Posthumanism and Higher

Education *Higher Education in the Era of the Fourth Industrial Revolution* **The Rise of Women**

Leading at a Higher Level Jan 18 2023 This volume contains sections on, setting your sights on the right target and vision, treating your customers right, treating your people right, and having the right kind of leadership.

Posthumanism and Higher Education Dec 13 2019 This book explores ways in which posthumanist and new materialist thinking can be put to work in order to reimagine higher education pedagogy, practice and research. The editors and contributors illuminate how we can move the thinking and doing of higher education out of the humanist cul-de-sac of individualism, binarism and colonialism and away from anthropocentric modes of performative rationality. Based in a reconceptualization of ontology, epistemology and ethics which shifts attention away from the human towards

the vitality of matter and the nonhuman, posthumanist and new materialist approaches pose a profound challenge to higher education. In engaging with the theoretical twists and turns of various posthumanisms and new materialisms, this book offers new, experimental and creative ways for academics, practitioners and researchers to do higher education differently. This groundbreaking edited collection will appeal to students and scholars of posthumanism and new materialism, as well as those looking to conceptualize higher education as other than performative practice. *Higher Education in the Era of the Fourth Industrial Revolution* Nov 11 2019 This open access collection examines how higher education responds to the demands of the automation economy and the fourth industrial revolution. Considering significant trends in how people are learning, coupled with the ways in which different higher education institutions and education

stakeholders are implementing adaptations, it looks at new programs and technological advances that are changing how and why we teach and learn. The book addresses trends in liberal arts integration of STEM innovations, the changing role of libraries in the digital age, global trends in youth mobility, and the development of lifelong learning programs. This is coupled with case study assessments of the various ways China, Singapore, South Africa and Costa Rica are preparing their populations for significant shifts in labour market demands – shifts that are already underway. Offering examples of new frameworks in which collaboration between government, industry, and higher education institutions can prevent lagging behind in this fast changing environment, this book is a key read for anyone wanting to understand how the world should respond to the radical technological shifts underway on the frontline of higher education.

Supporting Course and

Programme Leaders in Higher Education Apr 28 2021

Offering research- and evidence-based approaches that explore the essential components of programme leadership in higher education, this book is designed to define, develop and support the programme leadership role and all those who undertake it. The book is split into three parts, taking into account the three different lenses through which programme leaders and their professional practice and relationships are generally viewed: the institution, the individual and the programme team. Chapters and case studies address key elements crucial to the holistic development of programme leadership and programme leaders. These include: Understanding and developing programme leadership in context Developing organisational structures and processes so programme leaders can thrive Growing programme leaders' educational leadership, team working and communication

Crucial reading for programme leaders, as well as academic and educational developers and leaders working across faculties and whole institutions, this text includes contributions from teaching- and research-focused higher education institutions, as well as established and modern college- and university-based providers in both the northern and southern hemispheres.

The Pedagogy of Compassion at the Heart of Higher Education Sep 14 2022 This book offers a moral rather than instrumental notion of university education whilst locating the university within society. It reflects a balancing of the instrumentalization of higher education as a mode of employment training and enhances the notion of the students' well-being being at the core of the university mission. Compassion is examined in this volume as a weaving of diverse cultures and beliefs into a way of recognizing that diversity through a common good offers a way of preparing students

and staff for a complex and anxious world. This book provides theoretical and practical discussions of compassion in higher education, it draws contributors from around the world and offers illustrations of compassion in action through a number of international cases studies..

Vibrate Higher Jun 18 2020
LONGLISTED FOR THE 2021
BROOKLYN PUBLIC LIBRARY
LITERARY PRIZE From one of the most lyrically gifted, socially conscious rappers of the past twenty years, Vibrate Higher is a firsthand account of hip-hop as a political force Before Talib Kweli became a world-renowned hip-hop artist, he was a Brooklyn kid who liked to cut class, spit rhymes, and wander the streets of Greenwich Village with a motley crew of artists, rappers, and DJs who found hip-hop more inspiring than their textbooks (much to the chagrin of the educator parents who had given their son an Afrocentric name in hope of securing for him a more

traditional sense of pride and purpose). Kweli's was the first generation to grow up with hip-hop as established culture—a genre of music that has expanded to include its own pantheon of heroes, rich history and politics, and distinct worldview. Eventually, childhood friendships turned into collaborations, and Kweli gained notoriety as a rapper in his own right. From collaborating with some of hip-hop's greatest—including Mos Def, Common, Kanye West, Pharrell Williams, and Kendrick Lamar—to selling books out of the oldest African-American bookstore in Brooklyn, ultimately leaving his record label, and taking control of his own recording career, Kweli tells the winding, always compelling story of the people and events that shaped his own life as well as the culture of hip-hop that informs American culture at large. *Vibrate Higher* illuminates Talib Kweli's upbringing and artistic success, but so too does it give life to hip-hop as a political force—one that galvanized the

