An artist's guide to the craft, beauty, and utility of punch needle rug hooking. Discover the simple art of rug hooking with this colorful guide that includes both instructions for beginners and innovative ideas for those wanting to go further. Rose Pearlman's abstract designs use modern color, composition, and texture to bring this traditional fiber art to life. The 22 projects featured here start small and simple as you get used to the process and move on to a range of unique objects—for kids, to wear, for the home, and utilizing alternative materials. From purses, crib pockets, slide shoes, and rugs to wall art made from recycled plastic bags, this beautifully photographed book showcases punch needle rug hooking as an incredibly versatile—and stylish—craft. The Coast of Australia provides the first comprehensive account of the Australian coast. Every book tells a story . . . And the 70 titles in the Pocket Penguins series are emblematic of the renowned breadth and quality that formed part of the original Penguin vision in 1935 and that continue to define our publishing today. Together, they tell one version of the unique story of Penguin Books. Admired by millions across the world, Gabriel Garcia Marquez first came to prominence as an imaginative writer of genius with his fantastical novel *One Hundred Years of Solitude*, published by Penguin in 1972. Alternately enchanting and disconcerting, the four tales in this volume describe the frailty of humanity and the bewitching force of the imagination, in a world where the lines between reality and dream are hopelessly blurred. Leadmining was an important industry in Britain from the time of the Romans until the late nineteenth century - its remains are to be found scattered in and under the hills of Cornwall, Devon, the Mendips, the Pennines, the Lake District, Wales, the Isle of Man and Scotland. From the thousands of early small mines, worked generally under medieval laws, leadmining by the eighteenth century was forced to use capital-intensive methods to cope with deeper deposits and great inflows of water, including very long levels and steam engines. Lead smelters, too, had to adapt and developed new furnaces and used spectacular flues and chimneys in otherwise wild landscapes to reduce pollution problems. By the 1880s, however, imports killed the industry - and only three mines have been successful since, all now closed. Today, and for the foreseeable future, lead ore production in Britain is only a by-product of mining for other minerals. In this book, Nobel Peace Prize winner and Maya activist Rigoberta Menchú Tum returns to the world of her childhood. The Honey Jar brings us the ancient stories her grandparents told her when she was a little girl, and we can imagine her listening to them by the fire at night. These Maya tales include creation myths, a classic story about the magic twins (which can also be found in the Popol Vuh), explanations of how and why certain natural phenomena came to exist, and animal tales. The underworld, the sky, the sun and moon, plants, people, animals, gods and demi-gods are all present in these stories, and through them we come to know more about the elements that shaped the Mayas' understanding of the world. Rich and vibrant illustrations by noted Mazatec-Mexican artist Domi perfectly complement these magical Maya tales. Even as it skirts mainstream contemporary culture, pornography remains a social taboo; there still exist strong biases both in favor and against it. With chapters addressing imagination, gender, power relationships, truth claims, aesthetics, and both pro and anti-porn slants, this book presents a balanced view of pornography in modern society. This is a translation of Chilean author Marco Antonio de la Parra? A finales del siglo XIX, en las tierras paupérrimas del noreste del Brasil, el chispazo de las arengas del Consejero, personaje mesiánico y enigmático, prenderá la insurrección de los desheredados. En circunstancias extremas como aquéllas, la consecución de la dignidad vital sólo podrá venir de la exaltación religiosa —el convencimiento fanático de la elección divina de los marginados del mundo— y del quebranto radical de las reglas que rigen el mundo de los poderosos. Así, grupos de miserables acudirán a la llamada de la revolución de Canudos, la ciudad donde se asentará esta comunidad de personajes que difícilmente desaparecerán de la imaginación del lector: el Beatito, el León de Natuba, María Quadrado... Frente a todos ellos, una trama político-militar se articula para detener con toda su fuerza el movimiento que amenaza con expandirse. La primera novela que Mario Vargas Llosa situó fuera del Perú es un prodigio de expresión de mentalidades profundas, de pasiones irracionales y desbocadas fuerzas sociales. Un relato exhaustivamente documentado, tanto a través de lecturas como de viajes sobre el terreno en el que tuvo lugar este acontecimiento histórico. Un libro fundamental en la historia literaria del siglo XX. In 1971 the International Society of Tropical Ecology and the International Association for Ecology held a meeting on Tropical Ecology, with an emphasis on organic production in New Delhi, India. At this meeting a Working Group on Tropical Ecology was organized, consisting of K. C. Misra (India), F. Malaisse (Zaire), E. Medina (Venezuela) and F. Golley (U.S.A.). The object of this Working Group was to stimulate interaction between tropical ecologists through future scientific meetings and other exchanges and communications. A second meeting of ISTE and INTECOL was held in Caracas, Venezuela in 1973, under the direction of Medina and Golley and sponsored by the Department of Ecology, Instituto Venezolano Investigaciones Científicas (IVIC). The basic structure of the meeting was provided by series of invited papers which considered topics of special interest from both an applied and theoretical view. These included physiological ecology (Pannier), populations (Rabinovich), tropical savannas (Lamotte), rivers (Sioli), estuaries (Rodriguez), and island ecosystems (Mueller-Dombois). Contributed papers considered details of these and other ecological topics, including the application of ecology to human problems. The present volume includes the invited papers listed above and a sampling of contributed papers which together illustrate the trends of research in tropical ecology. The papers show that tropical ecology is a vigorous subject of research. While the papers in this volume do not provide reviews of all the topics of study in tropical ecology, they do present authoritative statements on progress in the major subject in the field. Natural and agro-ecosystems are frequently exposed to natural or synthetic substances, which, while they have no direct nutritional value or significance in metabolism, may negatively affect plant functioning. These, xenobiotics, may originate from both natural (fires, volcano eruptions, soil or rock erosion, biodegradation) and anthropogenic (air and soil pollution, herbicides) sources. And, while affected plants have only a limited number of possibilities for avoiding accumulation of these compounds, they do exhibit