At no other point in human history have the definitions of "woman" and "man," "male" and "female," "masculine" and "feminine," been more contentious than now. This book advances a pragmatic approach to the act of defining that acknowledges the important ethical dimensions of our definitional practices. Increased transgender rights and visibility has been met with increased opposition, controversy, and even violence. Who should have the power to define the meanings of sex and gender? What values and interests are advanced by competing definitions? Should an all-boys' college or high school allow transgender boys to apply? Should transgender women be allowed to use the women's bathroom? How has growing recognition of intersex conditions challenged our definitions of sex/gender? In this timely intervention, Edward Schiappa examines the key sites of debate including schools, bathrooms, the military, sports, prisons, and feminism, drawing attention to the political, practical, and ethical dimensions of the act of defining itself. This is an important text for students and scholars in gender studies, philosophy, communication, and sociology. Lewis R. Gordon's *Fear of Black Consciousness* is a groundbreaking account of Black consciousness by a leading philosopher. In this original and penetrating work, Lewis R. Gordon, one of the leading scholars of Black existentialism and anti-Blackness, takes the reader on a journey through the historical development of racialized Blackness, the problems this kind of consciousness produces, and the many creative responses from Black and non-Black communities in contemporary struggles for dignity and freedom. Skillfully navigating a difficult and traumatic terrain, Gordon cuts through the mist of white narcissism and the versions of consciousness it perpetuates. He exposes the bad faith at the heart of many discussions about race and racism not only in America but across the globe, including those who think of themselves as "color blind." As Gordon reveals, these lies offer many white people an inherited sense of being extraordinary, a license to do as they please. But for many if not most Blacks, to live an ordinary life in a white-dominated society is an extraordinary achievement. Informed by Gordon's life growing up in Jamaica and the Bronx, and taking as a touchstone the pandemic and the uprisings against police violence, *Fear of Black Consciousness* is a groundbreaking work that positions Black consciousness as a political commitment and creative practice, richly layered through art, love, and revolutionary action. This volume is the first book-length study on post-publication responses to academic plagiarism in humanities disciplines. It demonstrates that the correction of the scholarly literature for plagiarism is not a task for editors and publishers alone; each member of the research community has an indispensable role in maintaining the integrity of the published literature in the aftermath of plagiarism. If untreated, academic plagiarism damages the integrity of the scholarly record, corrupts the surrounding academic enterprise, and creates inefficiencies across all levels of knowledge production. By providing case studies from the field of philosophy and related disciplines, the volume exhibits that current post-publication responses to academic plagiarism are insufficient. It catalogues how humanities disciplines fall short in comparison with the natural and biomedical sciences for ensuring the integrity of the body of published research. This volume provides clarity about how to conceptualize the scholarly record, surveys the traditional methods for correcting it, and argues for new interventions to improve the reliability of the body of published research. The book is valuable not only to those in the field of philosophy and other humanities disciplines, but also to those interested in research ethics, meta-science, and the sociology of research. African Americans once passed as whites to escape the pains of racism. Today's neo-passing has pushed the old idea of passing in extraordinary new directions. A white author uses an Asian pen name; heterosexuals live "out" as gay; and, irony of ironies, whites try to pass as black. Mollie Godfrey and Vershawn Ashanti Young present essays that explore practices, performances, and texts of neo-passing in our supposedly postracial moment. The authors move from the postracial imagery of Angry Black White Boy and the issues of sexual orientation and race in ZZ Packer's short fiction to the politics of Dave Chappelle's skits as a black President George W. Bush. Together, the works reveal that the questions raised by neo-passing—questions about performing and contesting identity in relation to social norms—remain as relevant today as in the past. Contributors: Derek Adams, Christopher M. Brown, Martha J. Cutter, Marcia Alesan Dawkins, Michele Elam, Alisha Gaines, Jennifer Glaser, Allyson Hobbs, Brandon J. Manning, Loran Marsan, Lara Narcisi, Eden Osucha, Gayle Wald, and Deborah Elizabeth Whaley This book examines representations and experiences of trans and nonbinary identities in a variety of contemporary cultural contexts including media, religion, sports, race, film, performance, and literature. Mixing auto-ethnographies and supportive scholarship, the contributors to this volume deliver a global perspective on the accomplishment that have been made alongside the challenges that members of the LGBTQIA+ community continue to face. A timely, provocative, necessary look at how identity politics has come to dominate college campuses and higher education in America at the expense of a more essential commitment to equality. Thirty years after the culture wars, identity politics is now the norm on college campuses—and it hasn't been an unalloyed good for our education system or the country. Though the civil rights movement, feminism, and gay pride led to profoundly positive social changes, William Egginton argues that our culture's increasingly narrow focus on individual rights puts us in a dangerous place. The goal of our education system, and