When somebody should go to the ebook stores, search creation by shop, shelf by shelf, it is truly problematic. This is why we provide the ebook compilations in this website. It will very ease you to see guide **Leaked 2014 Ial Paper 3 Chemistry** as you such as.

By searching the title, publisher, or authors of guide you essentially want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be all best place within net connections. If you take aim to download and install the Leaked 2014 Ial Paper 3 Chemistry, it is entirely easy then, before currently we extend the join to buy and make bargains to download and install Leaked 2014 Ial Paper 3 Chemistry as a result simple!

Thank you very much for downloading **Leaked 2014 Ial Paper 3 Chemistry**. Maybe you have knowledge that, people have look numerous times for their chosen readings like this Leaked 2014 Ial Paper 3 Chemistry, but end up in infectious downloads.

Rather than reading a good book with a cup of coffee in the afternoon, instead they cope with some infectious virus inside their desktop computer.

Leaked 2014 Ial Paper 3 Chemistry is available in our book collection an online access to it is set as public so you can get it instantly. Our book servers saves in multiple locations, allowing you to get the most less latency time to download any of our books like this one.

Kindly say, the Leaked 2014 Ial Paper 3 Chemistry is universally compatible with any devices to read

Recognizing the showing off ways to acquire this ebook **Leaked 2014 Ial Paper 3 Chemistry** is additionally useful. You have remained in right site to start getting this info. acquire the Leaked 2014 Ial Paper 3 Chemistry associate that we provide here and check out the link.

You could buy guide Leaked 2014 Ial Paper 3 Chemistry or acquire it as soon as feasible. You could speedily download this Leaked 2014 Ial Paper 3 Chemistry after getting deal. So, past you require the ebook swiftly, you can straight acquire it. Its therefore enormously simple and correspondingly fats, isnt it? You have to favor to in this tone

Thank you enormously much for downloading **Leaked 2014 Ial Paper 3 Chemistry**. Maybe you have knowledge that, people have look numerous period for their favorite books when this Leaked 2014 Ial Paper 3 Chemistry, but stop stirring in harmful downloads.

Rather than enjoying a fine ebook with a cup of coffee in the afternoon, instead they juggled with some harmful virus inside their computer. **Leaked 2014 Ial Paper 3 Chemistry** is genial in our digital library an online entry to it is set as public so you can download it instantly. Our digital library saves in compound countries, allowing you to get the most less latency time to download any of our books later this one. Merely said, the Leaked 2014 Ial Paper 3 Chemistry is universally compatible following any devices to read.

TARGET IIFT 2019 - Past (2005 - 2018) + 5 Mock Tests contains the detailed solutions of IIFT Question Papers from 2005 to 2018. The book also contains thoroughly revised & updated 5 Mock tests designed exactly as per the latest pattern of IIFT - 114 questions. The book also contains a General Awareness Question Bank containing 100+ MCQ's involving current issues similar to the ones asked in the actual exam. This book intersects the distributed ledger technology (DLT) community with the international security community. Given the increasing application of blockchain technology in the fields of business and international development, there is a growing body of study on other use cases. For instance, can blockchain have a significant role in preserving and improving international security? This book explores this question in the context of preventing the proliferation of some of the most dangerous materials in the world—items that if not secured can lead to the development of weapons of mass destruction. It considers how blockchain can increase efficiencies in the global trade of nuclear and chemical materials and technology, thereby increasing assurances related to compliance with international nonproliferation and disarmament treaties. The world economy in which we are living poses challenges that lead to a realization that 'more of the same' will be difficult to sustain. This provides an illustration that, in order to create new or modified knowledge practices, strengthen customer relationships and thus positively influence customer satisfaction, organizations must be flexible in configuring (combining) knowledge and knowledge structures in a way that is appropriate for delivering value to the customer. It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services. Thus, unlearning (forgetting) becomes a critical means for organizational success. The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues. This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community's in-depth understanding of learning and unlearning to better understand knowledge management. Our aim is to stimulate breakthrough research streams linking learning, unlearning and knowledge management. How can organizations tailor, use, and extend techniques and tools from knowledge management for improving their business practices and processes? Building upon existing work on knowledge management (KM) and organizational learning, the conference will promote interdisciplinary approaches from computer science and information systems, business, management and organization science as well as cognitive science. Emphasis will be put on systematic learning from experience, KM tools and KM success factors. A special interest belongs to knowledge management initiatives which are lightweight (i.e., do not place considerable additional burden

