10TH ANNIVERSARY EDITION Is the financial plan of mediocrity -- a dream-stealing, soul-sucking dogma known as "The Slowlane" your plan for creating wealth? You know how it goes; it sounds a lil something like this: "Go to school, get a good job, save 10% of your paycheck, buy a used car, cancel the movie channels, quit drinking expensive Starbucks mocha lattes, save and penny-pinch your life away, trust your life-savings to the stock market, and one day, when you are oh, say, 65 years old, you can retire rich." The mainstream financial gurus have sold you blindly down the river to a great financial gamble: You've been hoodwinked to believe that wealth can be created by recklessly trusting in the uncontrollable and unpredictable markets: the housing market, the stock market, and the job market. This impotent financial gamble dubiously promises wealth in a wheelchair -- sacrifice your adult life for a financial plan that reaps dividends in the twilight of life. Accept the Slowlane as your blueprint for wealth and your financial future will blow carelessly asunder on a sailboat of HOPE: HOPE you can find a job and keep it, HOPE the stock market doesn't tank, HOPE the economy rebounds, HOPE, HOPE, and HOPE. Do you really want HOPE to be the centerpiece for your family's financial plan? Drive the Slowlane road and you will find your life deteriorate into a miserable exhibition about what you cannot

do, versus what you can. For those who don't want a lifetime subscription to "settle-for-less" and a slight chance of elderly riches, there is an alternative; an expressway to extraordinary wealth that can burn a trail to financial independence faster than any road out there. Why jobs, 401(k)s, mutual funds, and 40-years of mindless frugality will never make you rich young. Why most entrepreneurs fail and how to immediately put the odds in your favor. The real law of wealth: Leverage this and wealth has no choice but to be magnetized to you. The leading cause of poorness: Change this and you change everything. How the rich really get rich - and no, it has nothing to do with a paycheck or a 401K match. Why the guru's grand deity - compound interest - is an impotent wealth accelerator. Why the guru myth of "do what you love" will most likely keep you poor, not rich. And 250+ more poverty busting distinctions... Demand the Fastlane, an alternative road-to-wealth; one that actually ignites dreams and creates millionaires young, not old. Change lanes and find your explosive wealth accelerator. Hit the Fastlane, crack the code to wealth, and find out how to live rich for a lifetime. Legendary American Radiology Board Review Expert Prometheus Lionhart presents a comprehensive review for the FRCR Part A Exam. This is a 2 volume Set. This is Volume 2 which includes, Modules 4-6 (Genitourinary, Adrenal, Obstetrics & Gynaecology, Breast, Paediatrics, Neuroradiology). "Crack the Guy Code is a tour de force coverage of the insider's, fly-on-the-wall view (no pun intended) of why guys do what they do in their love lives. More importantly, he takes you by the hand-no holds barred-at what YOU need to do in return. Highly recommended." - Paul Dobransky, M.D. CEO, WomensHappiness.com, Author, The Secret Psychology of How We Fall in Love and The Power of Female Friendship \* 30 Things that could save your relationship and keep you together forever \* Why the balance between work, home and play will ultimately rule the day in your future happiness. \* Why emailing and texting may only serve to ruin your relationships. \* There are successful couples that "get it." Find out how! \* The Crack the Guy Code "Do Not Call List." \* The right time to set boundaries and let him know exactly who you are and what you want. \* Go from nagging your guy to having a friendly, loving conversation this way. In a small Southern town in 1944, two girls secretly help a seriously ill army deserter, a decision that changes their perceptions of right and wrong. Issues of moral ambiguity and accepting consequences for actions are thoughtfully considered in this deftly crafted story. Veteran script consultant Jill Chamberlain discovered in her work that an astounding 99 percent of first-time

screenwriters don't know how to tell a story. These writers may know how to format a script, write snappy dialogue, and set a scene. They may have interesting characters and perhaps some clever plot devices. But, invariably, while they may have the kernel of a good idea for a screenplay, they fail to tell a story. What the 99 percent do instead is present a situation. In order to explain the difference, Chamberlain created the Nutshell Technique, a method whereby writers identify eight dynamic, interconnected elements that are required to successfully tell a story. Now, for the first time, Chamberlain presents her unique method in book form with The Nutshell Technique: Crack the Secret of Successful Screenwriting. Using easy-to-follow diagrams ("nutshells"), she