particularly the liberal arts, was originally to strengthen community; but the exclusive focus on individualism has led to a new kind of intolerance, degrades our civic discourse, and fatally distracts progressive politics from its commitment to equality. Egginton argues that our colleges and universities have become exclusive, expensive clubs for the cultural and economic elite instead of a national, publicly funded project for the betterment of the country. Only a return to the goals of community, and the egalitarian values underlying a liberal arts education, can head off the further fracturing of the body politic and the splintering of the American mind. With lively, on-the-ground reporting and trenchant analysis, *The Splintering of the American Mind* is a powerful book that is guaranteed to be controversial within academia and beyond. At this critical juncture, the book challenges higher education and every American to reengage with our history and its contexts, and to imagine our nation in new and more inclusive ways. A trailblazing exploration of the political stakes of curiosity Curiosity is

political. Who is curious, when, and how reflects the social values and power structures of a given society. In *Curiosity and Power*, Perry Zurn explores the political philosophy of curiosity, staking the groundbreaking claim that it is a social force—the heartbeat of political resistance and a critical factor in social justice. He argues that the very scaffolding of curiosity is the product of political architectures, and exploring these values and architectures is crucial if we are to better understand, and more ethically navigate, the struggle over inquiry in an unequal world. *Curiosity and Power* explores curiosity through the lens of political philosophy—weaving in Nietzsche, Foucault, and Derrida in doing so—and the experience of political marginalization, demonstrating that curiosity is implicated equally in the maintenance of societies and in their transformation. Curiosity plays as central a role in establishing social institutions and fields of inquiry as it does in their deconstruction and in building new forms of political community. Understanding curiosity is critical to understanding politics, and understanding politics is critical to understanding curiosity. Drawing not only on philosophy and political theory but also on feminist theory, race theory, disability studies, and trans studies, *Curiosity and Power* tracks curiosity in the structures of political marginalization and resistance—from the Civil Rights Movement to building better social relationships. *Curiosity and Power* insists that the power of curiosity be recognized and engaged responsibly. An anthropologist visits the frontiers of genetics, medicine, and technology to ask: Whose values are guiding gene editing experiments? And what does this new era of scientific inquiry mean for the future of the human species? "That rare kind of scholarship that is also a page-turner." —Britt Wray, author of *Rise of the Necrofauna* At a conference in Hong Kong in November 2018, Dr. He Jiankui announced that he had created the first genetically modified babies—twin girls named Lulu and Nana—sending shockwaves around the world. A year later, a Chinese court sentenced Dr. He to three years in prison for "illegal medical practice." As scientists elsewhere start to catch up with China's vast genetic research program, gene editing is fueling an innovation economy that threatens to widen racial and economic inequality. Fundamental questions about science, health, and social justice are at stake: Who gets access to gene editing technologies? As countries loosen regulations around the globe, from the U.S. to Indonesia, can we shape research agendas to promote an ethical and fair society? Eben Kirksey takes us on a groundbreaking journey to meet the key scientists, lobbyists, and entrepreneurs who are bringing cutting-edge genetic engineering tools like CRISPR—created by Nobel Prize-winning biochemists Jennifer Doudna and Emmanuelle Charpentier—to your local clinic. He also ventures beyond the scientific echo chamber, talking to disabled scholars, doctors, hackers, chronically-ill patients, and activists who have alternative visions of a genetically modified future for humanity. *The Mutant Project* empowers us to ask the right questions, uncover the truth, and navigate this brave new world. Between the decline of the labor movement, the aftershocks of the falls of so-called "actually existing socialism," and the long exile of even social democrats from the levers of real power, we have gotten far too used to thinking of leftism as a performative exercise in expressing our political commitments rather than a serious effort to achieve left-wing goals in the real world. *Cancelling Comedians While the World Burns* calls for a smarter, funnier, more strategic left. This book is an argument for moving beyond culturally/historically/ethnically/biologically-grounded identity as the necessary foundation of an authentic self. It highlights examples of people who are attempting to inhabit identities they feel are more appropriate to themselves, by deploring the damage done via claims about authentic identity. The sole theme of this book is "becoming beyond identity". We are not fixed human beings but rather perpetually-dynamic human becomings. As intelligence is enabled or recognized beyond the merely human, we should welcome our continuing evolution from homosapiens, sapiens, into many varieties of intelligences on Earth and the cosmos. This book builds from tiny ripples into a tsunami of examples from conventional identity studies, to Confucian human becomings, to apotemnophilia, to DIY biohacking, to cyborgs, to artefacts, to hiveminds, to intelligence in animals, plants and fungi from the Holocene through the beginnings of the precarious, climate change-driven Anthropocene Epoch, with hints far beyond and throughout the cosmos. From a lifetime of work in future studies, anticipation science and space studies, the author balances frank tales of his own experiences and