on users and KM experts), allow an incremental adoption (i.e., do not require large up-front investment before any return of investment is at least visible), and are flexible regarding frequent changes in experts and topics. Continuing the success of the ECKM conference series since 2000, the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge-intensive organizations. The Yearbook of International Organizations provides the most extensive coverage of non-profit international organizations currently available. Detailed profiles of international non-governmental and intergovernmental organizations (IGO), collected and documented by the Union of International Associations, can be found here. In addition to the history, aims and activities of international organizations, with their events, publications and contact details, the volumes of the Yearbook include networks between associations, biographies of key people involved and extensive statistical data. Providing both an international organizations and research bibliography, Volume 4 cites over 46,000 publications and information resources supplied by international organizations, and provides nearly 18,000 research citations under 40 subject headings. This volume also includes a research bibliography on international organizations and transnational associations. This book constitutes the refereed proceedings of the 14th International Conference on Interactive Digital Storytelling, ICIDS 2021, held in Tallinn, Estonia, in December 2021. The 18 full papers and 17 short papers, presented together with 17 posters and demos, were carefully reviewed and selected from 99 submissions. The papers are categorized into the following topical sub-headings: Narrative Systems; Interactive Narrative Theory; Interactive Narrative Impact and Application; and the Interactive Narrative Research Discipline and Contemporary Practice. iNTELLYJELLY Senior, is a monthly magazine for children aged 8 to 12 years. Keeping in mind their curiosity and questions about their surroundings and a deep urge to learn more and more, iNTELLYJELLY Senior is a mélange of colourful and vibrant stories, activities and comics. The magazine follows the UNESCO methodology and work subtly on: values, leadership, logical thinking, emotional quotient, team building, and much more. The scripts and stories in the magazine ravel children with topics revolving around inspirational leadership, women empowerment, logical reasoning, team building through a comical angle. Mindful emotional intelligence, logical reasoning, attention to detail activities further support and enhance child's vivid imagination and curiosity of the beautiful world around them. It was a moment of pride when iNTELLYJELLY was selected by Delhi Govt. for the Happiness Curriculum, launched by HH the Dalai Lama. 11 lakhs+ students and about 52,000 teachers are getting benefitted here. This book provides a comprehensive overview of the latest theory and practice for volunteer involvement. It represents a milestone for knowledge of how and why volunteers become involved and will be essential reading for practitioners, policy makers and funders. Offering exercises and examples from practice, it introduces concepts for understanding volunteers' agency and for critically assessing ways in which those who seek to involve volunteers can respond to rapidly changing environments. The authors draw on a combination of theoretical perspectives and practical experiences to develop approaches based on individuals and community strengths and assets, underlining the need for conviviality, respect and enjoyment in volunteer involvement. Read Along or Enhanced eBook: This entertaining book shows how animals communicate to share information, attract mates, or scare away enemies. They sing, growl, howl, spray smelly scents, and make their body parts bigger. Students will have fun learning about these communication skills and be asked to compare their communication methods with those of animals. In this book 25 authors from the Global South (19) and the Global North (6) address conflicts, security, peace, gender, environment and development. Four parts cover I) peace research epistemology; II) conflicts, families and vulnerable people; III) peacekeeping, peacebuilding and transitional justice; and IV) peace and education. Part I deals with peace ecology, transformative peace, peaceful societies, Gandhi's non-violent policy and disobedient peace. Part II discusses urban climate change, climate rituals, conflicts in Kenya, the sexual abuse of girls, farmer-herder conflicts in Nigeria, wartime sexual violence facing refugees, the traditional conflict and peacemaking process of Kurdish tribes, Hindustani family shame, and communication with Roma. Part III analyses norms of peacekeeping, violent non-state actors in Brazil, the art of peace in Mexico, grass-roots post-conflict peacebuilding in Sulawesi, hydrodiplomacy in the Indus River Basin, the Rohingya refugee crisis, and transitional justice. Part IV assesses SDGs and peace in India, peace education in Nepal, and