Movement for Black Lives and serves a continual channel for resistance against the rising tide of white nationalism. [Creating Inclusive Learning Opportunities in Higher Education](#) Feb 13 2020 In *Creating Inclusive Learning Opportunities in Higher Education*, Sheryl Burgstahler provides a practical, step-by-step guide for putting the principles of universal design into action. The book offers multiple ways to access, engage with, and transform the higher education environment: making physical spaces welcoming to students of all abilities; creating digital learning and assistive technology programs that meet the needs of all users; developing universal design in higher education (UDHE) syllabi, assessments and teaching practices that minimize the need for academic accommodations; and institutionalizing universal design supports and services. A follow-up to *Universal Design in Higher Education*, Burgstahler's new book will be

a valuable resource for leaders, faculty, and administrators who are interested in acquiring the tools needed to create barrier-free learning environments. Filled with applications, examples, recommendations, and above all, a framework in which to conceptualize UDHE, this volume will help educators meet the design needs of all students and honor the principles of diversity and inclusivity.

Vibrate Higher Daily May 30 2021 Tap into your inner power with this mind-opening guide to vibrational-based living from Instagram star and self-help pioneer behind the internet community Vibrate Higher Daily. "There is another way of being in the world. There is a better way to exist, rise, move beyond, and take our power back." Too often we feel pulled down by circumstances or the negativity of others. We think we have no control over the things that are hurting us and holding us back from realizing our truest selves. But according to Lalah Delia, we have more power within us

than we know: listen to your unique inner voice and trust your instincts. By doing so, you're already experiencing the transformative power of vibrational-based living. Vibrating higher daily is about making intentional day-to-day choices that lift us out of mindsets, habits, and lifestyles that don't serve us and into ones that do. This book is an invitation to engage with everything that feeds our soul and raises our vibration, and to simultaneously let go of the things bringing our energy down. Through poetry, mantras, and affirmations, Lalah Delia empowers us to live with higher potential and quality of being. Vibrate Higher Daily is a manifesto unlike any other for stepping into our power.

The Lost Soul of Higher Education Jan 26 2021 The professor and historian delivers a major critique of how political and financial attacks on the academy are undermining our system of higher education. Making a provocative foray into the

public debates over higher education, acclaimed historian Ellen Schrecker argues that the American university is under attack from two fronts. On the one hand, outside pressure groups have staged massive challenges to academic freedom, beginning in the 1960s with attacks on faculty who opposed the Vietnam War, and resurfacing more recently with well-funded campaigns against Middle Eastern Studies scholars. Connecting these dots, Schrecker reveals a distinct pattern of efforts to undermine the legitimacy of any scholarly study that threatens the status quo. At the same time, Schrecker deftly chronicles the erosion of university budgets and the encroachment of private-sector influence into academic life. From the dwindling numbers of full-time faculty to the collapse of library budgets, *The Lost Soul of Higher Education* depicts a system increasingly beholden to corporate America and starved of the resources it needs to educate the new

generation of citizens. A sharp riposte to the conservative critics of the academy by the leading historian of the McCarthy-era witch hunts, *The Lost Soul of Higher Education*, reveals a system in peril—and defends the vital role of higher education in our democracy.

Developing the Higher Education Curriculum Feb 24 2021 A complementary volume to Dilly Fung's *A Connected Curriculum for Higher Education* (2017), this book explores 'research-based education' as applied in practice within the higher education sector. A collection of 15 chapters followed by illustrative vignettes, it showcases approaches to engaging students actively with research and enquiry across disciplines. It begins with one institution's creative approach to research-based education - UCL's *Connected Curriculum*, a conceptual framework for integrating research-based

education into all taught programmes of study - and branches out to show how aspects of the framework can apply to practice across a variety of institutions in a range of national settings. The 15 chapters are provided by a diverse range of authors who all explore research-based education in their own way. Some chapters are firmly based in a subject-discipline - including art history, biochemistry, education, engineering, fashion and design, healthcare, and veterinary sciences - while others reach across geopolitical regions, such as Australia, Canada, China, England, Scotland and South Africa. The final chapter offers 12 short vignettes of practice to highlight how engaging students with research and enquiry can enrich their learning experiences, preparing them not only for more advanced academic learning, but also for professional roles in complex, rapidly changing social contexts.

