Piano Pieces Book 2 is an exciting collection of pieces by Heather Hammond and Karen Marshall, arranged and written specially for the twenty-first century child. Packed with familiar classics and engaging new pieces in contemporary styles, the book supplements Get Set! Piano Tutor Book 2. A fascinating history of the piano explored through 100 pieces chosen by one of the UK's most renowned concert pianists "Tomes . . . casts her net widely, taking in chamber music and concertos, knotty avant-garde masterworks and (most welcome) jazz."--Richard Fairman, Financial Times, "Best Books of 2021: Classical Music" "[One of] the most beautiful books I got my hands on this year. . . . About the shaping of this maddening, glorious, unconquerable instrument."--Jenny Colgan, Spectator, "Books of the Year" An astonishingly versatile instrument, the piano allows just two hands to play music of great complexity and subtlety. For more than two hundred years, it has brought solo and collaborative music into homes and concert halls and has inspired composers in every musical genre--from classical to jazz and light music. Charting the development of the piano from the late eighteenth century to the present day, pianist and writer Susan Tomes takes the reader with her on a personal journey through 100 pieces including solo works, chamber music, concertos, and jazz. Her choices include composers such as Bach, Mozart, Beethoven, Robert Schumann, Tchaikovsky, Debussy, Gershwin, and Philip Glass. Looking at this history from a modern performer's perspective, she acknowledges neglected women composers and players including Fanny Mendelssohn, Maria Szymanowska, Clara Schumann, and Amy Beach. (Faber Piano Adventures ). Written for ages 5 and 6, My First Piano Adventure captures the child's playful spirit. Fun-filled songs, rhythm games and technique activities develop beginning keyboard skills. Three distinguishing features of the Lesson Book A make it unique and effective for the young 5-6 year old beginner. 1. A strong focus on technique embedded in the book through playful technique games, chants, and carefully-composed pieces that gently lead the child

into pianistic motions. 2. An outstanding CD for the young student to listen, sing, tap, and play along with at the piano. The orchestrated songs on the CD feature children singing the lyrics, which has great appeal to the 5-6 year old beginner. The CD becomes a ready-made practice partner that guides the student and parent for all the pieces and activities in the books. 3. The fanciful art features five multi-cultural children who are also learning to play. These friends at the piano introduce basic rhythms, white key names, and a variety of white and black-key songs that span classical, folk, and blues. Young students will listen, sing, create, and play more musically with Nancy and Randall Faber's My First Piano Adventure, Lesson Book A. The Lesson Book introduces directional pre-reading, elementary music theory and technique with engaging songs, games, and creative discovery at the keyboard. Young students will enjoy the multi-cultural "friends at the piano" who introduce white-key names, basic rhythms, and a variety of songs which span classical, folk, and blues. Ear-training and eye-training are also part of the curriculum. The Fabers' instructional theory "ACE" - Analysis, Creativity, and Expression, guides the pedagogy of My First Piano Adventure. Analysis leads to understanding, creativity leads to self-discovery, and expression develops personal artistry. The CD for this book offers a unique listening experience with outstanding orchestrations and vocals. The recordings demonstrate a key principle of the course: when children listen, sing, tap, and move to their piano music, they play more musically. View Helpful Introductory Videos Here (Piano Method). Here is a fun, easy course that teaches children how to improvise and play jazz piano faster than ever before. Kids will stay motivated as they improvise on popular children's songs arranged in a jazz style, while the opportunity to play alongside video accompaniments will inspire a love for performance. Every song seamlessly integrates a new improvisatory skill, systematically building upon previous learning and enabling the student to progress with confidence. Including exclusive access to video tutorials, this book is the definitive introduction to improvisation and jazz piano. The method can be used in combination with a teacher or parent. Topics covered include: swing and syncopation \* echo playing \* call and response \* rock and swing grooves \* improvising on 1-5 notes \* hearing chord changes \* 12-bar blues \* and more. A New York Times Notable Book A San Francisco Chronicle, San Jose Mercury News, and Los Angeles Times Best Book of the Year "A gripping and resonant novel. . . . Riveting." —Michiko Kakutani, The New York Times In 1886 a shy, middle-aged piano tuner named Edgar Drake receives an unusual commission from the British War Office: to travel to the remote jungles of northeast Burma and there repair a rare piano belonging to an eccentric army surgeon who has proven mysteriously indispensable to the imperial design. Known as a