2019 Volume of the United States Tax Court

Reports containing case abstracts and opinions of the court regarding cases between July 1, 2013 and December 31, 2013. Cases in each volume are listed in the prefatory table. The United States Tax Court is a federal trial court of record established by Congress under Article I of the U.S. Constitution, section 8 providing (in part) that Congress has the power to "constitute Tribunals inferior to the Supreme Court. "The Tax Court specializes in adjudicating disputes over federal income tax, generally prior to the time at which formal tax assessments are made by the Internal Revenue Service. Though taxpayers may choose to litigate tax matters in a variety of legal settings, outside of bankruptcy, the Tax Court is the only forum in which taxpayers may do so without having first paid the disputed tax in full. Parties who contest the imposition of a tax may also bring an action in any United States District Court, or in the United States Court of Federal Claims; however these venues require that the tax be paid first, and that the party then file a lawsuit to recover the contested amount paid (the "full payment rule")."

The State-Capital Nexus in the Global Crisis

Feb 14 2022 In the wake of the outbreak of the global crisis in 2008, many observers expected the state to assume command over a faltering neoliberal finance-led model of capitalism. We now know that this expectation was by and large mistaken. There is indeed an ongoing recalibration of the state-capital relations, but in many instances the state has become more actively and more deeply involved in extending the reach of markets rather than in constraining markets in the interests of an equitable response to the crisis. This volume offers both theoretical perspectives and empirical studies by a selection of leading Critical International Political Economy scholars on the question how and to what extent we are witnessing a return of the state and a transition towards a new phase of global capitalism. The chapters cover a wide array of topics: from the rise of China and other emerging economies of the Global South, the role of state-owned enterprises such as Sovereign Wealth Funds and National Oil Companies and global environmental politics, to the role of labour in Europe and US grand strategy / foreign policy making in the post-Cold War period. This book was published as a special

issue of Globalizations.

Sovereign Wealth Jan 25 2023 As the first major collection of papers on sovereign wealth funds and state-owned enterprises, this book provides an essential guide to the geo-political impact of these pools of capital on global markets. The rise of sovereign wealth funds and state-owned enterprises represents a fundamental shift in market dynamics. The potential fusion of political and commercial imperatives raises unresolved geo-political questions that have been sharpened by the vaporization of credit markets as a consequence of the global financial crisis. State-controlled pools of capital have now eclipsed hedge funds and private equity in terms of funds under management, and the question of their regulation is therefore now of utmost importance. This book highlights the interplay

between legal, corporate and policy imperatives associated with the regulation of state capital. Including contributions from leading practitioners, policymakers and academics, it provides an essential guide to professionals and academics in the fields of finance and business. Contents: Introduction: Sovereign Wealth Funds in an Evolving Global Financial System (Renée Fry, Warwick McKibbin & Justin O'Brien) Structure and Impacts on the Global Economy: What is a Sovereign Wealth Fund? (Stephen Grenville) Sovereign Wealth Funds and Global Capital Flows: A Macroeconomic Perspective (Julie Kozack, Doug Laxton & Krishna Srinivasan) A Portfolio Analysis of Sovereign Wealth Funds (Christopher Balding) The Implications of Sovereign Wealth Fund Investment on Capital Markets: A Bottom-Up View (David G Fernandez) Regulation and Public Policy Issues: The Political Economy of Sovereign Wealth Funds (Avinish Persaud) Open Capital Markets and Sovereign Wealth Funds, Pension Funds, and State-Owned Enterprises (Adrian Blundell-Wignall & Gert Wehinger) Negotiating a Voluntary Code (David Murray) Legal Implications: Mapping the Trajectory of the Regulatory Debate: Securing
