The Training Evaluation Process Dec 20 2019 This book details a unique training evaluation approach developed by David J. Basarab, Sr. currently the Manager of Evaluation at Motorola University. This approach was developed in part based on information from his graduate coursework with Dr. Darrell K. Root, professor of program evaluation and educational administration at the University of Dayton. It enabled Motorola to evaluate their corporate training programs to determine whether money spent on training was an investment or an expense. This evaluation approach is also significant in determining either the effectiveness of or the opportunities to improve corporate training programs. In this text, *The Training Evaluation Process*, David Basarab and Darrell Root provide commercial industry training with a step-by-step approach to use when evaluating training programs, thus allowing training to be viewed as an investment rather than an expense. This text focuses on assessing training programs, so that they may be improved. This approach provides a successful procedure to use when evaluating training programs. Included in the text is a comprehensive explanation of the evaluation model developed by D. L. Kirkpatrick (Kirkpatrick, D. L., November 1959) in which he described four levels of evaluating training programs: Level 1 -Reaction: Evaluate to learn participants' perception to the training program. Level 2 -Learning: Evaluate to determine whether participants have learned the course subject matter. Level 3 -Behavior: Evaluate participants' use of newly acquired job skills on the job. Level 4 -Results: Evaluate the organizational impact of training on company's workforce.

Building Evaluation Capacity Sep 28 2020 The Second Edition of Building Evaluation Capacity provides 89 highly structured activities which require minimal instructor preparation and encourage application-based learning of how to design and conduct evaluation studies. Ideal for use in program evaluation courses, professional development workshops, and organization stakeholder trainings, authors Hallie Preskill and Darlene Russ-Eft cover the entire process of evaluation, including: understanding what evaluation is; the politics and ethics; the influence of culture; various models, approaches and designs; data collection and analysis methods; communicating and reporting progress and findings; and building and sustaining support. Each activity includes an overview, instructional objectives, minimum and maximum number of participants, range of time required, materials needed, primary instructional method, and procedures for facilitators to help learners in the most common evaluation practices.

Monitoring and Evaluation Training Feb 26 2023 Monitoring and Evaluation Training fills a gap in the literature by providing readers with a systematic approach to monitoring and evaluation (M&E) training for programs and projects. Bridging theoretical concepts with practical, how-to knowledge, authors Scott Chaplowe and J. Bradley Cousins draw upon the scholarly literature, applied resources, and over 50 years of combined experience to provide expert guidance

for M&E training that can be tailored to different training needs and contexts, from training for professionals or non-professionals, to organization staff, community members, and other groups with a desire to learn and sustain sound M&E practices.

Evaluating Training Programs Aug 20 2022 Leaders want to see changes in behavior as a result of what people have learned and may expect these new behaviors to deliver results for the business. With the third edition of this book, readers have an opportunity to update their understanding of this classic evaluation framework and to learn from the case studies about how to effectively apply the framework to a variety of learning programs. Readers are presented with the tools and the know-how to tell their own story of value creation.---Foreword by Merrill C. Anderson, Ph.D, Chief Executive Officer, MetrixGlobal, LLC

The Ultimate Training Workshop Handbook: A Comprehensive Guide to Leading Successful Workshops and Training Programs Mar 23 2020 Bruce Klatt's *The Ultimate Training Workshop Handbook* was written for those who want to excel as trainers, and to offer maximum value both to client/employers and workshop participants. Focusing on success in front of the group and based on Klatt's 25 years of experience, this comprehensive guide takes you from the contracting stage through evaluating results. It shows you how to prepare yourself and your clients, and how to construct the workshop.

Complete Training Evaluation Oct 30 2020 While substantial advances have been made in the L&D profession over the last decade, evaluation remains by far the weakest part of the L&D cycle. Most organisations wish to evaluate the impact of their investment in training but few do it well, and the lack of effective methods is one of the key barriers. *Complete Training Evaluation* addresses these issues by providing practitioner friendly but academically robust information and guidance on how to evaluate all forms of learning and development. It draws on the author's own multidisciplinary research along with his practical experience of working with private and public sector organisations carrying out evaluation. The book provides practitioners with accessible 'how-to' knowledge and tools to undertake evaluations of both formal and informal learning. Full of case studies and practical examples of application of methods and insights, *Complete Training Evaluation* equips practitioners with a range of approaches that can be used depending on the training programme, capacity and capability.

The Design, Implementation, and Evaluation of a Teacher Training Workshop for Mathematics Graduate Teaching Assistants Feb 20 2020 To help train new graduate mathematics teaching assistants (GMTAs), a teacher training workshop was designed based on K-12 literature on the components of effective professional development (Garet, et al., 2001). The workshop consisted of six two-hour seminars over a six week period followed by a classroom feedback

component of either peer coaching or observation, for a total time commitment of 18 hours. The content of the workshop addressed teaching techniques specifically targeted to GMTAs. These ideas included elements of reflection, techniques for engaging students through active learning, asking good questions, utilizing wait-time, and using formative assessment techniques. The assessment of the workshop was based on Guskey's (1999) work on the five levels of effective professional development evaluation. In the mixed-methods design, 18 GMTAs participated in the workshop. Data collection consisted of three sets of videotapes, two sets of interviews, surveys, and coaching and observation forms. Results indicated that a well-designed workshop can impact teaching practices. Through interviews, GMTAs indicated they were more reflective of their teaching, thought more about the questions they asked, and actively involved their students more during lectures. The workshop was considered effective not only because GMTAs said they changed their teaching but because changes were seen in their teaching. For nine GMTAs strong evidence was collected of their change in teaching: they not only mentioned specific changes to their teaching in the interviews, but these specific changes were observed on videotapes of their classroom. In comparing peer coaching with observation, seven of the ten in the coaching group commented that just watching another's class helped them to improve more than any other part of the coaching process. Only two of the ten coaching participants commented on the helpfulness of the pre and post conference discussions involved with coaching. From the data collected, the possible added benefits of peer coaching may be outweighed by the additional time, organization, and pairing requirements present in a GMTA setting. Five constructs that influenced the effectiveness of the peer coaching experience are discussed. This project contributes to the research base regarding adapting K-12 professional development literature into a collegiate setting.