beliefs concerning his uncertain and fluid identities with those of others who tell their stories. In addition to material from academic and popular sources, a few poems further illuminate the scene. Open inquiry and engagement with a diverse range of views are long-cherished and central tenets of higher education and are pivotal to innovation and knowledge creation. Yet, free inquiry on American campuses is hampered by a climate that constrains teaching, research, and overall discourse. In *Unassailable Ideas*, Ilana Redstone and John Villasenor examine the dominant belief system on American campuses, its uncompromising enforcement through social media, and the consequences for higher education. They argue that two trends in particular--the emergent role of social media in limiting academic research and knowledge discovery and a campus culture increasingly intolerant to diverse views and open inquiry--are fundamentally reshaping higher education. Redstone and Villasenor further identify and explain how three well-intentioned unwritten rules regarding identity define the current campus climate. They present myriad case studies illustrating the resulting impact on education, knowledge creation-and, increasingly the world beyond campus. They also provide a set of recommendations to build a new campus climate that would be more tolerant toward diverse perspectives and open inquiry. An insightful analysis of the current state of academia, *Unassailable Ideas* highlights an environment in higher education that forecloses entire lines of research, entire discussions, and entire ways of conducting classroom teaching. Despite decades of activism, resistance, and education, both feminists and gender rebels continue to experience personal, political, institutional, and cultural resistance to rights, recognition, and respect. In the face of these inequalities and disparities, *Transgressing Feminist Theory and Discourse* seeks to engage with, and disrupt the long-standing debates, unquestioned conceptual formations, and taboo topics in contemporary feminist studies. The first half of the book challenges key concepts and theories related to feminist scholarship by advocating new approaches for theorizing interdisciplinarity, intersectionality, critical race theory, trans studies, and genetics. The second half of the book offers feminist critiques or explorations of timely topics such as the 2017 Women's March and Donald Trump's election as well as non-Western perspectives of family and the absence of women's perspectives in healthcare. Contributors comprise of leading scholars and activists from disciplines including gender and sexuality studies, African American studies, communication studies, sociology, political science, and media. *Transgressing Feminist Theory and Discourse* is a compelling examination of some of the most high-profile feminist issues today. It hopes to infuse future and current debates and conversations around feminism and feminist theory with intersectional, imaginative, provocative, and evocative ideas, inspiring bold cross-fertilizations of concepts, principles, and practices. *Philosophy of Race: An Introduction* provides plainly written access to a new subfield that has been in the background of philosophy since Plato and Aristotle. Part I provides an overview of ideas of race and ethnicity in the philosophical canon, egalitarian traditions, race in biology, and race in American and Continental Philosophy. Part II addresses race as it operates in life through colonialism and development, social constructions and institutions, racism, political philosophy, and gender. This book constructs an outline that will serve as a resource for students, nonspecialists, and general readers in thinking, talking, and writing about philosophy of race. *The Handbook of Research on Identity Theory in Marketing* features cutting-edge research that delves into the origins and consequences of identity loyalty and organizes these insights around five basic identity principles that span nearly every consumer marketing subdomain. This Handbook is a comprehensive and state of the art treatment of identity and marketing: An authoritative and practical guide for academics, brand managers, marketers, public policy advocates and even intellectually curious consumers. Does the black struggle for civil rights make common cause with the movement to foster queer community, protest anti-queer violence or discrimination, and demand respect for the rights

and sensibilities of queer people? Confronting this emotionally charged question, Ladelle McWhorter reveals how a carefully structured campaign against abnormality in the late 19th and early 20th centuries encouraged white Americans to purge society of so-called biological contaminants, people who were poor, disabled, black, or queer. Building on a legacy of savage hate crimes—such as the killings of Matthew Shepard and James Byrd—McWhorter shows that racism, sexual oppression, and discrimination against the disabled, the feeble, and the poor are all aspects of the same societal distemper, and that when the civil rights of one group are challenged, so are the rights of all. How the transgender experience opens up new possibilities for thinking about gender and race In the summer of 2015, shortly after Caitlyn Jenner came out as transgender, the NAACP official and political activist Rachel Dolezal was "outed" by her parents as white, touching off a heated debate in the media about the fluidity of gender and race. If Jenner could legitimately identify as a woman, could Dolezal legitimately identify as black? Taking the controversial pairing of "transgender" and "transracial" as his starting point, Rogers Brubaker shows how gender and race, long understood as stable, inborn, and unambiguous, have in the past few decades opened up—in different ways and to different degrees—to the forces of change and choice. Transgender identities have moved from the margins to the mainstream with dizzying speed, and ethnoracial boundaries have blurred. Paradoxically, while sex has a much deeper biological basis