Social Media in Higher Education: Case Studies, Reflections and Analysis Mar 16 2020 How does social media affect working life in Higher Education? How are universities harnessing its power to aid student learning? This innovative collection brings together academics and those working in professional services to examine these questions and more. The diverse and expert contributors analyse the many ways social media can be used to enhance teaching and learning, research, professional practice, leadership, networking and career development. The impact of social media is evaluated critically, with an eye both to the benefits and the problems of using these new forms of digital communication. This is the first volume to give such detailed attention to this area of high interest. Its innovative approach extends to its creation, with contributors found via their presence on Twitter. The short and impactful chapters are

accessible while retaining an academic focus through their application of relevant learning theories and educational context. Social Media and Higher Education is essential reading for any professional working in higher education, including lecturers teaching education courses. It is also significant for researchers looking at more recent developments in the field and what it means to work in a modern higher education environment.

The Secret Mar 28 2021 The authors of *Great Leaders Grow* use a fable to lay out what is the secret to great leadership in this internationally bestselling guide. It's a question that everyone in a position of authority—whether in a multinational corporation or a local volunteer group—wonders sooner or later. Here Ken Blanchard, whose books on leadership have sold over twenty million copies, and Mark Miller, who worked his way up from line worker to vice president of Chick-Fil-A, one of the largest

fast-food restaurant chains in the country, uncover the secret that great leaders already know and detail what you need to do to truly inspire and motivate others. The authors get at the heart of what makes a leader successful using a classic business fable. Newly promoted but struggling young executive Debbie Brewster asks her mentor, "What is the secret of great leaders?" His reply—"great leaders serve"—flummoxes her, but over time he reveals the five fundamental ways that leaders succeed through service. Along the way, Debbie learns:

- Why great leaders seem preoccupied with the future
- How people on the team ultimately determine your success or failure
- What three arenas require continuous improvement
- Why true success in leadership has two essential components
- How to knowingly strengthen—or unwittingly destroy—leadership credibility

This new edition includes a leadership self-assessment so readers can measure to what

extent they lead by serving and where they can improve. The authors have also added answers to the most frequently asked questions about how to apply the SERVE model in the real world. As practical as it is uplifting, *The Secret* shares Blanchard and Miller's wisdom about leadership in a form that anyone can easily understand and implement. "You don't have to be older to be a great leader. *The Secret* shows how to lay the foundation for powerful servant leadership early in your career to maximize your impact."

—Claire Diaz-Ortiz, Head of Corporate Innovation and Philanthropy at Twitter, Inc. and author of *Twitter for Good and Hope Runs*

"When you learn *The Secret*, don't keep it to yourself. Share it and use it with your people. It will make a difference in their lives and their performance." —Donald G. Soderquist, former Vice Chairman, Wal-Mart, and founder of the Soderquist Center for Leadership and Ethics, John Brown University

"If you know *The Secret*, both

relationships and results will prosper. It's a perfect move in your life from success to significance.” —Bob Buford, author of *Halftime*

[A Higher Mission](#) Apr 09 2022

In this vital transnational study, Kimberly D. Hill critically analyzes the colonial history of central Africa through the perspective of two African American missionaries: Alonzo Edmiston and Althea Brown Edmiston. The pair met and fell in love while working as a part of the American Presbyterian Congo Mission—an operation which aimed to support the people of the Congo Free State suffering forced labor and brutal abuses under Belgian colonial governance. They discovered a unique kinship amid the country's growing human rights movement and used their familiarity with industrial education, popularized by Booker T. Washington's Tuskegee Institute, as a way to promote Christianity and offer valuable services to local people. From 1902 through 1941, the Edmistons designed

their mission projects to promote community building, to value local resources, and to incorporate the perspectives of the African participants. They focused on childcare, teaching, translation, construction, and farming—ministries that required constant communication with their Kuba neighbors. Hill concludes with an analysis of how the Edmistons' pedagogy influenced government-sponsored industrial schools in the Belgian Congo through the 1950s. *A Higher Mission* illuminates not only the work of African American missionaries—who are often overlooked and understudied—but also the transnational implications of black education in the South. Significantly, Hill also addresses the role of black foreign missionaries in the early civil rights movement, an argument that suggests an underexamined connection between earlier nineteenth-century Pan-Africanisms and activism in the interwar era.

