Help graduate
students cope with
the pressures of
school, finances,
family, and
professors! In order

to succeed in
school: The college
undergraduate just
has to be able to
find and operate an
elevator in the
campus high-rise
The master's
degree student has
to climb the side of
the building The
PhD student doing
research with a
professor has to
jump over the
building in a single
bound, carrying the
professor That bit
of grim humor
contains a bitter
kernel of truth.
Helping Students
Adapt to Graduate
School is the first
book that focuses
on the unique
problems of
graduate students
and the best ways
to counsel and
support them.
Graduate and
professional schools
are draining -

emotionally,
financially, and
physically. In
addition to coping
with the pressures
of classes and high
performance
expectations, many
graduate students
juggle multiple
lives, trying to
please their
professors,
maintain their
status as adults,
pay for books and
classes and rent
and food, keep up a
pace to live,
preserve their
marriages, raise
their children, and
deal with their
parents, all while
they work as
teaching assistants,
resident advisors,
or research
assistants. When
adults return to
school, they may
find themselves
forced into a
childlike status,

causing considerable resentment or regression and sometimes reawakening old conflicts. Furthermore, the relationship of professors and graduate students is often complex and emotionally enmeshed, tinged with issues of respect, rivalry, and even romance. Not surprisingly, many graduate students find the conflicts overwhelming at times. With fascinating case studies and lucid explanations, *Helping Students Adapt to Graduate School* offers a clear look at the special difficulties of graduate students and practical ways the university can help,

including: fostering a sense of belonging providing year-round mental health services helping students handle financial pressures and career decisions supporting the unique needs of minority, international, married, and older students understanding the hidden subtext of faculty-student relationships encouraging a balance of family and school *Helping Students Adapt to Graduate School* is an essential resource for deans, administrators, professors, and counselors working with graduate students. By illuminating the complex interplay between the

university environment and the inner psychological life of graduate students, it will help you provide supportive services to the students in your campus community. Are you considering graduate school as a way to further your career? Are you already pursuing an advanced degree part time? If so, *Surviving Graduate School Part Time* is a must read. If you are at the point in your career when a graduate degree is needed as a professional credential, the prospect of graduate school may seem daunting and ill-timed. You may already work long hours in order to establish your

career and have probably made major financial commitments, such as the purchase of a home, or an automobile, in addition to paying off undergraduate loans. This practical volume addresses the concerns of the working professional seeking a graduate degree while trying to maintain career and family responsibilities. The helpful information, advice, and short cuts author Von V. Pttman provides are gleaned from nearly 20 years of service in the continuing education divisions at three major state universities. Beginning with an overview of the development of graduate school as

a part-time phenomenon, the author goes on to explore practical matters such as choices of schools and programs as well as strategies to help cut through or cope with university bureaucracies and financing. The author also includes appendixes that provide valuable information regarding regional accrediting associations, academic guidelines, entrance exam preparation, and financial aid. "This book is lewd, rude and superb! Frank and Stein have written the first guide to grad school from a student's point of view; and the result is an irreverent,

humorous and USEFUL book of advice. These foul-mouthed sages will help you get through a master's or doctoral program more quickly, with fewer blunders and less angst. I plan to recommend this book to all the graduate students I coach and teach." - Mary McKinney, Ph.D. Clinical Psychologist and Dissertation Coach <http://www.successfulacademic.com> Yes, sports fans!, er, grad school fans Bad boys Fred and Karl are back with an updated version of their best selling self-help guide for grad students. This New and/or Improved Version is stocked with additional content, more lame attempts at humor, and a

lower price (Karl threatened to moon the publisher unless his demands were met). Written with the attitude of a couple ill-mannered schoolboys who exhibit the insight and genius of the Ph.D.'s who wrote it, *Playing the Game* simplifies even the most complex aspects of grad school. Authors Frank and Stein have broken down *Playing The Game* into three hilarious and straightforward sections: *Getting In*, *Getting Through*, and *Getting the Hell Out*. In whatever stage of graduate school you find yourself, rest assured that you will never again grumble, "If only I had known! If only someone had