than race, choosing or changing one's sex or gender is more widely accepted than choosing or changing one's race. Yet while few accepted Dolezal's claim to be black, racial identities are becoming more fluid as ancestry—increasingly understood as mixed—loses its authority over identity, and as race and ethnicity, like gender, come to be understood as something we do, not just something we have. By rethinking race and ethnicity through the multifaceted lens of the transgender experience—encompassing not just a movement from one category to another but positions between and beyond existing categories—Brubaker underscores the malleability, contingency, and arbitrariness of racial categories. At a critical time when gender and race are being reimagined and reconstructed, *Trans* explores fruitful new paths for thinking about identity. Susannah Ticciati explores Augustine's scriptural interpretation, as well as the ways in which he understands the character of signs in theory. The book explores Augustine's scriptural world via three case studies, each geared towards the healing of a particular modern opposition. The three, interrelated, modern oppositions are rooted in an insufficient semiotic worldview. Ticciati argues they contribute to the alienation of the modern reader not only from Augustine's scriptural world, but more generally from the scriptural world as habitation. Examining the ways in which the therapy for our modern day semiotic illiteracy can be found in the 5th-6th-century Augustine, Ticciati brings close readings of Augustine to bear on significant concerns of our own day: specifically, our modern alienations from the rich world of Scripture. New York Times Bestseller • Finalist for the 2018 National Book Critics Circle Award in Nonfiction • A New York Times Notable Book • Bloomberg Best Book of 2018 "Their distinctive contribution to the higher-education debate is to meet safetyism on its own, psychological turf . . . Lukianoff and Haidt tell us that safetyism undermines the freedom of inquiry and speech that are indispensable to universities." —Jonathan Marks, Commentary "The remedies the book outlines should be considered on college campuses, among parents of current and future students, and by anyone longing for a more sane society." —Pittsburgh Post-Gazette

Something has been going wrong on many college campuses in the last few years. Speakers are shouted down. Students and professors say they are walking on eggshells and are afraid to speak honestly. Rates of anxiety, depression, and suicide are rising—on campus as well as nationally. How did this happen? First Amendment expert Greg Lukianoff and social psychologist Jonathan Haidt show how the new problems on campus have their origins in three terrible ideas that have become increasingly woven into American childhood and education: What doesn't kill you makes you weaker; always trust your feelings; and life is a battle between good people and evil people. These three Great Untruths contradict basic psychological principles about well-being and ancient wisdom from many cultures. Embracing these untruths—and the resulting culture of safetyism—interferes with young people's social, emotional, and intellectual development. It makes it harder for them to become autonomous adults who are able to navigate the bumpy road of life. Lukianoff and Haidt investigate the many social trends that have intersected to promote the spread of these untruths. They explore changes in childhood such as the rise of fearful parenting, the decline of unsupervised, child-directed play, and the new world of social media that has engulfed teenagers in the last decade. They examine changes on campus, including the corporatization of universities and the emergence of new ideas about identity and justice. They situate the conflicts on campus within the context of America's rapidly rising political polarization and dysfunction. This is a book for anyone who is confused by what is happening on college campuses today, or has children, or is concerned about the growing inability of Americans to live, work, and cooperate across party lines. With the election of Barack Obama, the idea that American society had become postracial—that is, race was no longer a main factor in influencing and structuring people's lives—took hold in public consciousness, increasingly accepted by many. The contributors to *Racism Postrace* examine the concept of postrace and its powerful history and allure, showing how proclamations of a postracial society further normalize racism and obscure structural antiblackness. They trace expressions of postrace over and through a wide variety of cultural texts, events, and people, from sports (LeBron James's move to Miami), music (Pharrell Williams's "Happy"), and television (*The Voice* and HGTV) to public policy debates, academic disputes, and technology industries. Outlining how postrace ideologies confound struggles for racial justice and equality, the contributors open up new critical avenues for understanding the powerful cultural, discursive, and material conditions that render postrace the racial project of our time. A lot of people have made up their minds about Rachel Dolezal. But none of them know her real story. In June 2015, the media "outed" Rachel Dolezal as a white woman who had knowingly been "passing" as Black. When asked if she were African American during an interview about the hate crimes directed at her and her family, she hesitated before ending the interview and walking away. Some interpreted her reluctance to respond and hasty departure as dishonesty, while others assumed she lacked a reasonable explanation for the almost unprecedented way she identified herself. What determines your race? Is it your DNA? The community in which you were raised? The way others see you or the way you see yourself? With *In Full Color*, Rachel Dolezal describes the path that led her from being a child of white evangelical parents to an NAACP chapter president and respected educator and activist who identifies as Black. Along the way, she recounts the deep emotional bond