College Disrupted May 10 2022

Cites the growing prevalence of online courses, "unbundled" programs and education that is disconnected from sports and other previously valued university qualities to profile revolutionary changes occurring in higher education today.

Living at a Higher Level of Faith Oct 15 2022 A Christian book detailing a senior pastor's life of faith.

A Brief Tour of Higher Consciousness Apr 16 2020 Anyone interested in the inner reaches of the mind, the greater structure of the cosmos, and the spiritual evolution of humanity will find this book an informed and delightful read. Bentov explains the Kabbalistic principles of number and sound, the meaning of cosmic symbols, and ultimately, shows that the universe and thought are inseparable.

The Rise of Women Oct 11 2019 While powerful gender inequalities remain in American society, women have made substantial gains and now largely surpass men in one

crucial arena: education. Women now outperform men academically at all levels of school, and are more likely to obtain college degrees and enroll in graduate school. What accounts for this enormous reversal in the gender education gap? In *The Rise of Women: The Growing Gender Gap in Education and What It Means for American Schools*, Thomas DiPrete and Claudia Buchmann provide a detailed and accessible account of women's educational advantage and suggest new strategies to improve schooling outcomes for both boys and girls. *The Rise of Women* opens with a masterful overview of the broader societal changes that accompanied the change in gender trends in higher education. The rise of egalitarian gender norms and a growing demand for college-educated workers allowed more women to enroll in colleges and universities nationwide. As this shift occurred, women quickly reversed the historical male advantage in education. By

2010, young women in their mid-twenties surpassed their male counterparts in earning college degrees by more than eight percentage points. The authors, however, reveal an important exception: While women have achieved parity in fields such as medicine and the law, they lag far behind men in engineering and physical science degrees. To explain these trends, *The Rise of Women* charts the performance of boys and girls over the course of their schooling. At each stage in the education process, they consider the gender-specific impact of factors such as families, schools, peers, race and class. Important differences emerge as early as kindergarten, where girls show higher levels of essential learning skills such as persistence and self-control. Girls also derive more intrinsic gratification from performing well on a day-to-day basis, a crucial advantage in the learning process. By contrast, boys must often navigate a conflict between their emerging masculine identity

and a strong attachment to school. Families and peers play a crucial role at this juncture. The authors show the gender gap in educational attainment between children in the same families tends to be lower when the father is present and more highly educated. A strong academic climate, both among friends and at home, also tends to erode stereotypes that disconnect academic prowess and a healthy, masculine identity. Similarly, high schools with strong science curricula reduce the power of gender stereotypes concerning science and technology and encourage girls to major in scientific fields. As the value of a highly skilled workforce continues to grow, *The Rise of Women* argues that understanding the source and extent of the gender gap in higher education is essential to improving our schools and the economy. With its rigorous data and clear recommendations, this volume illuminates new ground for future education policies and research.

Open Education Oct 23 2020

This insightful collection of essays explores the ways in which open education can democratise access to education for all. It is a rich resource that offers both research and case studies to relate the application of open technologies and approaches in education settings around the world. A must-read for practitioners, policy-makers, scholars and students in the field of education.

Communities in Action May 18 2020 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and

decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

A Program For You Oct 03 2021 You can't beat the basics in times of trouble. During the coronavirus pandemic, take a fresh look at the twelve steps, and the Big Book's wisdom for healing and hope. *A Program for You* leads each of us--

newcomer or old-timer--to a deeper understanding of recovery as a way of life. A Program for You clears our way for discovering positive, powerful answers to these questions. In the years since 1939, the Big Book, Alcoholics Anonymous, has guided millions in their search for a design for healthy living free of addictive behaviors. Now, two program old-timers share their years of intensive study of the Big Book, revealing the vitality of its message for those of us reading it today. This celebration of the basic text of Twelve Step recovery breathes new life into the Big Book's timeless wisdom. Thoroughly annotated line and page, written with down-to-earth humor and simplicity, and providing a contemporary context for understanding, A Program for You helps us experience the same path of renewal that Bill W. and the first on hundred AA members did.