thoroughly explains how the Nutshell Technique can make or break a film script. Chamberlain takes readers step-by-step through thirty classic and contemporary movies, showing how such dissimilar screenplays as Casablanca, Chinatown, Pulp Fiction, The Usual Suspects, Little Miss Sunshine, Juno, Silver Linings Playbook, and Argo all have the same system working behind the scenes, and she teaches readers exactly how to apply these principles to their own screenwriting. Learn the Nutshell Technique, and you'll discover how to turn a mere situation into a truly compelling screenplay story. The second volume in the most recent crack the core radiology board review series. This volume covers topics on MSK, Neuro, Mammo, and Nukes. It also contains a strategy and rapid review section. This book focuses on characterization of organic coatings by different testing methods and understanding of structure formation and materials properties. The knowledge of protective organic coatings and current test methods is based largely on empirical experience. This book aims at explaining the coating property changes during film drying and curing in terms of chemical and physical transformations. Current test methods are reviewed with emphasis on understanding their physical basis and expressing the test results in terms of comparable physical

quantities. In general, this book provides readers a deeper understanding of the binder design, coating film formation process, properties build-up, appearance and defect formation, and automotive paint application. It also suggests manifold ways to improving the coatings performance. This book is designed for coating professionals to gain deeper understanding of characterization techniques and to select the right ones to solve their coating problems. It is ideal for both experienced and early career scientists and engineers. Also, it is useful for graduate students in the general area of protective coatings. Volume 2 of Prometheus Lionhart's Crack the Core Radiology Board Review Series. The volume contains MSK, Neuro, Vascular, IR, and Mammo -- as well as the summary/strategy chapter. This book contains the fully peer-reviewed papers presented at the Third Engineering Foundation Conference on Small Fatigue Cracks, held under the chairmanship of K.S. Ravichandran and Y. Murakami during December 6-11, 1998, at the Turtle Bay Hilton, Oahu, Hawaii. This book presents a state-of-the-art description of the mechanics, mechanisms and applications of small fatigue cracks by most of the world's leading experts in this field. Topics ranging from the mechanisms of crack initiation, small crack behavior in metallic, intermetallic, ceramic and composite materials, experimental measurement, mechanistic and theoretical models, to the role of small cracks in fretting fatigue and the application of small crack results to the aging aircraft and high-cycle fatigue problems, are covered. NEW YORK TIMES BESTSELLER "I come from a family forged by tragedies and bound by a remarkable, unbreakable love," Hunter Biden writes in this deeply moving and "unflinchingly honest" (Entertainment Weekly) memoir of addiction, loss, and survival. When he was two years old, Hunter Biden was badly injured in a car accident that killed his mother and baby sister. In 2015, he suffered the devastating loss of his beloved big brother, Beau, who died of brain cancer at the age of forty-six. These hardships were compounded by the collapse of his marriage and a years-long battle with drug and alcohol addiction. In Beautiful Things—"an astonishingly candid and brave book about loss, human frailty, wayward souls, and hard-fought redemption" (Dave Eggers, New York Times bestselling author)—Hunter recounts his descent into substance abuse and his tortuous path to sobriety. The story ends with where Hunter is today—a sober married man with a new baby, finally able to appreciate the beautiful things in life. Legendary American Radiology Board Review Expert Prometheus Lionhart presents a comprehensive review for the FRCR Part A Exam. This is a 2 volume Set. The 8th (2021) edition of the world famous radiology board review text. This volume includes: Peds, GI, GU, Reproductive, Thoracic, Cardiac, and Nuclear Medicine A New York Times bestseller/Washington Post Notable Book of 2017/NPR Best Books of 2017/Wall Street Journal Best Books of 2017 "This book will serve as the definitive guide to the past and future of health care in America."