infrastructure-based development and peace in West Papua. • Peer-reviewed texts prepared for the 27th Conference of the International Peace Research Association (IPRA) in 2018 in Ahmedabad in India. • Contributions from two pioneers of global peace research: a foreword by Johan Galtung from Norway and a preface by Betty Reardon from the United States. • Innovative case studies by peace researchers on decolonising conflicts, security, peace, gender, environment and development in the Anthropocene, the new epoch of earth and human history. • New theoretical perspectives by senior and junior scholars from Europe and Latin America on peace ecology, transformative peace, peaceful societies, and Gandhi's non-violence policy. • Case studies on climate change, SDGs and peace in India; conflicts in Kenya, Nigeria, South Sudan, Turkey, Brazil and Mexico; Roma in Hungary; the refugee crisis in Bangladesh; peace action in Indonesia and India/Pakistan; and peace education in Nepal. Measuring Entrepreneurial Businesses: Current Knowledge and Challenges brings together an unprecedented group of economists, data providers, and data analysts to discuss research on the state of entrepreneurship and to address the challenges in understanding this dynamic part of the economy. Each chapter addresses the challenges of measuring entrepreneurship and how entrepreneurial firms contribute to economies and standards of living. The book also investigates heterogeneity in entrepreneurs, challenges experienced by entrepreneurs over time, and how much less we know than we think about entrepreneurship given data limitations. This volume will be a groundbreaking first serious look into entrepreneurship in the NBER's Income and Wealth series. An authorised reissue of the long out of print classic textbook, Advanced Calculus by the late Dr Lynn Loomis and Dr Shlomo Sternberg both of Harvard University has been a revered but hard to find textbook for the advanced calculus course for decades. This book is based on an honors course in advanced calculus that the authors gave in the 1960's. The foundational material, presented in the unstarred sections of Chapters 1 through 11, was normally covered, but different applications of this basic material were stressed from year to year, and the book therefore contains more material than was covered in any one year. It can accordingly be used (with omissions) as a text for a year's course in advanced calculus, or as a text for a three-semester introduction to analysis. The prerequisites are a good grounding in the calculus of one variable from a mathematically rigorous point of view, together with some acquaintance with linear algebra. The reader should be familiar with limit and continuity type arguments and have a certain amount of mathematical sophistication. As possible introductory texts, we mention Differential and Integral Calculus by R Courant, Calculus by T Apostol, Calculus by M Spivak, and Pure Mathematics by G Hardy. The reader should also have some experience with partial derivatives. In overall plan the book divides roughly into a first half which develops the calculus (principally the differential calculus) in the setting of normed vector spaces, and a second half which deals with the calculus of differentiable manifolds. With the ongoing evolution of the digital society challenging the boundaries of the law, new questions are arising - and new answers being given - even now, almost three decades on from the digital revolution. Written by a panel of legal specialists and edited by experts on EU Internet law, this book provides an overview of the most recent developments affecting the European Internet legal framework, specifically focusing on four current debates. Firstly, it discusses the changes in online copyright law, especially after the enactment of the new directive on the single digital market. Secondly, it analyzes the increasing significance of artificial intelligence in our daily life. The book then addresses emerging issues in EU digital law, exploring out of the box approaches in Internet law. It also presents the last cyber-criminality law trends (offenses, international instrument, behaviors), and discusses the evolution of personal data protection. Lastly, it evaluates the degree of consumer and corporate protection in the digital environment, demonstrating that now, more than ever, EU Internet law is based on a combination of copyright, civil, administrative, criminal, commercial and banking laws. The International Conference on Energy, Environment and Materials Science (EEMS2015) was held in Guangzhou, China, from August 25 - 26, 2015. EEMS2015 provided a platform for academic scientists, researchers and scholars to exchange and share their experiences and research results within the fields of energy science, energy technology, environmental science, environmental engineering, motivation, automation and electrical engineering, material science and engineering, the discovery or development of energy, and environment and materials science. The Racial Contract puts classic Western social contract theory, deadpan, to extraordinary radical use. With a sweeping look at the European expansionism and racism of the last five hundred years, Charles W. Mills