she formed with her four adopted Black siblings, the sense of belonging she felt while living in Black communities in Jackson, Mississippi, and Washington, DC, and the experiences that have shaped her along the way. Her story is nuanced and complex, and in the process of telling it, she forces us to consider race in an entirely new light—not as a biological imperative, but as a function of the experiences we have, the culture we embrace, and, ultimately, the identity we choose. We in the West are living in the midst of a deadly culture war. Our rival worldviews clash with increasing violence in the public arena, culminating in deadly riots and mass shootings. A fragmented left now confronts a resurgent and reactionary right, which threatens to reverse decades of social progress. Commentators have declared that we live in a "post-truth world," one dominated by online trolls and conspiracy theorists. How did we arrive at this cultural crisis? How do we respond? This book speaks to this critical moment through a new reading of the thought of Alasdair MacIntyre. Over thirty years ago, MacIntyre predicted the coming of a new Dark Ages. The premise of this book is that MacIntyre was right all along. It presents his diagnosis of our cultural crisis. It further presents his answer to the challenge of public reasoning without

foundations. Pitting him against John Rawls, Jürgen Habermas, and Chantal Mouffe, *Ethics Under Capital* argues that MacIntyre offers hope for a critical democratic politics in the face of the culture wars. In *Hidden Agender*, Gerard Casey develops a timely and provocative defence of free speech and toleration against the transgenderist ideology that has infiltrated so much of the media, the political establishment and the law. Opposing ideas, not individuals, *Hidden Agender* provides a compelling critique of the transgender ideologists and trans activists, and the new reactionary form of legal intolerance of our right to free thought and free speech. As a libertarian, Casey believes that we should be free to say and do whatever we wish provided that, in so doing, we do not perpetrate violence, or threaten to perpetrate violence, against the person or property of another. The fundamental objection is rather to individuals being forced, on pain of legal or social sanctions, to believe (or to pretend to believe) what to them is patently false, namely, that a man can become a woman or a woman a man, and to be legally obliged to treat those who claim to have transitioned from one sex to another as if they really had managed to do so. Drawing on extensive research, both scientific and anecdotal, *Hidden Agender* is a robust defence of free speech and tolerance against the combined forces of prejudice, wokeness and legal intimidation. While being rooted in the academic discourse, *The Things That Really Matter* comprehensively explores the most fundamental aspects of human life in an accessible, non-technical language, adding fresh perspectives and new arguments and considerations that are designed to stimulate further debate and, in some cases, a deliberate redirection of research interests in the respective areas. It features a series of conversations about the things in our life that we all, in one way or another, wrestle with if we are at all concerned about what kind of world we live in and what our role in it is: things like birth, age, and death, good and evil, the meaning of life, the nature of the self and the role the body plays for our identity, our gendered existence, love and faith, free will, beauty, and our experience of the sacred. Situating abstract ideas in concrete experience, *The Things That Really Matter* encourages the reader to participate in an open-ended dialogue involving a variety of thinkers with different backgrounds and orientations. Lively and accessible, it shows thinking as an open-ended process and a collaborative endeavour that benefits from talking to each other rather than against each other, featuring real conversations, where ideas are explored, tested, changed, and occasionally dropped. It is thinking in motion, personal yet universal. Is Latinidad a racial or an ethnic designation? Both? Neither? The increasing recognition of diversity within Latinx communities and the well-known story of shifting census designations have cast doubt on the idea that Latinidad is a race, akin to white or Black. And the mainstream media constantly cover the “browning” of the United States, as though the racial character of Latinidad were self-evident. Many scholars have argued that the uncertainty surrounding Latinidad is emancipatory: by queering race—by upsetting assumptions about categories of human difference—Latinidad destabilizes the architecture of oppression. But Laura Grappo is less sanguine. She draws on case studies including the San Antonio Four (Latinas who were wrongfully accused of child sex abuse); the football star Aaron Hernandez’s incarceration and suicide; Lorena Bobbitt, the headline-grabbing Ecuadorian domestic-abuse survivor; and controversies over the racial identities of public Latinx figures to show how media institutions and state authorities deploy the ambiguities of Latinidad in ways that mystify the sources of Latinx political and economic disadvantage. With Latinidad always in a state of flux, it is all too easy for the powerful to conjure whatever phantoms serve their interests. The historic uprising in the wake of the murder of George Floyd transformed the way Americans and the world think about race and policing. Why did it achieve so little in the way of substantive reforms? *After Black Lives Matter* argues that the failure to leave an institutional residue was not simply due to the mercurial and reactive character of the protests. Rather, the core of the movement itself failed to locate the central racial injustice that underpins the crisis of policing: socio-economic inequality. For Johnson, the anti-capitalist and downwardly redistributive politics expressed by different Black Lives Matter elements has too often been drowned out in the flood of black