explained this @%#! to me sooner!" *Playing the Game* simplifies the entire graduate school experience while imparting comically relevant stories and translating complicated graduate school jargon. This self-help guide helps grad students to comprehensively navigate their graduate school journey from application to matriculation. Unlike most of the material you'll be reading in grad school, *Playing the Game* is actually intelligible. www.playing-the-game.com Aimed at college and university students in all major fields of study, this book covers everything

one needs to know about how to apply successfully to graduate school in North America. Graduate research is a complicated process, which many undergraduate students aspire to undertake. The complexity of the process can lead to failures for even the most brilliant students. Success at the graduate research level requires not only a high level of intellectual ability but also a high level of project management skills. Unfortunately, many graduate students have trouble planning and implementing their research. *Project Management for Research: A Guide*

for Graduate Students reflects the needs of today's graduate students. All graduate students need mentoring and management guidance that has little to do with their actual classroom performance. Graduate students do a better job with their research programs if a self-paced guide is available to them. This book provides such a guide. It covers topics ranging from how to select an appropriate research problem to how to schedule and execute research tasks. The authors take a project management approach to planning and

implementing graduate research in any discipline. They use a conversational tone to address the individual graduate student. This book helps graduate students and advisors answer most of the basic questions of conducting and presenting graduate research, thereby alleviating frustration on the part of both student and advisor. It presents specific guidelines and examples throughout the text along with more detailed examples in reader-friendly appendices at the end. By being more organized and prepared to handle basic research management functions, graduate

students, along with their advisors, will have more time for actual intellectual mentoring and knowledge transfer, resulting in a more rewarding research experience. The second edition of this highly successful book helps psychology students plan and prepare for graduate study at every step of the application process. Handy resource devoted to important, commonly asked questions and concise, to-the-point answers that bring students up to speed on the process of applying for graduate study. Features a series of specific questions and detailed answers about key

elements of the application process. Provides additional practical tools in the Appendices such as a timetable for completing preparation, descriptions of the different concentrations in psychology, a worksheet for comparing graduate programs, and ranking information on graduate programs in psychology in US and Canada. Helps students make wise choices at critical points in preparing their application dossiers. Veteran higher-education consultant Donald Asher demystifies the graduate school application process and offers a detailed action plan that has proved successful for some

of the most competitive programs in the country. The 50 sample essays—selected from thousands of candidates—showcase the best of the best, while the Essay Hall of Shame identifies common pitfalls to avoid. Sample letters of recommendation and essays for scholarships, residencies, fellowships, and postgraduate and postdoctoral applications cover all stages of the application process. Teaches how to craft a winning essay with 50 state-of-the-art samples to inspire, instruct, and all but guarantee a top-of-the-pile application. Updated third

edition includes an entirely new chapter dedicated to online applications and how they're managed, processed, and considered. Previous editions have sold 100,000 copies. An essential handbook to the unwritten and often unspoken knowledge and skills you need to succeed in grad school. Some of the most important things you need to know in order to succeed in graduate school—like how to choose a good advisor, how to get funding for your work, and whether to celebrate or cry when a journal tells you to revise and resubmit an article—won't be covered in any

class. They are part of a hidden curriculum that you are just expected to know or somehow learn on your own—or else. In this comprehensive survival guide for grad school, Jessica McCrory Calarco walks you through the secret knowledge and skills that are essential for navigating every critical stage of the postgraduate experience, from deciding whether to go to grad school in the first place to finishing your degree and landing a job. An invaluable resource for every prospective and current grad student in any discipline, *A Field Guide to Grad School* will save you grief—and help you

thrive—in school and beyond. Provides invaluable advice about how to: Choose and apply to a graduate program Stay on track in your program Publish and promote your work Get the most out of conferences Navigate the job market Balance teaching, research, service, and life Applying to Graduate School in Psychology provides prospective graduate students with the insider knowledge needed to bolster their confidence and gain a competitive edge. This comprehensive resource shares personal accounts from both peer and expert perspectives to fully illustrate the ins and outs of

