Plantation Memories Jul 20 2020 Plantation Memories is a compilation of episodes of everyday racism written in the form of short psychoanalytical stories. From the question “Where do you come from?” to Hair Politics to the N-word, the book is a strong, eloquent, and elaborate piece that deconstructs the normality of everyday racism and exposes the violence of being placed as the Other. Released at the Berlin International Literature Festival in 2008, soon the book became internationally acclaimed and part of numerous academic curricula. Known for her subversive practice of giving body, voice, and image to her own texts, Grada Kilomba has adapted her book into a staged reading and video installation. Plantation Memories is an important contribution to the global cultural discourse.

Undoing Gender Sep 21 2020 Undoing Gender constitutes Judith Butler's recent reflections on gender and sexuality, focusing on new kinship, psychoanalysis and the incest taboo, transgender, intersex, diagnostic categories, social violence, and the tasks of social transformation. In terms that draw from feminist and queer theory, Butler considers the norms that govern—and fail to govern—gender and sexuality as they relate to the constraints on recognizable personhood. The book constitutes a reconsideration of her earlier view on gender performativity from Gender Trouble. In this work, the critique of gender norms is clearly situated within the framework of human persistence and survival. And to “do” one's gender in certain ways sometimes implies “undoing” dominant notions of personhood. She writes about the “New Gender Politics” that has emerged in recent years, a combination of movements concerned with transgender, transsexuality, intersex, and their complex relations to feminist and queer theory.

Liquid Modernity Aug 21 2020 In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human condition. The new remoteness and un-reachability of global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life - emancipation, individuality, time/space, work and community - and traces their successive incarnations and changes of meaning. Liquid Modernity concludes the analysis undertaken in Bauman's two previous books Globalization: The Human Consequences and In Search of Politics. Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today.

Piggie Pie Nov 23 2020 Gritch the witch flies to Old MacDonald's farm for some pigs to make a piggie pie, but when she arrives she can't find a single porker.

Gestures Apr 28 2021 Throughout his career, the influential new media theorist Vilém Flusser kept the idea of gesture in mind: that people express their being in the world through a sweeping range of movements. He reconsiders familiar actions—from speaking and painting to smoking and telephoning—in terms of particular movement, opening a surprising new perspective on the ways we share and preserve meaning. A gesture may or may not be linked to specialized apparatus, though its form crucially affects the person who makes it. These essays, published here as a collection in English for the first time, were written over roughly a half century and reflect both an eclectic array of interests and a durable commitment to phenomenological thought. Defining gesture as “a movement of the body or of a tool attached to the body for which there is no satisfactory causal explanation,” Flusser moves around the topic from diverse points of view, angles, and distances: at times he zooms in on a modest, ordinary movement such as taking a photograph, shaving, or listening to music; at others, he pulls back to look at something as vast and varied as human “making,” embracing everything from the fashioning of simple tools to mass manufacturing. But whatever the gesture, Flusser analyzes it as the expression of a particular form of consciousness, that is, as a particular relationship between the world and the one who gestures.

A Paper Mask Feb 19 2023 In a chilling tale of medical treachery, Matthew Harris, a bored hospital orderly, assumes the identity of a recently killed doctor and uses her brains, cunning, and depravity to carry out his own brand of diagnostics and healing

The Story of the Leprechaun Nov 04 2021 In a faraway village lives a talented little shoemaker—who also happens to be a leprechaun. He keeps the gold that he earns from making shoes hidden away in his home, where he thinks it will be safe. But one day a greedy man named Tim spies the leprechaun's pot of gold and tries to steal it! How can the little leprechaun outsmart Tim and make sure his pot of gold will be safe forever? In this original tale, Katherine Tegen has captured the magic of the wily leprechaun, while Sally Anne Lambert's glowing illustrations bring him to life.