Spiritual Influence - Manifesting Leadership at a Higher Level Jun 30 2021 This

book, *Spiritual Influence - Manifesting Leadership at a Higher Level*, is required reading for those desiring to become transformational leaders. If there is any period in history, where our influence is desperately needed, it would be in today's topsy-turvy world! For example, in the first half of 2020, we witnessed the economic devastation of a worldwide Pandemic known as the Coronavirus, and the public viewing on social media of the death of a black man by a white police officer. These two incidents have ravished our economy, inflamed political rhetoric, and polarized citizens by race. What should be the believer's response? How can God's children influence change in times of cultural complexity, social calamity and political perplexity? This book, through its short stories and teachings, introduces "forty-five influencing principles" on how leaders can create godly change in culture.

Neo-nationalism and Universities Aug 21 2020 The rise of neo-nationalism is

having a profound and troubling impact on leading national universities and the societies they serve. This is the first comparative study of how today's right-wing populist movements and authoritarian governments are threatening higher education. Universities have long been at the forefront of both national development and global integration. But the political and policy world in which they operate is undergoing a transition, one that is reflective of a significant change in domestic politics and international relations: a populist turn inward among a key group of nation-states, often led by demagogues, that includes China and Hong Kong, Turkey, Hungary, Russia, Brazil, the United Kingdom, and the United States. In many parts of the world, the COVID-19 pandemic provided an opportunity for populists and autocrats to further consolidate their power. Within right-wing political ecosystems, universities, in effect, offer the proverbial canary in the coal mine—a clear window into the

extent of civil liberties and the political environment and trajectory of nation-states. In *Neo-nationalism and Universities*, John Aubrey Douglass provides the first significant examination of the rise of neo-nationalism and its impact on the missions, activities, behaviors, and productivity of leading national universities. Douglass presents a major comparative exploration of the role of national politics and norms in shaping the role of universities in nation-states—and vice versa. He also explores when universities are societal leaders or followers: When they are agents of social and economic change, or simply agents reinforcing and supporting an existing social and political order. In a series of case studies, Douglass and contributors examine troubling trends that threaten the societal role of universities, including attacks on civil liberties, free speech, and the validity of science; the firing and jailing of academics; anti-immigrant rhetoric; and

restrictions on visas with consequences for the mobility of academic talent. The book also offers recommendations to preserve the autonomy and academic freedom of universities and their constituents. Neo-nationalism and Universities is written for a broad public readership interested and concerned about the rise of nationalist movements, illiberal democracies, and autocratic leaders. Contributors: José Augusto Guilhon Albuquerque, Elizabeth Balbachevsky, Thomas Brunotte, Igor Chirikov, Igor Fedyukin, Karin Fischer, Wilhelm Krull, Brendan O'Malley, Bryan E. Penprase, Marijk van der Wende

A Handbook for Leaders in Higher Education Nov 04 2021
Written to assist those seeking to understand the key global drivers, and an overview of key challenges facing senior leaders and managers today, this book focuses on the complex and highly politicised area of teaching and learning in higher education. Providing

tried and tested tips and techniques for addressing the 'why, what and how' of leadership and management theory and practice, it is firmly grounded in the context of the teaching and learning arena. A Handbook for Leaders in Higher Education: Transforming teaching and learning can be dipped into to provide knowledge and understanding of theory, best practice examples, case study exemplars and reflective practice activity. It is structured in four main parts: A view from the top The leadership and management perspective Engendering a change culture Looking to the future. This handbook is informed by senior leaders and experts with expertise in delivering excellent practice in teaching and learning at international, national and institutional levels. Responding to the need of universities to take the lead in changing cultures and working practices, this book is an essential and forward-looking text for both scholars and practitioners in

the senior teams of higher education institutions.