demonstrates how this peculiar and unacknowledged "contract" has shaped a system of global European domination: how it brings into existence "whites" and "non-whites," full persons and sub-persons, how it influences white moral theory and moral psychology; and how this system is imposed on non-whites through ideological conditioning and violence. The Racial Contract argues that the society we live in is a continuing white supremacist state. As this 25th anniversary edition—featuring a foreword by Tommy Shelbie and a new preface by the author—makes clear, the still-urgent *The Racial Contract* continues to inspire, provoke, and influence thinking about the intersection of the racist underpinnings of political philosophy. This publication provides detailed industrial data on Arab countries for users of this type of statistics, such as policymakers, analysts and researchers. It includes time series and indicators for the period 2008-2014. Data are drawn primarily from national sources, complemented by secondary sources when needed. The Bulletin is divided into two parts. Part I includes summary tables on overall industrial trends, including levels of output expressed as the value added per capita at constant prices; labour productivity expressed as the share of value added per employee at constant prices; the size of the contribution made by industry to gross domestic product at producers' prices; and the average wage of employees in Arab countries. Part II contains tables of industrial statistics for each Arab country. Fully revised and updated content matching the Cambridge International AS & A Level Chemistry syllabus (9701). Endorsed by Cambridge International Examinations, the Second edition of the AS/A Level Chemistry Coursebook comprehensively covers all the knowledge and skills students need for AS/A Level Chemistry 9701 (first examination 2016). Written by renowned experts in Chemistry, the text is written in an accessible style with international learners in mind. The Coursebook is easy to navigate with colour-coded sections to differentiate between AS and A Level content. Self-assessment questions allow learners to track their progression and exam-style questions help learners to prepare thoroughly for their examinations. Contemporary contexts and applications are discussed throughout enhancing the relevance and interest for learners. This Research Handbook offers contextualized perspectives on entrepreneurship in emerging economies. Emphasizing how national context profoundly shapes incentives for entrepreneurial efforts, chapters dissect the opportunities emerging from various institutions and social practices from the Middle East, North and Sub-Saharan Africa, Asia and Latin America. This Handbook is an ideal guide for researchers working on emerging economies, particularly those with an interest in global entrepreneurship. A Washington Post Best Book of 2021 The #1 New York Times bestselling investigative story of how three successive presidents and their military commanders deceived the public year after year about America's longest war, foreshadowing the Taliban's recapture of Afghanistan, by Washington Post reporter and three-time Pulitzer Prize finalist Craig Whitlock. Unlike the wars in Vietnam and Iraq, the US invasion of Afghanistan in 2001 had near-unanimous public support. At first, the goals were straightforward and clear: defeat al-Qaeda and prevent a repeat of 9/11. Yet soon after the United States and its allies removed the Taliban from power, the mission veered off course and US officials lost sight of their original objectives. Distracted by the war in Iraq, the US military become mired in an unwinnable guerrilla conflict in a country it did not understand. But no president wanted to admit failure, especially in a war that began as a just cause. Instead, the Bush, Obama, and Trump administrations sent more and more troops to Afghanistan and repeatedly said they were making progress, even though they knew there was no realistic prospect for an outright victory. Just as the Pentagon Papers changed the public's understanding of Vietnam, *The Afghanistan Papers* contains "fast-paced and vivid" (*The New York Times Book Review*) revelation after revelation from people who played a direct role in the war from leaders in the White House and the Pentagon to soldiers and aid workers on the front lines. In unvarnished language, they admit that the US government's strategies were a mess, that the nation-building project was a colossal failure, and that drugs and corruption gained a stranglehold over their allies in the Afghan government. All told, the account is based on interviews with more than 1,000 people who knew that the US government was presenting a distorted, and sometimes entirely fabricated, version of the facts on the ground. Documents unearthed by *The Washington Post* reveal that President Bush didn't know the name of his Afghanistan war commander—and didn't want to meet with him. Secretary of Defense Donald Rumsfeld admitted that he had "no visibility into who the bad guys are." His successor, Robert Gates, said: "We didn't know jack shit about al-Qaeda." *The Afghanistan Papers* is a "searing indictment of the deceit, blunders, and hubris of