Cirque Du Freak #1: A Living Nightmare Apr 16 2020 From the Master of Horror comes the first gripping book in the twelve book New York Times bestselling Saga of Darren Shan. Start the tale from the beginning in the book that inspired the feature film The Vampire's Assistant and petrified devoted fans worldwide. A young boy named Darren Shan and his best friend, Steve, get tickets to the Cirque Du Freak, a wonderfully gothic freak show featuring weird, frightening half human/half animals who interact terrifyingly with the audience. In the midst of the excitement, true terror raises its head when Steve recognizes that one of the performers-- Mr. Crepsley-- is a vampire! Steve remains after the show finishes to confront the vampire-- but his motives are surprising! In the shadows of a crumbling theater, a horrified Darren eavesdrops on his friend and the vampire, and is witness to a monstrous, disturbing plea. As if by destiny, Darren is pulled to Mr. Crepsley and what follows is his horrifying descent into the dark and bloody world of vampires. This is the beginning of Darren's story.

The Mask of Masculinity Feb 24 2021 At 30 years old, Lewis Howes was outwardly thriving but unfulfilled inside. He was a successful athlete and businessman, achieving goals beyond his wildest dreams, but he felt empty, angry, frustrated, and always chasing something that was never enough. His whole identity had been built on misguided beliefs about what “masculinity” was. Howes began a personal journey to find inner peace and to uncover the many masks that men – young and old – wear. In The Mask of Masculinity, Howes exposes the ultimate emptiness of the Material Mask, the man who chases wealth above all things; the covering vulnerability that hides behind the Joker and Stoic Masks of men who never show real emotion; and the destructiveness of the Invincible and Aggressive Masks worn by men who take insane risks or can never back down from a fight. He teaches men how to break through the walls that hold them back and shows women how they can better understand the men in their lives. It's not easy, but if you want to love, be loved and live a great life, then it's an odyssey of self-discovery that all modern men must make. This book is a must-read for every man – and for every woman who loves a man.

The People of Paper May 10 2022 Part memoir, part lies, this imaginative tale is a story about loving a woman made of paper, about the wounds made by first love and sharp objects.

COVID-19 and Society Jun 30 2021 This timely book presents a collection of expert insights into the impacts of COVID-19 in a broader socio-economic context. In each chapter, the authors identify the current impact of COVID-19 by demonstrating transformative signals and project these signals to the future by considering their alternative futures and implications. The book emphasizes that dealing with major global pandemics like COVID-19 requires all countries and regions to take different, but synchronized measures to decrease its socio-economic effects in the short, medium and long run. The consequences of COVID-19 will go beyond medicine to cover all other aspects of life and are bound to change the nature of organizations. Moving beyond the medical viewpoint, the experts in this book discuss the topic from multi-dimensional and multi-disciplinary angles by focusing on the domains of technology, business, finance, marketing, law, public administration, and education.

Architectural Research Methods Oct 11 2019 A practical guide to research for architects and designers—now updated and expanded! From searching for the best glass to prevent glare to determining how clients might react to the color choice for restaurant walls, research is a crucial tool that architects must master in order to effectively address the technical, aesthetic, and behavioral issues that arise in their work. This book's unique coverage of research methods is specifically targeted to help professional designers and researchers better conduct and understand research. Part I explores basic research issues and concepts, and includes chapters on relating theory to method and design to research. Part II gives a comprehensive treatment of specific strategies for investigating built forms. In all, the book covers seven types of research, including historical, qualitative, correlational, experimental, simulation, logical argumentation, and case studies and mixed methods. Features new to this edition include: Strategies for investigation, practical examples, and resources for additional information A look at current trends and innovations in research Coverage of design studio–based research that shows how strategies described in the book can be employed in real life A discussion of digital media and online research New and updated examples of research studies A new chapter on the relationship between design and research Architectural Research Methods is an essential reference for architecture students and researchers as well as architects, interior designers, landscape architects, and building product manufacturers.

Five Feet Apart Jun 11 2022 Now a major motion picture starring Cole Sprouse and Haley Lu Richardson! Goodreads Choice Winner, Best Young Adult Fiction of 2019 In this #1 New York Times bestselling novel that's perfect for fans of John Green's The Fault in Our Stars, two teens fall in love with just one minor complication—they can't get within a few feet of each other without risking their lives. Can you love someone you can never touch? Stella Grant likes to be in control—even though her totally out of control lungs have sent her in and out of the hospital most of her life. At this point, what Stella needs to control most is keeping herself away from anyone or anything that might pass along an infection and jeopardize the possibility of a lung transplant. Six feet apart. No exceptions. The only thing Will Newman wants to be in control of is getting out of this hospital. He couldn't care less about his treatments, or a fancy new clinical drug trial. Soon, he'll turn eighteen and then he'll be able to unplug all these machines and actually go see the world, not just its hospitals. Will's exactly what Stella needs to stay away from. If he so much as breathes on Stella she could lose her spot on the transplant list. Either one of them could die. The only way to stay alive is to stay apart. But suddenly six feet doesn't feel like safety. It feels like punishment. What if they could steal back just a little bit of the space their broken lungs have stolen from them? Would five feet apart really be so dangerous if it stops their hearts from breaking too?