applying and preparing for the graduate school experience. As future professionals in psychology, readers will greatly benefit from the straightforward and personal guidance offered by the student and psychologist contributors. Potential applicants learn the commonalities and differences among diverse student experiences from a variety of academic institutions and programs. This student-to-student format offers familiarity and identification with those who have successfully enrolled in graduate programs across the country. Each chapter presents practical

advice, key information, and encouragement, while describing the dos and don'ts of applying. In the psychologist-written essays, renowned professionals share their academic and career development stories and provide meaningful insight into the rewards and challenges of the field. The contributors' infectious passion for psychology will inspire readers to further their education and narrow down their program of choice. American graduate education is in disarray. Graduate study in the humanities takes too long and those who succeed face a dismal academic job market.

Leonard Cassuto gives practical advice about how faculty can teach and advise students so that they are prepared for the demands of the working worlds they will join, inside and outside the academy. This book provides information on graduate programs in the United States and Canada to students and professionals who are interested in attending post-baccalaureate education in criminology or criminal justice. The book contains information for each program and includes both brick-and-mortar and online programs. An introduction and a section on potential

employment options provide context. Navigating academia can seem like a voyage through a foreign land: strange cultural rules dictate everyday interactions, new vocabulary awaits at every turn, and the feeling of being an outsider is unshakable. For students considering doctoral programs and doctoral students considering faculty life, *The PhDictionary* is a lighthearted companion that illuminates the often opaque customs of academic life. With more than two decades as a doctoral student, college teacher, and administrator,

Herb Childress has tripped over almost every possible misunderstood term, run up against every arcane practice, and developed strategies to deal with them all. He combines current data and personal stories into memorable definitions of 150 key phrases and concepts graduate students will need to know (or pretend to know) as they navigate their academic careers. From ABD to white paper—and with buyout, FERPA, gray literature, and soft money in between—each entry contains a helpful definition and plenty of relevant advice. Wry and knowledgeable,

Childress is the perfect guide for anyone hoping to scale the ivory tower. Graduate Study in Psychology is the best source of information related to graduate programs in psychology and provides information related to more than 600 graduate programs in psychology in the U.S. and Canada. Graduate Study in Psychology contains information about number of applications received by a program number of individuals accepted in each program dates for applications and admission types of information required for an application (GRE scores, letters of recommendation,

documentation concerning volunteer or clinical experience, etc.) in-state and out-of-state tuition costs availability of internships and scholarships employment information of graduates orientation and emphasis of departments and programs plus other relevant information. By fixing the PhD, we can benefit the entire educational system and the life of our society along with it. Many graduate students continue to be regarded as 'apprentices' despite the fact that they are expected to design and teach their own classes, serve on university committees, and

conference and publish regularly. The Chronicle of Higher Education reports that the attrition rate for American Ph.D. programmes is at an all-time high, between 40% and 50% (higher for women and minorities). Of those who finish, only one in three will secure tenure-track jobs. These statistics highlight waste: of millions of dollars by universities and of time and energy by students. Rather than teaching graduate students how to be graduate students, then, the guide prepares them for what they really seek: a successful academic career. Written for undergraduate

students and other prospective counselors, *A Guide to Graduate Programs in Counseling* is the first of its kind to create a comprehensive, reliable means of learning about the counseling profession, entry level preparation (i.e., master's degrees in counseling specializations), and what to consider when searching for, applying to, and ultimately selecting a graduate program in counseling that is the "perfect fit." The Guide offers vital information relative to accreditation and its importance in the counseling profession with regards to

obtaining licensure, certification, and even employment opportunities after graduating. As a CACREP publication, this book is the official source of information about accredited counseling programs and includes information about what counseling programs seek in candidates, what programs can offer students in terms of professional development and job placement, and guidance on personal and practical considerations for entering the counseling profession. Authored by counseling experts and featuring insights from voices