Higher Education in the Global Age Dec 05 2021

Discussions on globalization now routinely focus on the economic impact of developing countries in Asia, Africa, the Middle East, the former Soviet Union and Latin America. Only twenty-five years ago, many developing countries were largely closed societies. Today, the growing power of “emerging markets” is reordering the geopolitical landscape. On a purchasing power parity basis, emerging economies now constitute half of the world’s economic activity. Financial markets too are seeing growing integration: Asia now accounts for 1/3 of world stock markets, more than double that of just 15 years ago. Given current trajectories, most economists predict that China and India alone will account for half of global output by 2050 (almost a complete return to their positions prior to the Industrial Revolution). How is higher education shaping and being

shaped by these massive tectonic shifts? As education rises as a geopolitical priority, it has converged with discussions on economic policy and a global labor market. As part of the Routledge Studies in Emerging Societies series, this edited collection focuses on the globalization of higher education, particularly the increasing symbiosis between advanced and developing countries. Bringing together senior scholars, journalists, and practitioners from around the world, this collection explores the relatively new and changing higher education landscape.

Helping People Win at Work

Sep 21 2020 Ken Blanchard’s

Leading at a Higher Level

techniques are inspiring

thousands of leaders to build

high-performing organizations that make life better for everyone. Now, in *Helping People Win at Work*, Blanchard and WD-40 Company leader Garry Ridge reveal how WD-40 has used Blanchard's techniques of *Partnering for Performance* with every employee--achieving levels of engagement and commitment that have fortified the bottom line. Ridge introduces WD-40 Company's year-round performance review system, explaining its goals, features, and the cultural changes it requires. Next, he shares his leadership point of view: what he expects of people, what they can expect of him, and where his beliefs about leadership and motivation come from. Finally, Blanchard explains why WD-40 Company's *Partnering for Performance* system works so well--and how to leverage its high-value techniques in your organization. In this book, you'll learn how to:

- Stop building failure into your mentoring of employees
- Set goals using the SMART

approach: specific, motivational, attainable, relevant and trackable

- Help people move through all four stages of mastery
- Create a culture that shares knowledge and encourages nonstop learning

"I'm thrilled that the first book in our *Leading at a Higher Level* series is with Garry Ridge, president of WD-40 Company. For years I've been concerned about how people's performance is evaluated. People are often forced into a normal distribution curve, or even worse, rank ordered. Not only does this not build trust, it also does not hold managers responsible for coaching people and helping them win. The manager's responsibility is focused on sorting people out. When I was a college professor, I always gave my students the final exam at the beginning of the course and spent the rest of the semester helping them answer the questions so that they could get an A. Life is all about getting As, not some stupid normal distribution curve.

Garry Ridge got this, and wow! What a difference it has made in WD-40 Company's performance." --Ken Blanchard "When I first heard Ken talk about giving his final exam at the beginning of the course and then teaching students the answers so they could get an A, it blew me away. Why don't we do that in business? So that's exactly what I did at WD-40 Company when we set up our 'Don't Mark My Paper, Help Me Get an A' performance management system. Has it made a difference? You'd better believe it. Ever since we began the system, our company's annual sales have more than tripled, from \$100 million to more than \$339 million. And we've accomplished this feat while making the company a great place to work." --Garry Ridge

Work Stronger Nov 23 2020
As author and high performance coach Pete Leibman demonstrates in this eye-opening book, stronger hours (not longer hours) are the key to feeling and performing your best over the

long term. **Work Stronger** provides a step-by-step, science-based approach for increasing your energy, decreasing your stress, and taking your performance to a higher level. This book also features practical tips and powerful insights from private interviews that Leibman conducted with more than twenty-five prominent leaders. The group includes Chip Bergh, the president and CEO of Levi Strauss & Co., Dick Costolo, the former CEO of Twitter, and Janine Allis, an investor on Shark Tank. You'll learn how to form stronger habits in four key areas (nutrition, exercise, focus, and renewal) that are highly correlated with greater health, well-being, and performance. You can also get a free assessment of your current habits, and you can download a free copy of **The Work Stronger Workbook** at WorkStronger.com.

“Leading at a Higher Level makes clear that respect and integrity aren’t pleasant-sounding options; they are essential criteria for an organization’s survival. As inspiring as it is instructive, this book belongs in every leader’s core curriculum.”

–WARREN BENNIS, bestselling author of *Leaders and On Becoming a Leader* “If you want to have a great company, you don’t have a choice but to lead at a higher level. When you do that, you excite your people, they take care of your customers, and your cash register goes ca-ching.”