The Victorian Book of the Dead Dec 25 2020 Macabre tales of death and mourning in Victorian America.

Red Skin, White Masks Apr 09 2022 WINNER OF: Frantz Fanon Outstanding Book from the Caribbean Philosophical Association Canadian Political Science Association's C.B. MacPherson Prize Studies in Political Economy Book Prize Over the past forty years, recognition has become the dominant mode of negotiation and decolonization between the nation-state and Indigenous nations in North America. The term “recognition” shapes debates over Indigenous cultural distinctiveness, Indigenous rights to land and self-government, and Indigenous peoples' right to benefit from the development of their lands and resources. In a work of critically engaged political theory, Glen Sean Coulthard challenges recognition as a method of organizing difference and identity in liberal politics, questioning the assumption that contemporary difference and past histories of destructive colonialism between the state and Indigenous peoples can be reconciled through a process of acknowledgment. Beyond this, Coulthard examines an alternative politics—one that seeks to revalue, reconstruct, and redeploy Indigenous cultural practices based on self-recognition rather than on seeking appreciation from the very agents of colonialism. Coulthard demonstrates how a “place-based” modification of Karl Marx's theory of “primitive accumulation” throws light on Indigenous–state relations in settler-colonial contexts and how Frantz Fanon's critique of colonial recognition shows that this relationship reproduces itself over time. This framework strengthens his exploration of the ways that the politics of recognition has come to serve the interests of settler-colonial power. In addressing the core tenets of Indigenous resistance movements, like Red Power and Idle No More, Coulthard offers fresh insights into the politics of active decolonization.

Mistakes, Errors and Failures across Cultures Jun 18 2020 This volume provides comprehensible, strength-based perspectives on contemporary research and practice related to navigating mistakes, errors and failures across cultures. It addresses these concepts across cultural contexts and explores any or all of these three concepts from a positive psychology or positive organisational perspective, highlighting their potential as resources. The volume further discusses the consequences of errors and failures at individual, organisational and societal levels, ranging from severe personal problems to organisational and collective crises, perspectives how those can be turned into opportunities for contingent and sustainable improvement processes. The book shows that there are significant cultural differences in the understanding,

interpretation and handling of errors and failures. This volume provides practical guidance for transcultural understanding of mistakes, errors and failure through new models, ideas for self-reflection, therapeutic and counselling interventions and organisational change management processes. This book is a must for researchers and practitioners working on mistakes, errors and failures across cultures and disciplines!

The Laws of Simplicity Oct 03 2021 Ten laws of simplicity for business, technology, and design that teach us how to need less but get more. Finally, we are learning that simplicity equals sanity. We're rebelling against technology that's too complicated, DVD players with too many menus, and software accompanied by 75-megabyte "read me" manuals. The iPod's clean gadgetry has made simplicity hip. But sometimes we find ourselves caught up in the simplicity paradox: we want something that's simple and easy to use, but also does all the complex things we might ever want it to do. In *The Laws of Simplicity*, John Maeda offers ten laws for balancing simplicity and complexity in business, technology, and design—guidelines for needing less and actually getting more. Maeda—a professor in MIT's Media Lab and a world-renowned graphic designer—explores the question of how we can redefine the notion of "improved" so that it doesn't always mean something more, something added on. Maeda's first law of simplicity is "Reduce." It's not necessarily beneficial to add technology features just because we can. And the features that we do have must be organized (Law 2) in a sensible hierarchy so users aren't distracted by features and functions they don't need. But simplicity is not less just for the sake of less. Skip ahead to Law 9: "Failure: Accept the fact that some things can never be made simple." Maeda's concise guide to simplicity in the digital age shows us how this idea can be a cornerstone of organizations and their products—how it can drive both business and technology. We can learn to simplify without sacrificing comfort and meaning, and we can achieve the balance described in Law 10. This law, which Maeda calls "The One," tells us: "Simplicity is about subtracting the obvious, and adding the meaningful."