wealth creation, fetishism of Jim Crow black entrepreneurship, corporate diversity initiatives, and a quixotic reparations demand. None of these political tendencies addresses the fundamental problem underlying mass incarceration. That is the turn from welfare to domestic warfare as the chief means of regulating the excluded and oppressed. Johnson sees the way forward in building popular democratic power to advance public works and public goods. Rather than abolishing police, *After Black Lives Matter* argues for abolishing the conditions of alienation and exploitation contemporary policing exists to manage. The schizoanalytic method and the lines of flight that it has inspired align with contemporary feminist concerns and practices in productive and revealing ways in this ground-breaking collection. To address the relevance of schizoanalysis for contemporary developments in new materialism, affect theory, transnational feminism, political ontology, feminist critiques of globalization and capitalism, feminist pedagogy, and ethics, the overarching questions explored are: What can schizoanalysis do for feminist theory? What would a feminist schizoanalysis look like? Is it possible to perform a schizoanalysis of feminism? How do schizoanalytic-feminist alliances create new ways of understanding the future, sexuality and bodily transformation, political resistance, new subjectivities, and ethical relationships? Highlighting the strength, richness, and diversity of feminist perspectives this collection shows how issues of re-conceiving desire, theorizing embodiment and materiality, interrogating the status of sexuality and difference, decentring feminist practice to be inclusive of transnational and de-colonial concerns, critiques of binary logic and gender, transversal politics, and the need for new political visions in light of advanced capitalism are all enhanced by this alliance. Writing a new page in the surprisingly long history of literary deceit, *Impostors* examines a series of literary hoaxes, deceptions that involved flagrant acts of cultural appropriation. This book looks at authors who posed as people they were not, in order to claim a different ethnic, class, or other identity. These writers were, in other words, literary usurpers and appropriators who trafficked in what Christopher L. Miller terms the “intercultural hoax.” In the United States, such hoaxes are familiar. Forrest Carter’s *The Education of Little Tree* and JT LeRoy’s *Sarah* are two infamous examples. Miller’s contribution is to study hoaxes beyond our borders, employing a comparative framework and bringing French and African identity hoaxes into dialogue with some of their better-known American counterparts. In France, multiculturalism is generally eschewed in favor of universalism, and there should thus be no identities (in the American sense) to steal. However, as Miller demonstrates, this too is a ruse: French universalism can only go so far and do so much. There is plenty of otherness to appropriate. This French and Francophone tradition of imposture has never received the study it deserves. Taking a novel approach to this understudied tradition, *Impostors* examines hoaxes in both countries, finding similar practices of deception and questions of harm. Bob looks at how political forces use rights as rallying cries: naturalizing novel claims as rights inherent in humanity, absolutizing them as trumps over rival interests or community concerns, universalizing them as transcultural and transhistorical, and depoliticizing them as concepts beyond debate. He shows how powerful proponents employ rights as camouflage to cover ulterior motives, as crowbars to break rival coalitions, as blockades to suppress subordinate groups, as spears to puncture discrete policies, and as dynamite to explode whole societies. And he demonstrates how the targets of rights campaigns repulse such assaults, using their own rights-like weapons: denying the abuses they are accused of, constructing rival rights to protect themselves, portraying themselves as victims rather than violators, and repudiating authoritative decisions against them. In this study of racial passing literature, Julia S. Charles highlights how mixed-race subjects invent cultural spaces for themselves—a place she terms that middle world—and how they, through various performance strategies, make meaning in the interstices between the Black and white worlds. Focusing on the construction and performance of racial identity in works by writers from the antebellum period through Reconstruction, Charles creates a new discourse around racial passing to analyze mixed-race characters’ social objectives when crossing into other racialized spaces. To illustrate how this middle world and its attendant performativity

still resonates in the present day, Charles connects contemporary figures, television, and film—including Rachel Dolezal and her Black-passing controversy, the FX show *Atlanta*, and the musical *Show Boat*—to a range of nineteenth- and early twentieth-century literary texts. Charles's work offers a nuanced approach to African American passing literature and examines how mixed-race performers articulated their sense of selfhood and communal belonging. Using real-life examples, this book asks readers to reflect on how we—as an academic community—think and talk about race and racial identity in twenty-first-century America. One of these examples, Rachel Dolezal, provides a springboard for an examination of the state of our discourse around changeable racial identity and the potential for “transracialism.” An analysis of how we are theorizing transracial identity (as opposed to an argument for/against it), this study detects some omissions and problems that are becoming evident as we establish transracial theory and suggests ways to further develop our thinking and avoid missteps. Intended for academics and thinkers familiar with conversations about identity and/or race, *Rethinking Rachel Dolezal and Transracial Theory* helps shape the theorization of “transracialism” in its formative stages. Provocative