in the field, *A Guide to Graduate Programs in Counseling* is a must-have resource for anyone interested in becoming a professional counselor. This text is an official publication of the Council for Accreditation of Counseling and Related Educational Programs (CACREP), the counseling profession's recognized accreditation body. The book fulfills a need for individuals considering a career in the counseling profession. Counselors comprise 37% of all helping professions, the largest of all professions that include social

workers, psychologists, psychiatrists, and marriage and family therapists (Centers for Medicare and Medicaid Services, 2014). The counseling profession is projected to grow 29% between 2012-2022, faster than the average for all occupations according to the Bureau of Labor Statistics. What does it take to get into and through graduate school? What special challenges, opportunities, and issues face an African American graduate student? *The African American Student's Guide to Surviving Graduate School* offers a practical roadmap to help African American

students get the most out of their graduate school experience. The book covers a number of issues, including creating a program of study, financial aid, and the dissertation process. Author Alicia Isaac thoroughly covers the entire graduate process, offering case studies, anecdotes, words of wisdom from prominent African Americans, checklists, and self-assessment scales to provide a useful guide for students involved in or considering graduate study. What does it really take to get a job in academia? Do you want to go to graduate school? Then you're in good company: nearly

80,000 students will begin pursuing a PhD this year alone. But while almost all new PhD students say they want to work in academia, most are destined for something else. The hard truth is that half will quit or fail to get their degree, and most graduates will never find a full-time academic job. In *Good Work If You Can Get It*, Jason Brennan combines personal experience with the latest higher education research to help you understand what graduate school and the academy are really like. This candid, pull-no-punches book answers questions big and small, including • Should I go to graduate

school—and what will I do once I get there? • How much does a PhD cost—and should I pay for one? • What does it take to succeed in graduate school? • What kinds of jobs are there after grad school—and who gets them? • What happens to the people who never get full-time professorships? • What does it take to be productive, to publish continually at a high level? • What does it take to teach many classes at once? • How does "publish or perish" work? • How much do professors get paid? • What do search committees look for, and what turns them off? • How do I know which journals and book

publishers matter? • How do I balance work and life? This realistic, data-driven look at university teaching and research will help make your graduate and postgraduate experience a success. *Good Work If You Can Get It* is the guidebook that anyone considering graduate school, already in grad school, starting as a new professor, or advising graduate students needs. Read it, and you will come away ready to hit the ground running. When it comes to a masters or PhD program, most graduate students don't deliberately set out to fail. Yet, of the nearly 500,000 people who start a graduate

program each year, up to half will never complete their degree. Books abound on acing the admissions process, but there is little on what to do once the acceptance letter arrives. Veteran graduate directors Kevin D. Haggerty and Aaron Doyle have set out to demystify the world of advanced education. Taking a wry, frank approach, they explain the common mistakes that can trip up a new graduate student and lay out practical advice about how to avoid the pitfalls. Along the way they relate stories from their decades of mentorship and even share some slip-ups from their

own grad experiences. Using qualitative data collected from more than twenty universities across the US, *Writing Support for International Graduate Students* describes and theorizes agency- and advocacy-driven practices, programs, and policies that are most effective in helping international students learn graduate-level writing and communication skills. It uses compelling narratives and cases to illustrate a variety of program models and support practices that fostered the students' process of academic transition and success.