Grey Mask May 30 2021 Governess-turned-detective Miss Silver investigates a deadly conspiratorial ring Charles Moray has come home to England to collect his inheritance. The Handmaid's Tale May 18 2020 MOST LOVED. MOST RED. Ten must-read modern classics. 'Nolite te bastardes carborundorum. Don't let the bastards grind you down.' Imagine a world where women's bodies are controlled by men. Where society has descended into religious patriarchy and censorship. Where the environment has been destroyed and a powerful few hold the reins to all wealth and freedom. Welcome to Gilead. This is the story of Offred, a Handmaid forced into sexual servitude, in the country once known as the USA. Atwood's Handmaids have become a symbol of feminist resistance. This masterpiece blurs the boundaries between fiction and news headlines. WITH A NEW INTRODUCTION BY NAOMI ALDERMAN

Leaders at War Jan 14 2020 One of the most contentious issues in contemporary foreign policy—especially in the United States—is the use of military force to intervene in the domestic affairs of other states. Some military interventions explicitly try to transform the domestic institutions of the states they target; others do not, instead attempting only to reverse foreign policies or resolve disputes without trying to reshape the internal landscape of the target state. In *Leaders at War*, Elizabeth N. Saunders provides a framework for understanding when and why great powers seek to transform foreign institutions and societies through military interventions. She highlights a crucial but often-overlooked factor in international relations: the role of individual leaders. Saunders argues that leaders' threat perceptions—specifically, whether they believe that threats ultimately originate from the internal characteristics of other states—influence both the decision to intervene and the choice of intervention strategy. These perceptions affect the degree to which leaders use intervention to remake the domestic institutions of target states. Using archival and historical sources, Saunders concentrates on U.S. military interventions during the Cold War, focusing on the presidencies of Eisenhower, Kennedy, and Johnson. After demonstrating the importance of leaders in this period, she also explores the theory's applicability to other historical and contemporary settings including the post-Cold War period and the war in Iraq.

Everything, Everything Mar 08 2022 Risk everything . . . for love with this #1 New York Times bestseller. What if you couldn't touch anything in the outside world? Never breathe in the fresh air, feel the sun warm your face . . . or kiss the boy next door? In *Everything, Everything*, Maddy is a girl who's literally allergic to the outside world, and Olly is the boy who moves in next door . . . and becomes the greatest risk she's ever taken. My disease is as rare as it is famous. Basically, I'm allergic to the world. I don't leave my house, have not left my house in seventeen years. The only people I ever see are my mom and my nurse, Carla. But then one day, a moving truck arrives next door. I look out my window, and I see him. He's tall, lean and wearing all black—black T-shirt, black jeans, black sneakers, and a black knit cap that covers his hair completely. He catches me looking and stares at me. I stare right back. His name is Olly. Maybe we can't predict the future, but we can predict some things. For example, I am certainly going to fall in love with Olly. It's almost certainly going to be a disaster. *Everything, Everything* will make you laugh, cry, and feel everything in between. It's an innovative, inspiring, and heartbreakingly romantic debut novel that unfolds via vignettes, diary entries, illustrations, and more. And don't miss Nicola Yoon's *The Sun Is Also A Star*, the #1 New York Times bestseller in which two teens are brought together just when it seems like the universe is sending them in opposite directions.

If she is to win this battle, she must find the courage to face her destiny-and burn brighter than ever before. The third book in the #1 New York Times bestselling *Throne of Glass* series continues Celaena's epic journey from woman to warrior.

Online Games, Social Narratives Aug 13 2022 The study of online gaming is changing. It is no longer enough to analyse one type of online community in order to understand the plethora of players who take part in online worlds and the behaviours they exhibit. MacCallum-Stewart studies the different ways in which online games create social environments and how players choose to interpret these. These games vary from the immensely popular social networking games on Facebook such as Farmville to Massively Multiplayer Online Roleplaying Games to "Free to Play" online gaming and console communities such as players of Xbox Live and PS3 games. Each chapter deals with a different aspect of social gaming online, breaking down when games are social and what narrative devices make them so. This cross-disciplinary study will appeal to those interested in cyberculture, the evolution of gaming technology, and sociologies of media.

