In his second book, The Compassionate Organization, Ethan Chazin business coach and organizational behavior expert explores how organizations build cultures that thrive by leveraging trust, ethics and a moral compass, developing powerfully engaging Vision and Mission statements, and applying the best practices to build effective workplace cultures including: hiring and retention strategies, emotional intelligence, effective communications, branding, diversity & inclusion, employee engagement and empowerment practices. The days of one employer per career are long gone. In today's contract economy, workers change jobs between eight to ten times by the time they reach 35 years old.

Mature workers and Baby Boomers are leaving the workplace by the tens of thousands every day. This mass exodus of the Mature workforce and Baby Boomers coincides with Millennial workers taking over roles of increasing importance within organizations. Estimates are Millennials will constitute 75-80% of the American workforce by 2020. Organizations have been flattening out their employee ranks by casting off layers of middle management the last few decades. With this huge transfer in the balance of power from older to younger American workers, Millennials bring with them into the workplace a new set of organizational values, beliefs about work, and a set of ethics and expectations about appropriate organizational behavior. Millennials expect that the organizations they work for (and buy from) share their values, possess a moral compass, and must care for the environment. Thus, understanding how to build and maintain a compassionate organization should be top of mind for anyone tasked with launching, growing, staffing and leading an organization. Like the three editions that preceded it, this new edition targets markets in health care practice and educational settings. It addresses practicing nurses and nursing students, together with nursing leadership and nursing faculty. It speaks to nursing informatics specialists and—in a departure from earlier editions of this title—to all nurses, regardless of their specialty, extending its usefulness as a text as noted below. In recognition of the evolving electronic health information environment and of interdisciplinary health care teams, the book is designed to be of interest to members of other health care professions (quality officers, administrators, etc.) as well as health information technology professionals (in health care facilities and in industry). The book will include numerous relevant case studies to illustrate the theories and principles discussed, making it an ideal candidate for use within nursing curricula (both undergraduate and graduate), as well as continuing education and staff development programs. This book honors the format established by the first three editions by including a content array and questions to guide the reader. This 4th edition also includes numerous brief case studies that help to illustrate the theories and practices described within the various chapters. Most of these “mini-cases” are provided by members of professional nursing organizations that comprise the TIGER Initiative. These mini-cases are listed in the front matter and highlighted via formatting throughout the text. Loved by instructors for the visual and flexible way to build computer skills, the Illustrated Series is the ideal solution for students with a variety of skill levels and learning styles. MICROSOFT OFFICE 2013 ILLUSTRATED PROJECTS allows students to get hands-on with the Microsoft Office 2013 concepts and skills through engaging projects built from scratch. Students will retain more knowledge after applying what they've learned in a meaningful way. Human Resources for School Leaders contains comprehensive and systematic coverage of all aspects of public school human resource management. Unlike other books focused on this topic, the authors ground their text on "student learning" and outline strategies designed to enhance school climate and culture. The early chapters focus on relevant theories and research supporting current human resource methods- required learning in any educational leadership preparation program. The following chapters take a more practitioner approach as main topics include recruiting, hiring, orientation, mentoring, leading, and professional growth of teachers. The differentiating factors between this text by Davis &Fowler and other texts on the market is (1) the forward looking approach taken by the authors in that they not only exam current 21st century HRD practices but also give the reader insight into future HRD methods in a century dominated by K-12 marketization; (2) the focus on building level HRD systems; and (3) the thorough descriptions of available technology tools that can be utilized to improve HRD systems and heighten quality control through efficient data-based decisions thereby impacting instructional capacity and student learning. The case studies are relevant and relatable, and offer practical strategies and techniques that can be easily implemented at the building or district level. A veteran teacher provides surefire tips on how parent-teacher communication can work for everyone! Get three books in one!