senior military and civilian officials" (Tom Bowman, NRP Pentagon Correspondent) that will supercharge a long-overdue reckoning over what went wrong and forever change the way the conflict is remembered. Revise for AS & A2 Biology with confidence! Providing complete study support throughout the two A Level years, this Edexcel Chemistry study guide matches the curriculum content and provides in-depth course coverage. Written by experienced AS and A2 examiners this book includes invaluable advice on how to get the best results in the exams. Providing plenty of exam practice and frequent progress checks and questions to consolidate learning, this AS & A2 Edexcel Chemistry study guide contains invaluable advice and preparation for the exam. Extensive coverage of the Edexcel course: * AS & A2 specification checklists to organise your studies * tick boxes to record your progress and plan your revision * in-depth coverage of core AS & A2 topics Also included in this book: * examiner's tips that reveal how to achieve higher marks * exam board labels that allow students to identify content relevant to their course * topics subdivided into short, manageable sections * highlighted key points and terminology, and examiner's hints to offer guidance * progress check questions to test recall and understanding * sample questions and model answers that reveal what examiners are looking for * exam-style questions and answers that provide crucial exam practice This open access book presents the first comprehensive overview of general methods in Automated Machine Learning (AutoML), collects descriptions of existing systems based on these methods, and discusses the first series of international challenges of AutoML systems. The recent success of commercial ML applications and the rapid growth of the field has created a high demand for off-the-shelf ML methods that can be used easily and without expert knowledge. However, many of the recent machine learning successes crucially rely on human experts, who manually select appropriate ML architectures (deep learning architectures or more traditional ML workflows) and their hyperparameters. To overcome this problem, the field of AutoML targets a progressive automation of machine learning, based on principles from optimization and machine learning itself. This book serves as a point of entry into this quickly-developing field for researchers and advanced students alike, as well as providing a reference for practitioners aiming to use AutoML in their work. Read Along or Enhanced eBook: This fun title asks readers to think about how different body coverings protect animals by keeping them warm and safe. From fur and feathers to scales and shells, readers get a close-up look at different animal coats to see how they suit the habitats and lives of the animals that are covered in them. The creation, success and long-term survival of enterprises are fundamentally linked to the effectiveness of decision-making processes and negotiation capabilities. This book provides an overview of research into how decisions permeate entrepreneurial ventures throughout their lifecycle. A multidisciplinary approach combining psychology, sociology and political science is used to investigate how entrepreneurs address and deal with decision-making. The respective contributions highlight the latest empirical, theoretical and meta-research, and bridge the gap between literature on entrepreneurship, entrepreneurial and innovative behaviours with that on decision-making and negotiation. This book is one of the first to combine these streams of research, thereby offering a new and insightful addition to the field of entrepreneurship. Customers are treated badly. Not all customers. Not always. But many are and often. Some customers are bad. They treat firms badly. Firms have to react. Employees and customers endure the consequences. Such bad behaviours, by firms and customers, have consequences for perceptions of trust and fairness, for endorsements and referrals, for repeat purchasing and loyalty, and ultimately for a firm's profitability and RoI. The management of customer relationships is core to the success and even survival of the firm. As *The Dark Side of CRM* explores, this is an area fraught with difficulties, duplicitous practice and undesirable behaviours. These need acknowledging, mitigating and controlling. This book is the first of its kind to define these dark sides, exploring also how firms and policy-makers might address such behaviours and manage them successfully. With contributions from many of the leading exponents globally of CRM and understanding customers, *The Dark Side of CRM* is essential reading for students, researchers and practitioners interested in managing customers, relationship marketing and CRM, as well as social media and marketing strategy. This publication provides detailed industrial data from Arab countries for the period 2008- 2019. Part I includes summary tables on the overall industrial trends including the levels of output expressed as the per capita value added at constant prices, labour productivity expressed as the share of value added at constant prices per employee, the size of the contribution made by industry to gross