New Dimensions in Photo Processes Jan 26 2021 *New Dimensions in Photo Processes* invites artists in all visual media to discover contemporary approaches to historical techniques. Painters, printmakers, and photographers alike will find value in this practical book, as these processes require little to no knowledge of photography, digital means, or chemistry. Easy to use in a studio or lab, this edition highlights innovative work by internationally respected artists, such as Robert Rauschenberg, Chuck Close, Mike and Doug Starn, and Emmet Gowin. In addition to including new sun-printing techniques, such as salted paper and lumen printing, this book has been updated throughout, from pinhole camera and digital methods of making color separations and contact negatives to making water color pigments photo-sensitive and more. With step-by-step instructions and clear safety precautions, *New Dimensions in Photo Processes* will teach you how to: Reproduce original photographic art, collages, and drawings on paper, fabric, metal, and other unusual surfaces. Safely mix chemicals and apply antique light-sensitive emulsions by hand. Create imagery in and out of the traditional darkroom and digital studio. Relocate photo imagery and make prints from real objects, photocopies, and pictures from magazines and newspapers, as well as from your digital files and black and white negatives. Alter black and white photographs, smart phone images, and digital prints.

Game Feel Mar 16 2020 "Game Feel" exposes "feel" as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks where game design is concerned. They create the meta-sensation of involvement with a game. The understanding of how game designers create feel, and affect feel are only partially understood by most in the field and tends to be overlooked as a method or course of study, yet a game's feel is central to a game's success. This book brings the subject of feel to light by consolidating existing theories into a cohesive book. The book covers topics like the role of sound, ancillary indicators, the importance of metaphor, how people perceive things, and a brief history of feel in games. The associated web site contains a playset with ready-made tools to design feel in games, six key components to creating virtual sensation. There's a play palette too, so the designer can first experience the importance of that component by altering variables and feeling the results. The playset allows the reader to experience each of the sensations described in the book, and then allows them to apply them to their own projects. Creating game feel without having to program, essentially. The final version of the playset will have enough flexibility that the reader will be able to use it as a companion to the exercises in the book, working through each one to create the feel described.

Golden Gulag Feb 07 2022 Since 1980, the number of people in U.S. prisons has increased more than 450%. Despite a crime rate that has been falling steadily for decades, California has led the way in this explosion, with what a state analyst called "the biggest prison building project in the history of the world." *Golden Gulag* provides the first detailed explanation for that buildup by looking at how political and economic forces, ranging from global to local, conjoined to produce the prison boom. In an informed and impassioned account, Ruth Wilson Gilmore examines this issue through statewide, rural, and urban

perspectives to explain how the expansion developed from surpluses of finance capital, labor, land, and state capacity. Detailing crises that hit California's economy with particular ferocity, she argues that defeats of radical struggles, weakening of labor, and shifting patterns of capital investment have been key conditions for prison growth. The results—a vast and expensive prison system, a huge number of incarcerated young people of color, and the increase in punitive justice such as the "three strikes" law—pose profound and troubling questions for the future of California, the United States, and the world. *Golden Gulag* provides a rich context for this complex dilemma, and at the same time challenges many cherished assumptions about who benefits and who suffers from the state's commitment to prison expansion.

Stumpkin Dec 13 2019 From the critically acclaimed author and illustrator of *A Hungry Lion* comes a unique Halloween story about a stemless pumpkin who dreams of becoming a jack-o-lantern. Stumpkin is the most handsome pumpkin on the block. He's as orange as a traffic cone! Twice as round as a basketball! He has no bad side! He's perfect choice for a Halloween jack-o-lantern. There's just one problem—Stumpkin has a stump, not a stem. And no one seems to want a stemless jack-o-lantern for their window. As Halloween night approaches, more and more of his fellow pumpkins leave, but poor Stumpkin remains. Will anyone give Stumpkin his chance to shine?