essays on real-world ethical questions from the world's most influential philosopher Peter Singer is often described as the world's most influential philosopher. He is also one of its most controversial. The author of important books such as *Animal Liberation*, *Practical Ethics*, *Rethinking Life and Death*, and *The Life You Can Save*, he helped launch the animal rights and effective altruism movements and contributed to the development of bioethics. Now, in *Ethics in the Real World*, Singer shows that he is also a master at dissecting important current events in a few hundred words. In this book of brief essays, he applies his controversial ways of thinking to issues like climate change, extreme poverty, animals, abortion, euthanasia, human genetic selection, sports doping, the sale of kidneys, the ethics of high-priced art, and ways of increasing happiness. Singer asks whether chimpanzees are people, smoking should be outlawed, or consensual sex between adult siblings should be decriminalized, and he reiterates his case against the idea that all human life is sacred, applying his arguments to some recent cases in the news. In addition, he explores, in an easily accessible form, some of the deepest philosophical questions, such as whether anything really matters and what is the value of the pale blue dot that is our planet. The collection also includes some more personal reflections, like Singer's thoughts on one of his favorite activities, surfing, and an unusual suggestion for starting a family conversation over a holiday feast. Provocative and original, these essays will challenge—and possibly change—your beliefs about a wide range of real-world ethical questions. This book brings together a large and diverse collection of philosophical papers addressing a wide variety of public policy issues. Topics covered range from long-standing subjects of debate such as abortion, punishment, and freedom of expression, to more recent controversies such as those over gene editing, military drones, and statues honoring Confederate soldiers. Part I focuses on the criminal justice system, including issues that arise before, during, and after criminal trials. Part II covers matters of national defense and sovereignty, including chapters on military ethics, terrorism, and immigration. Part III, which explores political participation, manipulation, and standing, includes discussions of issues involving voting rights, the use of nudges, and claims of equal status. Part IV covers a variety of issues involving freedom of speech and expression. Part V deals with questions of justice and inequality. Part VI considers topics involving bioethics and biotechnology. Part VII is devoted to beginning of life issues, such as cloning and surrogacy, and end of life issues, such as assisted suicide and organ procurement. Part VIII navigates emerging environmental issues, including treatments of the urban environment and extraterrestrial environments. Offers a complete empirical account of US government programs, policies, and interventions outside the United States on behalf of the human rights of LGBTQ people. Around the world, lesbian, gay, bisexual, transgender, and queer people continue to be threatened, attacked, arrested, tortured, and sometimes executed just for being sexual or gender minorities. Since the final months of the Clinton administration, agencies and officials of the US government have been engaging in programs and projects whose stated purposes are to serve goals of justice and equity for LGBTQ people outside the United States. *Because We Are Human* gives readers an inside look at US sexual orientation and gender identity (SOGI) human rights assistance programs. Cynthia Burack explores settings where indigenous and transnational human rights advocates meet to fund and strategize SOGI human rights movements. This book also examines key arguments against these programs, policies, and interventions that originate on both the conservative right and the progressive academic left. Burack ultimately recommends support for a US commitment to SOGI human rights and programs that serve the needs of LGBTQ people. “Thorough and thought-provoking In *Because We Are Human*, Cynthia Burack's insights help to shape a smart, comprehensive picture of US involvement in the global fight for LGBTQ rights.” — Foreword Reviews One of the most pressing issues facing the evangelical church today involves dramatic shifts in our culture's perceptions regarding human sexuality. While homosexuality and same-sex marriage have been at the forefront, there is a new cultural awareness of sexual diversity and gender dysphoria. The transgender phenomenon has become a high-profile battleground issue in the culture wars. This book offers a full-scale dialogue on transgender identities from across the Christian theological spectrum. It brings together contributors with expertise and platforms in the study of transgender identities to articulate and defend differing perspectives on this contested topic. After an introductory chapter surveys key historical moments and current issues, four views are presented by Owen Strachan, Mark A. Yarhouse and Julia Sadusky, Megan K. DeFranza, and Justin Sabia-Tanis. The authors respond to one another's views in a respectful manner, modeling thoughtful dialogue around a controversial theological issue. The book helps readers understand the spectrum of views among Christians and enables Christian communities to establish a context where conversations can safely be held. This international and multidisciplinary volume focuses on the male body and constructions of gender in a variety of cultural productions and formats. Locating the subject matter in relevant theoretical fields, it looks at representations of male bodies in various contexts through paranoid and reparative lenses. Organized into four major sections, the contributions assembled in this book feature engaging readings of non/conforming bodies, fashionable bodies, passing bodies, and pioneering bodies that to different degrees foreground their critical and creative