performer of Bach, Beethoven, Stravinsky, and Elliott Carter, he has also written highly acclaimed criticism for sophisticated students and professionals. In Piano Notes, he writes for a broader audience about an old friend -- the piano itself. Drawing upon a lifetime of wisdom and the accumulated lore of many great performers of the past, Rosen shows why the instrument demands such a stark combination of mental and physical prowess. Readers will gather many little-known insights -- from how pianists vary their posture, to how splicings and microphone placements can ruin recordings, to how the history of composition was dominated by the piano for two centuries. Stories of many great musicians abound. Rosen reveals Nadia Boulanger's favorite way to avoid commenting on the performances of her friends ("You know what I think," spoken with utmost earnestness), why Glenn Gould's recordings suffer from "double-strike" touches, and how even Vladimir Horowitz became enamored of splicing multiple performances into a single recording. Rosen's explanation of the piano's physical pleasures, demands, and discontents will delight and instruct anyone who has ever sat at a keyboard, as well as everyone who loves to listen to the instrument. In the end, he strikes a contemplative note. Western music was built around the piano from the classical era until recently, and for a good part of that time the instrument was an essential acquisition for every middle-class household. Music making was part of the fabric of social life. Yet those days have ended. Fewer people learn the instrument today. The rise of recorded music has homogenized performance styles and greatly reduced the frequency of public concerts. Music will undoubtedly survive, but will the supremely physical experience of playing the piano ever be the same? Featuring all 29 pieces from the album Lang Lang Piano Book, this is a collection of the most significant pieces from Lang Lang's personal musical journey. It also includes exclusive photographs, comments from Lang Lang on every piece, and an edition of "Für Elise" annotated with Lang Lang's own performance notes. This is a book for all pianists to treasure and revisit again and again. Cased with sewn binding, marbled endpapers, page-finder ribbon, head and tail bands, and a removable belly-band. The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race. To help with the teaching process, many colored pictures

and graphics use the student's visual memory to get a strong and secure grasp of the basics uses. Students gain an understanding of the basic important theory using many coloured pictures to prompt their visual memory to help them understand and use it in their exercises in practice songs and to practice/test it in the workbook. Note-reading skills. The students are to say the names of the notes aloud and count them while they play the exercises on the piano. This makes students realize what notes they are playing, which is not easy. They don't learn it by memorising using the finger guide or by memorising the melody. Rather, they have to know the exact note names. They read notes from the very start. Each finger or a new note is individually and strongly developed using a lot of exercises for particular subjects from the beginning with a graduated, consistent method. Another strength is the introduction of ensemble playing from the very beginning. Beginner students have to play each exercise three times: say letter names while they play, count while they play, and play with a teacher. This is important for the teacher to help guide the student and to make sure that students understand the individual notes and already know how to play each exercise before they go home. When the students can read music, performing becomes a joy rather than a dreaded experience. In the workbook, which is included for each level you are going to confirm the notes and the theory/terminology you have learned during the lesson in three steps, which should be done in each lesson. Writing the notes, finding the notes on the staff/stave in different orders and playing the game "Noughts and Crosses" where students are drawing and explaining the symbols to help them remember it. After students have completed books A/B for four year olds, 1A/1B and 2A/2B, they are competent in music terminology and sight reading. They have a solid enough understanding to begin studying books of other composers; Classical or Christmas books at that particular level. Magic Piano book 1A begins by reviewing the same concepts taught in Magic Piano A/B for four year olds and also introduces new concepts for the left hand, with progression to book 1B. Using CD [http://www.amazon.com/Magic-piano-book-Lucia-Timkova/dp/B00N37Q0VU/ref=sr\\_1\\_1?ie=UTF8&qid=1420202341&sr=8-1&keywords=Magic+piano+book+accompaniments+A-B+Lucia+timkova](http://www.amazon.com/Magic-piano-book-Lucia-Timkova/dp/B00N37Q0VU/ref=sr_1_1?ie=UTF8&qid=1420202341&sr=8-1&keywords=Magic+piano+book+accompaniments+A-B+Lucia+timkova) you can simulate the use of a metronome, and in a fun environment, train for use of a metronome, and have you, or your student play along with nice background music to the theme of the song!