–HORST SCHULZE, Vice President and CEO, The West Paces Hotel Group, LLC; Founding and former President & COO, The Ritz-Carlton Hotel Company, LLC

Higher Education Jul 20 2020
Higher Education: Marijuana at the Mansion is a story of power, politics, and just plain bad manners at the uppermost echelons of university life, as told by a former first lady of three major American universities. It is a candid and

often humorous portrayal of the noholds-barred corporate maneuverings of university leadership-of how sitting university presidents are clandestinely courted and stolen; of faithless relationships among top-level university officials; and of the hypocrisy of those who present themselves and their universities as society's moral beacons. It is also the story of a marriage that could not withstand the pressures of public life and the debilitating illness of Meniere's disease, a little-known but devastating disorder of the inner ear that causes severe vertigo and hearing loss. The author landed in a heap of trouble when the Wall Street Journal reported that she had smoked marijuana in the Vanderbilt University chancellor's residence for relief from "an inner ear ailment," in addition to having caused "stirs on campus with her liberal politics." Clearly, this first lady of a university run by Old South conservatives was destined for a spectacular pratfall from grace. Higher

Education is a bravely told tale from a highly original perspective. It will captivate readers interested in the behind-the-scenes intrigue of American university politics and the current controversy surrounding the legalization of medical marijuana. Constance Bumgarner Gee was the first lady and a faculty member at Vanderbilt University, Brown University, and Ohio State University. She currently lives, writes, and gardens on the bank of the Westport River in southern Massachusetts."

A Higher Loyalty Feb 07 2022
#1 New York Times Bestseller now in paperback with new material The inspiration for The Comey Rule, the Showtime limited series starring Jeff Daniels premiering September 2020 In his book, former FBI director James Comey shares his never-before-told experiences from some of the highest-stakes situations of his career in the past two decades of American government, exploring what good, ethical leadership looks like, and how it drives sound decisions. His

journey provides an unprecedented entry into the corridors of power, and a remarkable lesson in what makes an effective leader. Mr. Comey served as director of the FBI from 2013 to 2017, appointed to the post by President Barack Obama. He previously served as U.S. attorney for the Southern District of New York, and the U.S. deputy attorney general in the administration of President George W. Bush. From prosecuting the Mafia and Martha Stewart to helping change the Bush administration's policies on torture and electronic surveillance, overseeing the Hillary Clinton e-mail investigation as well as ties between the Trump campaign and Russia, Comey has been involved in some of the most consequential cases and policies of recent history.

Universal Design in Higher Education Jun 11 2022
Universal Design in Higher Education looks at the design of physical and technological environments at institutions of

higher education; at issues pertaining to curriculum and instruction; and at the full array of student services. Universal Design in Higher Education is a comprehensive guide for researchers and practitioners on creating fully accessible college and university programs. It is founded upon, and contributes to, theories of universal design in education that have been gaining increasingly wide attention in recent years. As greater numbers of students with disabilities attend postsecondary educational institutions, administrators have expressed increased interest in making their programs accessible to all students. This book provides both theoretical and practical guidance for schools as they work to turn this admirable goal into a reality. It addresses a comprehensive range of topics on universal design for higher education institutions, thus making a crucial contribution to the growing body of literature on special education and universal design.

This book will be of unique value to university and college administrators, and to special education researchers, practitioners, and activists.

The Handbook of International Higher Education Sep 02 2021

Co-published with AIEA

International higher education has evolved, in some respects dramatically, in the decade since publication of the first edition of this handbook. The new issues, trends, practices and priorities of research that evolved over this time have in some instances been transformed by one of the most dynamic and tumultuous periods in the history of international higher education, brought on by the pandemic, a re-emergence of nationalism, and the recognition of the power imbalances between the developed economies and the global south, and racial inequities within and across

borders. This new edition addresses the myriad changes across all aspects of international education, each chapter addressing to the extent possible the reality of the present in which they were written and offering some insights for the future. While updating a number of chapters from the first edition, it also includes a preponderance of new chapters written by contributors representing wider and more diverse backgrounds. In keeping with the first edition, the overall message is that the internationalization of higher education has a vital role to play in a world that is more interconnected than ever before. Recognizing changing economic, geopolitical, climatic, and public health issues, as well as the importance of international and cross-cultural collaboration to address global problems, this handbook offers a comprehensive range of models, data and ideas to stimulate new directions in the conception and practice of

