The Therapist's Notebook on Strengths and Solution-Based Therapies Oct 25 2020
The Therapist's Notebook on Strengths and Solution-Based Therapies offers multiple
pathways for those in helping relationships to employ strengths and solution-based
(SSB) principles and practices as a vehicle for promoting positive change with
individuals, couples, and families. The 100 exercises in this book are based on a series
of core principles that are not only central to solution-based therapies; they have been
demonstrated through research as essential to successful outcome. Readers will learn
about processes and practices that are supported by research and are collaborative,
competency-based, culturally sensitive, client-driven, outcome-informed, and change-
oriented. The text is categorized into seven parts, each formatted similarly to ensure
easy accessibility. Practitioners will find their therapy enhanced, with a greater ability to
improve their clients' well-being, relationships, and social roles.

The Learning Habit Jun 20 2020 A groundbreaking approach to building learning habits for life, based on a major new study revealing what works – and what doesn't Life is different for kids today. Between standardized testing, the Common Core Curriculum, copious homework assignments, and seemingly endless amounts of "screen time," it's hard for kids – and parents – to know what's most essential. How can parents help their kids succeed – not just do well "on the test" -- but develop the learning habits they'll need to thrive throughout their lives? This important and parent-friendly book presents new solutions based on the largest study of family routines ever conducted. The Learning Habit offers a blueprint for navigating the maze of homework, media use, and the everyday stress that families with school-age children face; turning those "stress times" into opportunities to develop the eight critical skills kids will need to succeed in college and in the highly competitive job market of tomorrow – skills including concentration and focus, time management, decision-making, goal-setting, and self-reliance. Bridging the Great Homework Divide Dec 27 2020 In a recent survey, parents and middle school students reported that they are challenged by the demands of homework. Responses to the survey, titled "The Great Homework Divide," indicate that students and their parents are struggling to adjust to the middle school workload, which can be both heavier and more varied than previously experienced by these students in a typical elementary school. Two-thirds of parents (66 percent) say that their middle school student seeks their help with homework. More than half of middle school students (57 percent) and their parents (59 percent) report that parents spend at least

one hour a night helping with homework. Parents also report helping middle school students with homework, on average, two and one-half nights a week. In cooperation with LeapFrog Enterprises, Inc., the National Education Association has developed this solutions guide to help parents and middle school students meet the homework challenges they may face. This guide describes reasons why teachers assign homework and have stricter homework policies and it provides tips to help ease the challenges of the homework transition for middle school students and their parents. [LeapFrog Enterprises, Inc. also produced this guide.]

The Pattern On The Stone Sep 23 2020 Most people are baffled by how computers work and assume that they will never understand them. What they don't realize—and what Daniel Hillis's short book brilliantly demonstrates—is that computers' seemingly complex operations can be broken down into a few simple parts that perform the same simple procedures over and over again. Computer wizard Hillis offers an easy-to-follow explanation of how data is processed that makes the operations of a computer seem as straightforward as those of a bicycle. Avoiding technobabble or discussions of advanced hardware, the lucid explanations and colorful anecdotes in *The Pattern on the Stone* go straight to the heart of what computers really do. Hillis proceeds from an outline of basic logic to clear descriptions of programming languages, algorithms, and memory. He then takes readers in simple steps up to the most exciting developments in computing today—quantum computing, parallel computing, neural networks, and self-organizing systems. Written clearly and succinctly by one of the world's leading computer scientists, *The Pattern on the Stone* is an indispensable guide to understanding the workings of that most ubiquitous and important of machines: the computer.

HomeWork Oct 17 2022 Innovative design solutions for incorporating workspaces into the home Growing numbers of us work not only from home, but from anywhere; job flexibility has become key for employers and workers alike. Divided into five thematic sections, *Home Work* explores the exciting variety of ways that the workplace can be integrated into the domestic environment without overwhelming it. From stand-alone multifunctional furniture to mobile room dividers and dynamic solutions that fold out or pop up to create new work areas, each design addresses the unique needs of the space and client, and tackles the challenges of the rapidly evolving relationship between work and domestic life in the twenty-first century. This essential and timely resource both for telecommuters and designers redefining “workspace” offers fresh ideas for how to strike the perfect balance between living and working at home.