domestic product. It is intended for the public and private sectors, experts and researchers in the field and regional and international organizations. This book constitutes the proceedings of the 1st International Conference on Systems and Information Sciences (ICCIS), held in Manta, Ecuador, from July 27 to 29, 2020, and was jointly organized by Universidad Laica Eloy Alfaro de Manabí "ULEAM", in collaboration with GDEON. ICCIS aims to bring together systems and information sciences researchers and developers from academia and industry around the world to discuss cutting-edge research. The book covers the following topics: AI, Expert Systems and Big Data Analytics Cloud, IoT and Distributed Computing Communications Database System and Application Financial Technologies (FinTech), Economics and Business Engineering m-Learning and e-Learning Security Software Engineering Web Information Systems and Applications General Track The problem of privacy-preserving data analysis has a long history spanning multiple disciplines. As electronic data about individuals becomes increasingly detailed, and as technology enables ever more powerful collection and curation of these data, the need increases for a robust, meaningful, and mathematically rigorous definition of privacy, together with a computationally rich class of algorithms that satisfy this definition. Differential Privacy is such a definition. The Algorithmic Foundations of Differential Privacy starts out by motivating and discussing the meaning of differential privacy, and proceeds to explore the fundamental techniques for achieving differential privacy, and the application of these techniques in creative combinations, using the query-release problem as an ongoing example. A key point is that, by rethinking the computational goal, one can often obtain far better results than would be achieved by methodically replacing each step of a non-private computation with a differentially private implementation. Despite some powerful computational results, there are still fundamental limitations. Virtually all the algorithms discussed herein maintain differential privacy against adversaries of arbitrary computational power -- certain algorithms are computationally intensive, others are efficient. Computational complexity for the adversary and the algorithm are both discussed. The monograph then turns from fundamentals to applications other than query-release, discussing differentially private methods for mechanism design and machine learning. The vast majority of the literature on differentially private algorithms considers a single, static, database that is subject to many analyses. Differential privacy in other models, including distributed databases and computations on data streams, is discussed. The Algorithmic Foundations of Differential Privacy is meant as a thorough introduction to the problems and techniques of differential privacy, and is an invaluable reference for anyone with an interest in the topic. Vellore Institute of technology (VIT) is one of the front runners among private engineering colleges in the recent decades. VIT University, formerly known as the Vellore Engineering colleges at Vellore in Tamil Nadu. This institute conducts its own online entrance examination called Vellore Institute of Technology Engineering Entrance Examination (VITEEE) every year, also examination is constantly easier as compared to other engineering entrance exams. It offers 20 undergraduate, 34 postgraduate, 4 integrated and 4 research programmes. '3 Mock Tests and Solved Papers (2007-2019) VIT Engineering' book has been consciously revised according to the latest syllabus of VITEEE for the better preparation. Authentic and explanatory solutions of Previous Years' Questions [2007-2019] and Mock Tests so that candidates can understand the question paper pattern and complete before their allotted time. If thorough practice one from this book candidates can gather good ranks in the examination. TABLE OF CONTENT Solved Papers (2019-2007), Mock Tests (1-3). This book gathers the proceedings of the eighth Future of Information and Computing Conference, which was held successfully in virtual mode. It received a total of 369 paper submissions from renowned and budding scholars, academics, and distinguished members of the industry. The topics fanned across various fields involving computing, Internet of Things, data science, and artificial intelligence. Learned scholars from all walks of life assembled under one roof to share their unique, original, and breakthrough researches and paved a new technological path for the world. Many of the studies seek to change the face of the world itself. Their innovative thinking indeed aims to solve several gruesome problems in the field of communication, data science, ambient intelligence, networking, computing, security, and privacy. The authors have strived to render valuable pieces of study in this edition and hope to acquire enthusiastic support from the readers. This handbook is the definitive source of research on the differences among family firms. It provides a timely and thorough investigation of the variant strategies and behaviors undertaken by family firms today, taking a closer look at different

configurations of family involvement and how they influence outcomes and success. While studies on differences between family and non-family firms are deeply rooted in the literature, this handbook uniquely examines the family firm heterogeneity research to date and the inner firm governance, financial and non-financial objectives, and strategies such as innovation, competitive dynamics, internationalization, and human resources management. The handbook pulls together the work of the most prominent names in family business from around the world, separating itself from the competition both in content and geographical scope. Future research directions provided in each chapter will spark further interdisciplinary scholarly work, and will be enlightening for researchers, educators, and practitioners who are currently limited to the narrow and exclusive literature and advance the burgeoning research on this important topic. Help your students push for the top grades with these focused Revision Guides! Ideal for use alongside the Student Books, they provide worked exam questions, and and hints and tips for focussed revision.
