JEAN NORDMANN, Emeritus Professor of Strasbourg University, will celebrate his 80th anniversary. The task of paying tribute to Professor NORDMANN's many services to ophthalmology in a way worthy of the occasion is so difficult that we decided to concentrate on the focal point of his life's work. In this issue scientists engaged in lens research from all over the world offer reports of their latest findings together with their best wishes and felicitations as a birthday gift to the Nestor of lens research. They thereby express their gratitude to Professor NORDMANN, who, with the lifelong indefatigable enthusiasm of a scientist, has most successfully pursued the problems of lens metabolism. It is our sincerest hope that we may look forward to many more years in which to take advantage of Professor NORDMANN's superior knowledge. Among the contributions to this festive donation we miss the works of some authors who have always held Professor NORDMANN's special interest. The editor has received several letters of longstanding friends who would have liked to submit a manuscript but had been unable to meet the deadline: Professor NORDMANN may rest assured that they, too, belong to the great number of congratulators from our field of research. We have been able to make this dedication thanks to Professor HENKES who readily agreed to publish our contributions in *Documenta Ophthalmologica*. Although they existed in the city of Glasgow long before then, it wasn't until 1569 that the city's coopers were officially incorporated as a guild or 'craft'. After that they played an important role in civic, trading and political affairs until the mid-nineteenth century when, like every craft organisation, they lost their exclusive rights and coopers were allowed to work in the city without having to be members of the Incorporation. Even in more modern times, however, the Incorporation continued to grow and flourish during the extraordinary rise of Glasgow as Scotland's largest city. Today, though the Incorporation no longer plays an important part in the craft of coopering, its membership is bigger than ever and it undoubtedly still plays a noted part in Glasgow life. With unrestricted access to the Incorporation's records, Craig Mair has pieced together the story of the growth and importance of the cooper craft in Glasgow. Covering the period from the early 1500s to the 21st century, he describes the day-to-day life and work of the coopers, including such things as apprenticeships, the punishment of coopers who broke their Craft's rules, and the changing face of the cooper trade as the industrial revolution gathered momentum in Glasgow. He ends by describing the flourishing work of the Incorporation today. Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki WHY IS COOPERS CROSSING GROWING SO FAST? JACK VAN CAMP, charming mayor of the booming Indiana town, isn't telling where all his new townsfolk are coming from. He likes to think of it as his little secret. A tour complete with "tales" of twelve of its more interesting "citizens." Quite strange tales, in fact. They might even be true. ONLY AT THE END of the tour, as night falls, does he discover that quiet, demure Dilly Zimmer has her own tale to tell, her own little secret. A secret involving a missing childhood . . . A deathbed whisper . . . And a very peculiar old typewriter. NOW MRS. ZIMMER has come to Coopers Crossing to set things right. One keystroke at a time. Fourteen more tales from just beyond the edge of the ordinary. Check out the author's books at danielcrossbooks.com. Write to him at crossdaniel381@gmail.com. Cover design by Leah Diekhoff. conferences are a forum for reporting on research on all aspects of automated deduction, including theorem proving, logic programming, unification, deductive databases, term rewriting, ATP for non-standard logics, and program verification. All papers submitted to the conference were refereed by at least two referees, and the program committee accepted the 52 that appear here. Also included in this volume are abstracts of 21 implementations of automated deduction systems. This book constitutes the refereed proceedings of the 23rd International Conference on Intelligent Data Engineering and Automated Learning, IDEAL 2022, which took place in Manchester, UK, during November 24-26, 2022. The 52 full papers included in this book were carefully reviewed and selected from 79 submissions. They deal with emerging and challenging topics in intelligent data analytics and associated machine learning paradigms and systems. Special sessions were held on clustering for interpretable machine learning; machine learning towards smarter multimodal systems; and computational intelligence for computer vision and image processing. This book constitutes the refereed proceedings of the 13th International Conference on Automated Deduction, CADE-13, held in July/August 1996 in New Brunswick, NJ, USA, as part of FLoC '96. The volume presents 46 revised regular papers selected from a total of 114 submissions in this category; also included are 15 selected system descriptions and abstracts of two invited talks. The CADE conferences are the major forum for the presentation of new results in all aspects of automated deduction. Therefore, the volume is a timely report on the state-of-the-art in the area.