Employing an ecological framework, the book seeks to advance academic conversation about how writing scholars/instructors and program administrators, as well as other academic service professionals working with this student body, can formulate policies, develop programs, and implement practices that best help these students grow as writers and scholars in their disciplines. "The best source of information for more than 1,500 graduate programs in psychology offered at over 500 schools and departments in the United States and Canada."-- This guide helps faculty

and student affairs practitioners better serve graduate and professional school students as they navigate what can be an isolating, taxing, and unfamiliar context. Providing actionable strategies, as well as a common language for practitioners to advocate for themselves and for their students, this book is a quick start manual that defines current issues around graduate and professional student development. Drawing together current resources and research around post-baccalaureate student outcomes, this book explores the diverse student needs of graduate

and professional students and provides a clear understanding of their social, personal, and psychological development and how to support their success. Case studies showcase specific examples of practice including a holistic development model for graduate training; integrating academic, personal, professional, and career development needs; promising practices for engagement; a diversity, equity, and inclusion approach to access and outcomes; how graduate schools can be important partners to student affairs professionals; and examples of

assessment in action. This book provides tools, resources, communication strategies, and actionable theory-to-practice connections for practitioners, professionals, and faculty at all levels who work to support post-baccalaureate student thriving. Appendix available for download online at www.routledge.com/9780367639884 on the tab that is entitled "Support Material." Offers guidance for people starting a career in academia, including tips for writing a dissertation, job hunting, teaching, researching, and information on the process of getting tenure. This

resource book consists of ten chapters written by sixteen graduate student authors and two academic professional staff members. Each chapter is accompanied by a short video that dramatizes the theme along with probing discussion questions. The chapter topics include seeking funding, the challenges of the first year of graduate school, finding a thesis advisor, working with thesis committee members, balancing family and graduate student life, and life after graduate school. Where these subjects have been treated in an academic style many times, this

book conveys its message through personal narratives of the challenging circumstances its graduate student authors encountered and solved. It does not give its readers long lists of statistics about graduation rates or most advantageous actions for best outcomes. What it does instead is provide readers with a vivid sense of the types of life experiences one can expect to encounter when undertaking a graduate degree and the opportunity to discuss these real-life issues with others. The book was started and developed as a project under the Midwest Crossroads Alliance

for Graduate Education and the Professoriate (AGEP) and completed as part of the professional development activities under the Committee on Institutional Cooperation (CIC) AGEP. Published by the American Geophysical Union as part of the Special Publications Series. Graduate school can be an exciting, challenging time for students, but it can be scary and intimidating at the same time. Navigating Graduate School and Beyond: A Career Guide for Graduate Students and a Must Read for Every Advisor outlines the steps and skills necessary to succeed in

graduate school and in your career. "Insider tips" help students better understand their advisors, leading to more productive advisor/student relationships. The importance of sowing well now with good habits and management techniques in order to reap big later is the central focus of the volume. Despite continued growth in enrollments, graduate program attrition rates are of great concern to academic program coordinators. It is estimated that only 40 to 50 percent of students who begin Ph.D. programs complete their degrees. This book describes programs, initiatives, and interventions that

lead to overall student retention and success. Written for graduate school administrators, student affairs professionals, and faculty, this book offers ways to better support today's graduate student population, addresses the needs of today's changing student demography and considers the challenges today's graduate students face inside and outside of the classroom. The opening section highlights the shifting demographics and contextual factors shaping graduate education over the past 20 years, while the second describes institutional

practices to develop the requisite academic and professional development necessary to succeed in master's and doctoral programs. In conclusion, the editors curate a conversation about different ways institutions can support graduate students beyond the classroom. Whether you are considering applying to graduate school, already enrolled, or would simply like to know more about continuing your education, this is the book for you. This practical guide prepares graduate students of color for their first job in academia and offers strategies for succeeding in the early years of a

tenure-track position. Through the voices of faculty who have experienced the rigors of the job search and a career in academia, *Beginning a Career in Academia* offers advice for graduate students of color on how to transition from graduate school to an academic position. This inclusive volume shares perspectives that vary based on gender, racial, ethnic, generational, and disciplinary backgrounds, giving readers an opportunity to reflect on successful strategies for career readiness and for dealing with marginalization. The authors provide

recommendations and tips to enhance the job search, identify campus fit, prepare for the interview and negotiation process, address dynamics of racial and gender politics, find work-life balance, and demystify the promotion and tenure process. This must-read provides candid advice and mentorship for any graduate students of color embarking on a career in academe.
