Follows the highly successful first edition with over 25% more content, including extensive coverage of the latest update, Service Pack 1 Addresses a huge market of consumers eager to learn about hidden gems and secrets in Vista and SP1 Covers features that are not disclosed in Microsoft's books or help files A highly connected and qualified author has gathered information from an extensive network of Windows beta testers and thousands of readers, as well as conducted his own experiments on the

new OS New chapters cover personalizing and configuring Vista, networking, Zune, Vista and ultra-mobile PCs, Windows Home Server, and many more new topics It's not the computer. The hacker's first target is YOU! A dirty little secret that vendors don't want you to know is that good computer security doesn't cost a thing. Any solution you can buy is guaranteed to fail. Malicious hackers use this fact to their advantage. Real security is gained by understanding the enemy's tactics and offsetting them with appropriate and consistently applied Windows settings. These expert authors realize that an effective strategy is two parts technology and one part psychology. Along with learning about Vista's new security features (such as UAC, integrity controls, BitLocker, Protected Mode, and IIS 7), learn common-sense recommendations that will immediately provide reliable value. Vista Security Tips Have a healthy sense of paranoia Understand and apply the basics properly Use longer passwords. No, longer than that Use admin privilege very sparingly Don't believe Internet Explorer Protected Mode will stop all attacks Don't believe DEP can stop all attacks Don't believe any technology can stop all attacks MOAC Labs Online provide students with a hosted emulation environment for working in labs designed for use with the Microsoft Official Academic Course curriculum. These labs are the hands-on software experience that is critical for students to build the skills and knowledge they need for effective work with Windows Server 2008 on the job. Give them real experience with real software, freely exploring the full environment, instead of the prescribed task flow of simulations. MOAC Labs Online simplify the implementation of your new network administration program by eliminating lab set up. All lab exercises are hosted on Microsoft servers. Only a browser and internet connection are required for their use. This will save your institution the expense of upgrading the hardware and the software in your lab. You will no longer need dedicated hard drives for each student. Students may log into their virtual lab from any machine. Distance learning is now a viable option for your IT Professional program. The Best Fully Integrated Study System Available With hundreds of practice questions and hands-on exercises, MCTS Windows Vista Client Configuration Study Guide covers what you need to know--and shows you how to prepare--for this challenging exam. 100% complete coverage of all official objectives for exam 70-620 Exam Readiness Checklist at the front of the book--you're ready for the exam when all objectives on the list are checked off Inside the Exam sections in every chapter highlight key exam topics covered Simulated exam questions match the format, tone, topics, and difficulty of the real exam Covers all the exam topics, including: Installation \* User Account Control and Parental Controls \* Windows Drivers \* Windows Aero and Internet Explorer \* Windows Defender and Windows Firewall \* Networking and Remote Access \* Media Applications \* Windows Mail and Windows Meeting Space \* Windows Sidebar, Windows Calendar, and Windows Fax and Scan \* Reliability and Performance Issues \* Windows Update, Data Protection, and Power Options \* Mobile Computing CD-ROM includes: Complete MasterExam practice testing engine, featuring: One full practice exam; Detailed answers with explanations; Score Report performance assessment tool 20 CertCam instructional video clips (Windows and iPod format)

The latest publication in the Microsoft Official Academic Course series for IT Professionals, this course covers the Windows Vista client mapping to the new Microsoft Certified IT Professional examination 70-622 for Enterprise Support Technicians. A comprehensive program of textbook, lab manual and software, the course provides everything students need to build the knowledge and skills necessary to install, support, and troubleshoot the Windows Vista operating system. This practical handbook has detailed step-by-step instructions for implementing Least Privilege Security and related management technologies. It has solutions to the most common

technical challenges and Microsoft best practice advice. It also covers techniques for managing Least Privilege on the desktop. This book is for System Administrators or desktop support staff who want to implement Least Privilege Security on Windows systems. Microsoft Vista for IT Security Professionals is designed for the professional system administrators who need to securely deploy Microsoft Vista in their networks. Readers will not only learn about the new security features of Vista, but they will learn how to safely integrate Vista with their existing wired and wireless network infrastructure and safely deploy with their existing applications and databases. The book begins with a discussion of Microsoft's Trustworthy Computing Initiative and Vista's development cycle, which was like none other in Microsoft's history. Expert authors will separate the hype from the reality of Vista's preparedness to withstand the 24 x 7 attacks it will face from malicious attackers as the world's #1 desktop operating system. Microsoft Windows operating systems run more than 90% of the desktop PCs in the world and Vista is the first major Windows release in more than 5 years. This is currently the only book on Windows Vista Security From the #1 Name in Professional Certification Get on the fast track to becoming a Microsoft Certified Technology Specialist with this affordable, portable study tool.
