual, which he developed as a complete and comprehensive book for his Adjustment of Surveying Measurements and Special Topics in Adjustments courses Provides geomatics undergraduates and geomatics professionals with required foundational knowledge An excellent companion to Precision Surveying: The Principles and Geomatics Practice Understanding Least Squares Estimation and Geomatics Data Analysis is recommended for undergraduates studying geomatics, and will benefit many readers from a variety of geomatics backgrounds, including practicing surveyors/engineers who are interested in least squares estimation and data analysis, geomatics researchers, and software developers for geomatics. This indispensable monograph provides a critical reassessment of the Gospel of Thomas and its origins, focussing on reinterpreting its anthropogony and soteriology. It examines Thomas' indebtedness to Jewish mystical and Hermetic thought rather than gnostic traditions. This collection is a unique joint venture of teachers in, and practitioners of military ethics. Representatives of each branch of the Armed Forces, i.e. the Navy, the Army, the Air Force and the Military Police, discuss their branch-specific experiences with moral questions and dilemma's. The moral questions and dilemma's which arise in their work are also discussed by certain professional groups within the Armed Forces, such as the Military Medical Service and the Military Psychological Service. Detailed attention is given to how junior commanders can enhance morally responsible behaviour within their unit. A substantial part of the book focuses on teaching military ethics. It includes the Socratic dialogue, decision-making skills, and a chapter containing fictitious moral dilemmas that can be used as exercises. The book is aimed at those responsible for training at military training centres as well as at cadets, midshipmen and young officers. It will also be an important tool for commanders preparing for a mission. And it will be of use for all those concerned with the subject of military ethics at policy and management level, both in the armed forces and outside it. Military Ethics: The Dutch Approach – A Practical Guide is an adapted translation of the main chapters of the Dutch-language volume *Praktijkboek Militaire Ethiek (Practitioner's Guide Military Ethics)*. Research: This is it! is a unique textbook that offers an integrated discussion of quantitative and qualitative research. The theory is easily accessible, with appealing examples taken from all kinds of studies. This textbook light-heartedly describes the essence of quantitative and qualitative research in four steps in a such a way that students will want to do the research presented in the book. Step 1: Formulating the problem Step 2: The research design Step 3: Collecting data Step 4: Processing, analysing and reporting research data With these steps, you have a valuable checklist at your disposal for designing and conducting your own research and for evaluating research proposals and reports. Excel is used for quantitative data analysis, in addition the book has an appendix explaining how to use SPSS. For centuries the Jewish community in Europe possessed a copy of Matthew in the Hebrew language. The Jews' use of this document during the Middle Ages is imperfectly known. Occasionally excerpts from it appeared in polemical writings against Christianity. This volume, containing papers read at the Third Peshitta Symposium, brings together biblical studies and Syriac liturgy and patristic literature. It discusses the patristic and liturgical evidence for the Syriac versions, as well as their reception in the Syriac churches.

Marvin Meyer is one of the leading experts on the secret gospels Gospel of Thomas, Secret Gospel of Mark, and others who has changed forever how we read the canonical gospels and understand early Christianity. In this new collection of his work, Meyer looks at these revolutionary texts in original and illuminating ways. He writes, for example, about the naked youths in the villa of the Mysteries. On the walls of a villa in Pompeii, a famous mural depicts a naked male reading from a scroll, a look of wonder on his face. A naked youth again appears in the Gospel of Mark, abandoning his garment and fleeing naked when apprehended during Jesus' arrest. A similar youth appears in the Secret Gospel of Mark. These youths, Meyer proposes, serve as an image of religious initiation, candidates for the mysteries of Dionysus or of Christ. This is one of the many aspects of the secret gospels that Meyer examines with expert insight and creativity. Topics range from gender and infancy stories to discipleship and the relationship of the Gospel of Thomas to Islamic literature. Meyer's spellbinding readings of these materials offer fresh understandings of the canonical gospels. Marvin Meyer is Grisct Professor of Bible and Christian Studies, and Director of the Albert Schweitzer Institute at Chapman University, Orange, California. He is author of *The Secret Teachings of Jesus: Four Gnostic Gospels and The Gospel of Thomas: The Hidden Sayings of Jesus*, and co-editor of *Jesus Then and Now* (Trinity Press International). David Luckensmeyer gelingt durch die Untersuchung der eschatologischen Motive ein hervorragender Zugang zum ersten Thessalonicherbrief. Er analysiert die grundlegenden Richtungen des enthaltenen Diskurses erstmalig, und verdeutlicht sowohl die Rhetorik wie auch die Briefstruktur des 1. Briefes an die Thessalonicher. Durch diese Zugangsweise lassen sich die verschiedenen eschatologischen Motive als Teil einer systematischen Aufforderung des Verfassers an eine Gemeinde verstehen, die einen Konflikt zu bestehen hat. Luckensmeyer verdeutlicht die Eschatologie als den besten hermeneutischen Schlüssel, um die systematischen Aspekte des Briefes zu interpretieren. Es besteht kein Zweifel: Eschatologische Motive sind im Überfluss vorhanden, etwa in 1,9–10; 2,13–16; 4,13–18 oder 5,1–11. Der Frage, auf welche Weise diese Motive die Absichten des Paulus in seinem Schreiben

verdeutlichen, widmet sich Luckensmeyer ganz besonders. Paulus kann verständlich machen, warum die Thessalonicher im Konflikt leben und sie zugleich zu einem neuen Verständnis von Gemeinde ermutigen. Die ausführliche Bibliographie gibt einen guten Überblick über die neueste Sekundärliteratur und verschiedene Register erleichtern den Zugang. The ending of Mark's Gospel is one of the great unsolved mysteries. However, interest in the Markan conclusion is not a modern phenomenon alone. Comments about the different attested endings date back to Eusebius' Ad Marinum in the fourth century. Responding to the apparent discrepancy between the timing of the resurrection in Matthew and Mark, Eusebius notes one may solve the difficulty in one of two ways: either ignore the passage on the basis of the manuscript evidence or harmonize the two passages. Unfortunately, Eusebius' comments are all too often viewed through the lens of the modern text-critical endeavor, and for that reason, his intent has largely been missed. This volume argues that Eusebius' double solution can be read as recognizing the authority of both the Longer and the Abrupt conclusions to Mark's Gospel. The solution represents his ecumenical synthesis of those authors who preceded him, the "faithful and pious" from whom the Scriptures have been received. Only with this understanding of the double solution may we fully appreciate Eusebius' dual reception, which is indicative of a different approach to the issue—one that prioritizes the question of reception over authorship, and one that is comfortable affirming a pluriform canon. Sixteen studies by leading New Testament scholars on the canonical and non-canonical Sayings of Jesus. Source, form, textual, redaction, and literary criticism are brought to bear on selected passages, resulting in significant advances in the examination of the sayings tradition. (Peeters 1985) Freedom of speech is a fundamental right in many societies, yet also highly contested. It can only be appreciated if its historical development is considered. Parrhesia offers case studies in freedom of speech, its understanding and exercise throughout history.
