The complete professional or amateur mechanic's guide to all repair and servicing procedures. Everything you need to completely restore your 1947-1955 first series Chevy pickup to better-than-new condition is shown in complete detail! The Advance Design era (1947-1955) was historic for Chevrolet, topping all the production numbers every year they were in production. And for good reason. The post-World War II economy demanded a tough and well-engineered solution for this growing economy. Selling more than 2.5 million units during this era, Chevrolet quickly surpassed and controlled the light-truck market with style, utility, and logical engineering. This era has been overlooked for long enough, and Deve Krehbiel, a well-known restoration expert from DevesTechNet.com who specializes in these trucks, puts his 40 years of experience restoring nothing but Advance Design trucks into an extensive and complete single volume. With more than 500 photos and detailed instruction for every aspect of a proper restoration, this book will be the restorer's best friend. Deve's companion book, Chevrolet Inline 6 Engine: 1929-1962 (SA455), explains in full detail the engine aspects of your project. The Advance Design Chevy pickup is one of the most popular and highly prized vehicles at any venue. The author's hope is that this book will give you the confidence and the knowledge to put your old Chevy truck back on the road in style. There is just nothing more interesting and more inviting than an old Chevy truck! This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so

that even a novice can do the work. The Volkswagen Type 3 Workshop Manual: 1961-1967 covers Type 3 models (Fastback, Squareback, Notchback and Type 3 Karmann Ghia 1500 coupe). This book represents the sixth title in our line of vintage Volkswagen repair manuals and compiles original Volkswagen official service and repair information for US and Canada Type 3 models for the first time in a single volume. The Volkswagen 1200 Workshop Manual: 1961-1965 covers the 1961 through 1965 model year Beetle and Karman Ghia models. Now available in a high-quality hardcover edition, this is a vintage reproduction of original Volkswagen service and repair information for air cooled Volkswagen 1200 models sold in the USA and Canada. This technical archive edition is a historical record of the illustrations and procedures for routine maintenance, troubleshooting, repair and rebuilding. Air-cooled Volkswagens (Type 11, 14, 15) covered: \* Volkswagen Type 11 Beetle Sedan \* Volkswagen Type 14 Karmann Ghia Coupe \* Volkswagen Type 15 Beetle Convertible \* Volkswagen Type 141 Karmann Ghia Convertible Engines covered: \* Volkswagen air-cooled type 1 "upright" engine 1192cc, 36hp Transmissions covered \* Volkswagen fully synchronized 4-speed manual transmission An exact reprint of the original factory document. Packed with useful technical information, repair guides and diagrams. When the TR7 was introduced, it was a complete contrast to Triumphs traditional TR sports cars. Whereas the former sported a traditional, British image, the newer model presented a modern profile. This book is guaranteed to come to the rescue of owners attempting to determine which parts, accessories, and colours will restore their vehicle to factory-original condition. The BMW Z3 Service Manual: 1996-2002 is a comprehensive source of service information and technical specifications available for the BMW Z3 Roadster and Coupe up through the 2002 model year. New durable hardcover format - This BMW manual is now being published as a durable, long-lasting hardcover book designed to withstand many years of use in a professional shop

or home garage. Though the do-it-yourself BMW owner will find this manual indispensable as a source of detailed maintenance and repair information, the BMW owner who has no intention of working on his or her car will find that reading and owning this manual will make it possible to discuss repairs more intelligently with a professional technician. Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US

Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes:

Introduction  
The history of specials  
Planning Donor car  
Chassis, suspension, steering, rear axle  
Engine, fuel system, cooling system, ancillaries, exhaust  
Gearbox  
Bodywork  
Braking system  
Cockpit