international education. This edition reflects today's concerns around inclusion, diversity and equity, and how international education is being changed by issues such as decolonization, the focus on learning outcomes, the impact of digital tools to enhance access and learning and collaboration such a virtual exchange, competition for resources, risk, new patterns of mobility, and new models such as joint programs and qualifications. As with the first edition, the chapters often intentionally pair scholars and practitioners from different parts of the world, and include text boxes that highlight concrete institutional, national, or regional experiences, providing diverse voices and perspectives from around the world. This comprehensive new edition provides ideas, concepts, theories and practical ideas from around the world for those seeking to enhance the quality of the three core functions of higher education: teaching, research and service to society. It

constitutes an essential resource for everyone involved in the delivery of international education and in determining its future direction. Summary of Contents Maintaining a similar structure of the first edition, this revised Handbook is comprised of four sections. The first section includes five chapters that address national, regional and international frameworks and contexts. The second addresses key aspects of internationalization at the strategy level, covering leadership, institutional strategies, outcomes assessment, resources and financing, risk management, and institutional linkages and partnerships. The third describes core functions of internationalization, addressing intercultural competence development, the internationalization of the curriculum, teaching and learning, virtual exchange, international perspectives on the work of student affairs professionals, student engagement, engaging staff and faculty, the

internationalization of research and finally, and a chapter on serving communities.

A Connected Curriculum for Higher Education Mar 08 2022 Is it possible to bring university research and student education into a more connected, more symbiotic relationship? If so, can we develop programmes of study that enable faculty, students and 'real world' communities to connect in new ways? In this accessible book, Dilly Fung argues that it is not only possible but also potentially transformational to develop new forms of research-based education. Presenting the Connected Curriculum framework already adopted by UCL, she opens windows onto new initiatives related to, for example, research-based education, internationalisation, the global classroom, interdisciplinarity and public engagement. A Connected Curriculum for Higher Education is, however, not just about developing engaging programmes of study. Drawing on the field of philosophical

hermeneutics, Fung argues how the Connected Curriculum framework can help to create spaces for critical dialogue about educational values, both within and across existing research groups, teaching departments and learning communities. Drawing on vignettes of practice from around the world, she argues that developing the synergies between research and education can empower faculty members and students from all backgrounds to contribute to the global common good.

How to Sell at Margins Higher Than Your Competitors Jul 12 2022 Praise for How to Sell at Margins Higher Than Your Competitor "This is the complete book for both new and experienced salespeople and business owners to learn and re-learn the essentials for success. How to Sell at Margins Higher Than Your Competitors emphasizes the pricing strategies and tactics to increase the market share and profits of any organization. This is a book that is as important to presidents as it is

to salespeople." --Bill Scales, CEO, Scales Industrial Technologies, Inc. "As the largest service provider in our industry, we have a significant market advantage. However, we constantly walk the pricing tightrope because, as this book so clearly states, 'business is a game of margins . . . not a game of volume!'" --John K. Harris, CEO, JK Harris & Company, LLC "If you live and die on price, this book could be your only lifeline." --Tom Reilly, CSP, author of Value-Added Selling and Crush Price Objections "How to Sell at Margins Higher Than Your Competitors successfully illustrates profitable sales truths to assist us in selling for maximum return. This book's well-researched, logical, and affirming words validate the simple fact that as a premium company we deserve premium margins. So, while our competitors reduce or match prices out of fear and scarcity, our managers, thanks to this powerful sales tool, can continue quoting and closing with profitable confidence." --

Joe Bracket, President, Power Equipment Company "I learned a long time ago that it is pretty difficult to control what my competitors will do, but we must control what we do--like maintaining margins. This book is a 'wow!' that will help my salesmen crack bad habits. Sales organizations should design their entire training programs around the content in this book." --George C. Giessing, President, Brusco-Rich, Inc. "This energizing book is the 'right stuff' for every sales force. It should be a required study for every executive and sales

professional who seeks to be successful." --David R. Little, Chairman and CEO, DXP Enterprises, Inc.

Playmates and Playboys at a Higher Level Dec 25 2020 Tiré du site Internet Les Presses du réel: "After the infamous split in the Situationist International in 1962, the Danish artist J. V. Martin was unexpectedly put in charge of the group's Scandinavian section. This book is the first presentation of Martin's strange trajectory within the SI, in which he would remain a member until the group's dissolution in 1972."