several enzymatic reactions for detoxification including oxidation, reduction, hydrolysis and conjugation reactions. In agro-ecosystems in particular these mechanisms have great significance in relation to herbicide detoxification and tolerance. In this volume an international group of experts present an overview of the nature and distribution of organic xenobiotics, including their uptake, effects on plant functioning and detoxification mechanisms. The particular significance of glutathione S-transferases in bio-indication and bio-monitoring, and in the detoxification of volatile organic air pollutants and herbicides is evaluated, and their potential significance in phytoremediation and bioaccumulation will be discussed. This volume will be of interest to a wide audience, from graduate students to senior researchers in a wide range of disciplines including plant ecology, plant biochemistry, agriculture and environmental management. It will also be of practical interest to environmentalists, policy makers and resource managers. This guide aims to provide practical tools to non specialists-essentially water resources planners, river basin managers, non-governmental organizations and private sector operators. It links the most recent practice on payments for hydrological services to current discourse on integrated water resources management and looks into the different aspects to consider when exploring the potential feasibility of establishing reward or payments for ecosystem services related to water security. Pay demystifies concepts and jargon, and through a series of tools, case studies and stories from around the world, describes pitfalls to avoid and provides hints to fill gaps in knowledge. It is based on a demand-driven approach, linking text, tools and illustrations to key questions emerging from current and potential practitioners. Exile was a central feature of society throughout the early modern world. For this reason the contributors to this volume see exile as a critical framework for analysing and understanding society at this time. Lonely railroad heiress Tempy Bliss, a budding journalist, is elated that Charles Dickens wants her to write an article about gambling for his newspaper. But when casino owner Lucien Hamlin bans

Tempy from his gambling palace once he learns of her profession, she begins to suspect a much bigger story is at hand. Lucien's secretive behavior goads Tempy into uncovering the real story. Lucien is a hard-driving businessman whose life is about to be upended by his unexpected inheritance of an earldom. It's a fact he'd rather not have announced, and certainly not in newsprint, until after the sale of his casino. With Tempy's career goals progressing, as well as her dreams of becoming a part of her fiance's family, she refuses to accept defeat even when Ernest sends her a letter from Paris informing her he's fallen in love with a Frenchwoman. Tempy resolves to win him back while simultaneously conducting her research at the sumptuous Hamlin House casino. Growing out of the first Anglophone academic workshop to focus exclusively on the early Bourbon Spanish America, this collective volume offers a new perspective on the key changes experienced in Spanish America during the first half of the eighteenth century. This book covers the evolution of royal policy in Spanish America as eighteenth-century Spain modernized its empire and transformed itself into a power of the first order. Tracing the interplay between war and reform, the analysis confronts the diverse realities of the Spanish Atlantic world, which stretched from the northern Mexican borderlands to Argentina and Chile. Unlike earlier studies on eighteenth-century Spain, this work incorporates the early Bourbon experience into the narrative and integrates the impressive reemergence of the Royal Armada into a fuller picture of administrative, commercial, fiscal, ecclesiastical, and military change. No Marketing Blurb The Ache, whose life history the authors recounts, are a small indigenous population of hunters and gatherers living in the neotropical rainforest of eastern Paraguay. This is part exemplary ethnography of the Ache and in larger part uses this population to make a signal contribution to human evolutionary ecology. On March 13, 1697, Spanish troops from Yucatán attacked and occupied Nojpeten, the capital of the Maya people known as Itzas, the inhabitants of the last unconquered native New World kingdom. This political and ritual center--located on a small island in a lake in the tropical forests of northern Guatemala--was densely covered with temples, royal palaces, and thatched houses, and its capture represented a decisive moment in the final chapter of the Spanish conquest of the Mayas. The capture of Nojpeten climaxed more than two years of preparation by the Spaniards, after efforts by the military forces and Franciscan missionaries to negotiate a peaceful surrender with the Itzas had been rejected by the Itza ruling council and its ruler Ajaw Kan Ek'. The conquest, far from being final, initiated years of continued struggle between Yucatecan and Guatemalan Spaniards and native Maya groups for control over the surrounding forests. Despite protracted resistance from the native inhabitants, thousands of them were forced to move into mission towns, though in 1704 the Mayas staged an abortive and bloody rebellion that threatened to recapture Nojpeten from the Spaniards. The first complete account of the conquest of the Itzas to appear since 1701, this book details the layers of political intrigue and action that characterized every aspect of the conquest and its aftermath. The author critically reexamines the extensive documentation left by the Spaniards, presenting much new information on Maya political and social organization and Spanish military and diplomatic strategy. This is not only one of the most detailed studies of any Spanish conquest in the Americas but also one of the most comprehensive reconstructions of an independent Maya kingdom in the history of Maya studies. In presenting the story of the Itzas, the author also reveals much about neighboring lowland Maya groups with whom the Itzas interacted, often violently. Elderly Jeremiah decides that it's finally time to learn to read. This international volume draws together key research that examines visual arts of the past and contemporary indigenous societies. Placing each art style in its temporal and geographic context, the contributors show how depictions represent social mechanisms of identity construction, and how stylistic differences in product and process serve to reinforce cultural identity. Examples stretch from the Paleolithic to contemporary world and include rock art, body art, and portable arts. Ethnographic studies of contemporary art production and use, such as among contemporary Aboriginal groups, are included to help illuminate artistic practices and meanings in the past. The volume reflects the diversity of approaches used by archaeologists to incorporate visual arts into their analysis of past cultures and should be of great value to archaeologists, anthropologists, and art historians.