—Siddhartha Mukherjee, Pulitzer Prize-winning author of The Emperor of All Maladies and The Gene At a moment of drastic political upheaval, An American Sickness is a shocking investigation into our dysfunctional healthcare system - and offers practical solutions to its myriad problems. In these troubled times, perhaps no institution has unraveled more quickly and more completely than American medicine. In only a few decades, the medical system has been overrun by organizations seeking to exploit for profit the trust that vulnerable and sick Americans place in their healthcare. Our politicians have proven themselves either unwilling or incapable of reining in the increasingly outrageous costs faced by patients, and market-based solutions only seem to funnel larger and larger sums of our money into the hands of corporations. Impossibly high insurance premiums and inexplicably large bills have become facts of life; fatalism has set in. Very quickly Americans have been made to accept paying more for less. How did things get so bad so fast? Breaking down this monolithic business into the individual industries—the hospitals, doctors, insurance companies, and drug manufacturers—that together constitute our healthcare system, Rosenthal exposes the recent evolution of American medicine as never before. How did healthcare, the caring endeavor, become healthcare, the highly profitable industry? Hospital systems, which are managed by business executives, behave like predatory lenders, hounding

patients and seizing their homes. Research charities are in bed with big pharmaceutical companies, which surreptitiously profit from the donations made by working people. Patients receive bills in code, from entrepreneurial doctors they never even saw. The system is in tatters, but we can fight back. Dr. Elisabeth Rosenthal doesn't just explain the symptoms, she diagnoses and treats the disease itself. In clear and practical terms, she spells out exactly how to decode medical doublespeak, avoid the pitfalls of the pharmaceuticals racket, and get the care you and your family deserve. She takes you inside the doctor-patient relationship and to hospital C-suites, explaining step-by-step the workings of a system badly lacking transparency. This is about what we can do, as individual patients, both to navigate the maze that is American healthcare and also to demand far-reaching reform. An American Sickness is the frontline defense against a healthcare system that no longer has our well-being at heart. A team of veteran drug researchers in medicine, law, and the social sciences provides the most comprehensive, penetrating, and original analysis of the crack cocaine problem in America to date. Helps readers understand why the United States has the most repressive, expensive, yet least effective drug policy in the Western world. Financial market bubbles are recurring, often painful, reminders of the costs and benefits of capitalism. While many books have studied financial manias and crises, most fail to compare times of turmoil with times of stability. In Bubbles and Crashes, Brent Goldfarb and David A. Kirsch give us new insights into the causes of speculative booms and busts. They identify a class of assets—major technological innovations—that can, but does not necessarily, produce bubbles. This methodological twist is essential: Only by comparing similar events that sometimes lead to booms and busts can we ascertain the root causes of bubbles. Using a sample of eighty-eight technologies spanning 150 years, Goldfarb and Kirsch find that four factors play a key role in these episodes: the degree of uncertainty surrounding a particular innovation, the attentive presence of novice investors, the opportunity to directly invest in companies that specialize in the technology, and whether or not a technology is a good protagonist in a narrative. Goldfarb and Kirsch consider the implications of their analysis for technology bubbles that may be in the works today, offer tools for investors to identify whether a bubble is happening, and propose policy measures that may mitigate the risks associated with future speculative episodes. In the presidential election of 2008 America seemed ready to elevate a woman to the presidency or vice presidency and—with Hillary Clinton and Sarah Palin—was on the verge of actually doing so. Words like inevitable and phenomenon were in the air and the political and cultural stars seemed to be aligned. Why didn't it happen? What will it take to make it happen soon? In a probing analysis sure to ignite controversy, acclaimed White House correspondent Anne Kornblut argues that the optimists are blind to formidable obstacles that still stand in the way of any woman who aims for America's highest political offices. And she makes clear exactly which strategies and