potentials. In its full scope, the book acknowledges the plurality of gendered experiences and the diversity of male bodies. *The Male Body in Representation: Returning to Matter* adds to Cultural Studies scholarship interested in the body and gender in general and contributes to the fields of Masculinity and Body Studies in particular. Carmen Dext is an assistant professor in American Studies at the University of Regensburg, Germany, where she is currently working on her second book project in the fields of Performance Studies, Age Studies, and Body Studies. Silvia Gerlsbeck is a research associate in English Literature and Culture at Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany. Her dissertation examines negotiations of authorship and masculinity in Caribbean British literature. Open inquiry and engagement with a diverse range of views are long-cherished and central tenets of higher education and are pivotal to innovation and knowledge creation. Yet, free inquiry on American campuses is hampered by a climate that constrains teaching, research, and overall discourse. In *Unassailable Ideas*, Ilana Redstone and John Villasenor examine the dominant belief system on American campuses, its uncompromising enforcement through social media, and the consequences for higher education. They argue that two trends in particular--the emergent role of social media in limiting academic research and knowledge discovery and a campus culture increasingly intolerant to diverse views and open inquiry--are fundamentally reshaping higher education. Redstone and Villasenor further identify and explain how three well-intentioned unwritten rules regarding identity define the current campus climate. They present myriad case studies illustrating the resulting impact on education, knowledge creation--and, increasingly the world beyond campus. They also provide a set of recommendations to build a new campus climate that would be more tolerant toward diverse perspectives and open

inquiry. An insightful analysis of the current state of academia, *Unassailable Ideas* highlights an environment in higher education that forecloses entire lines of research, entire discussions, and entire ways of conducting classroom teaching. Following the deaths of Trayvon Martin and other black youths in recent years, students on campuses across America have joined professors and activists in calling for justice and increased awareness that Black Lives Matter. In this second edition of his trenchant and provocative book, George Yancy offers students the theoretical framework they crave for understanding the violence perpetrated against the Black body. Drawing from the lives of Ossie Davis, Frantz Fanon, Malcolm X, and W. E. B. Du Bois, as well as his own experience, and fully updated to account for what has transpired since the rise of the Black Lives Matter movement, Yancy provides an invaluable resource for students and teachers of courses in African American Studies, African American History, Philosophy of Race, and anyone else who wishes to examine what it means to be Black in America. "What every leader needs to know about dignity and how to create a culture in which everyone thrives. This landmark book from an expert in dignity studies explores the essential but under-recognized role of dignity as part of good leadership. Extending the reach of her award-winning book *Dignity: Its Essential Role in Resolving Conflict*, Donna Hicks now contributes a specific, practical guide to achieving a culture of dignity. Most people know very little about dignity, the author has found, and when leaders fail to respect the dignity of others, conflict and distrust ensue. She highlights three components of leading with dignity: what one must know in order to honor dignity and avoid violating it; what one must do to lead with dignity; and how one can create a culture of dignity in any organization, whether corporate, religious, governmental, healthcare, or beyond. Brimming with key research findings, real-life case studies, and workable recommendations, this book fills an important gap in our understanding of how best to be together in a conflict-ridden world."-- Lana and Lilly Wachowski have redefined the technically and topically possible while joyfully defying audience expectations. Visionary films like *The Matrix* trilogy and *Cloud Atlas* have made them the world's most influential transgender media producers, and their coming out retroactively put trans\* aesthetics at the very center of popular American culture. Cael M. Keegan views the Wachowskis' films as an approach to trans\* experience that maps a transgender journey and the promise we might learn "to sense beyond the limits of the given world." Keegan reveals how the filmmakers take up the relationship between identity and coding (be it computers or genes), inheritance and belonging, and how transgender becoming connects to a utopian vision of a post-racial order. Along the way, he theorizes a trans\* aesthetic that explores the plasticity of cinema to create new social worlds, new temporalities, and new sensory inputs and outputs. Film comes to disrupt, rearrange, and evolve the cinematic exchange with the senses in the same manner that trans\* disrupts, rearranges, and evolves discrete genders and sexes. **THE SUNDAY TIMES BESTSELLER** and a *Times*, *Spectator* and *Observer* Book of the Year 2021 'In the first decade of this century, it was unthinkable that a gender-critical book could even be published by a prominent publishing house, let alone become a bestseller.' Louise Perry, *New Statesman* 'Thank goodness for Helen Joyce.' Christina Patterson, *Sunday Times* 'Reasonable, methodical, sane, and utterly unintimidated by extremist orthodoxy, *Trans* is a riveting read.' Lionel Shriver 'A tour de force.' *Evening Standard* Biological sex is no longer accepted as a basic fact of life. It is forbidden to admit that female people sometimes need protection and privacy from male ones. In an analysis that is at once expert, sympathetic and urgent, Helen Joyce offers an antidote to the chaos and cancelling.