common assumptions will need to change if a woman intends to break through the "highest, hardest glass ceiling" of all. Delving deep inside the Clinton and Palin campaigns, Kornblut reveals: • the strategists' mishandling of their candidates as women by failing to strike the right balance between femininity and toughness • Clinton's weathering of a series of stinging gender-based attacks, until accusations of "pimping out" her daughter, Chelsea, finally brought her to tears • that Barack Obama was celebrated for his "historic" win in Iowa, even though it was not the first time an African American had won a caucus, but few noticed when Clinton became the first woman to win a primary in New Hampshire • that Palin was chosen solely by men, none of whom had experience in running women for office Drawing from exclusive interviews with prominent women in both parties, Kornblut pinpoints where politically ambitious American women have gone wrong and what it will take to put them on track to the ultimate prize: the presidency. Former secretary of state Condoleezza Rice asserts: "We crossed the bar on African Americans some time ago. I'm not quite sure we've crossed it on women." House Speaker Nancy Pelosi remarks on the "suit of armor" women must don to survive the sexism and viciousness of politics. Homeland Security Director Janet Napolitano confronts the false rumors that she is a lesbian and reveals what an invigorating "kick in the pants" it is to be in politics. And California gubernatorial candidate Meg Whitman, the former head of eBay, compares politics to business: "It feels to me, thus far, as less of a meritocracy and more of a popularity contest. More of a little bit of an old boys' club." Kornblut identifies the surprising realities of gender politics, such as the harsh treatment female candidates often receive from women voters, the gap between the United States and other countries when it comes to the electability of women, the "mommy penalty" that handicaps women candidates with young children, and the special appeal that women with law enforcement backgrounds have with voters. Notes from the Cracked Ceiling reveals that the highly touted new era of gender-equal politics never got as far as was commonly perceived and is now in full retreat. It is essential reading for anyone who cares about politics and the limits for women that persist. Volume 1: Peds, GI, GU, Endocrine, Reproductive, Chest, Vascular, Cardiac, IR Volume 2: \*sold separately- Neuro, MSK, Nukes, Mammo, Strategy Imagine trusting a doctor—with the best reputation in the state—to do surgery on your eyes. Now imagine the worst of outcomes. Blindness in an eye that you learn, in fact, never needed surgery. And the medical center where you were treated is ignoring the problem. Waking Up Blind is the story of how an eye surgeon became the cause of an array of medical problems for his patients. It is also the story of how one of the nation's premier medical centers tried to conceal the growing scandal. The faculty who exposed the problems were punished. Official committees and the university leaders minimized the misconduct. Slowly, lawsuits and publicity brought some to light in bits and pieces. With the use of court documents, transcripts of tape-recorded conversations, interviews, and personal observation, Dr. Tom Harbin presents this case from the very beginning, uncovering all levels of wrongdoing and secrecy. Waking

Up Blind will shock the reader with its candid exploration of the dark side of medicine. The true story of a cold case, a compulsive liar, and five determined detectives, from the #1 New York Times–bestselling author and "master journalist" (The Wall Street Journal). On March 29, 1975, sisters Katherine and Sheila Lyons, ages ten and twelve, vanished from a shopping mall in suburban Washington, DC As shock spread, then grief, a massive police effort found nothing. The investigation was shelved, and the mystery endured. Then, in 2013, a cold case squad detective found something he and a generation of detectives had missed. It pointed them toward a man named Lloyd Welch, then serving time for child molestation in Delaware. The acclaimed author of Black Hawk Down and Hue 1968 had been a cub reporter for a Baltimore newspaper at the time of the original disappearance, and covered the frantic first weeks of the story. In The Last Stone, he returns to write its ending. Over months of intense questioning and extensive investigation of Welch's sprawling, sinister Appalachian clan, five skilled detectives learned to sift truth from determined lies. How do you get a compulsive liar with every reason in the world to lie to tell the truth? The Last Stone recounts a masterpiece of criminal interrogation, and delivers a chilling and unprecedented look inside a disturbing criminal mind. "One of our best writers of muscular nonfiction." —The Denver Post "Deeply unsettling . . . Bowden displays his tenacity as a reporter in his meticulous documentation of the case. But in the story of an unimaginably horrific crime, it's the detectives' unwavering determination to bring Welch to justice that offers a glimmer of hope on a long, dark journey." —Time Update 2020 Edition - Radiology Board Review Super Weapon -- includes chapters on Neuro, MSK, Vascular, IR, Mammo and Strategy This work is about the art of living mentally well. Told through the first-hand experience of mental health advocate, activist and speaker Kevin Hines (who has bipolar disorder), the story is an honest account of the struggle to live mentally well, and teach others how to do t...
