***AACN Core Curriculum for Progressive and Critical Care Nursing - E-Book Sep 05 2021***

***Get ready for clinical practice in progressive and critical care nursing with this definitive resource! From the experts at the American Association of Critical-Care Nurses, the AACN Core Curriculum for Progressive and Critical Care Nursing, 8th Edition covers the***

***knowledge and skills needed to prepare for the CCRN® and PCCN® certification examinations and to provide safe and effective care in progressive and critical care settings. Content in this edition corresponds to the most recent CCRN® and PCCN® exam blueprints and reflects the latest in evidence-based practice. With its clear outline format and comprehensive coverage of nursing competencies, this text is both a convenient clinical reference and a valuable study tool. Experts at the American Association of Critical-Care Nurses (AACN) provide the definitive reference for progressive and critical care nursing care of adults. Concise outline format makes information easy to find and easy to digest. Basic to advanced levels of coverage emphasizes clinical nursing practice, preparing you with the full range of knowledge needed for optimal patient care in progressive and critical care settings. Key content in each body systems chapter includes an anatomy and physiology review, assessment, patient care, and specific patient health problems. Expert Tips and Key Concepts boxes highlight important content and serve as a quick reference. A companion to the AACN Procedure Manual, this book is a cornerstone of Elsevier's partnership with the leading***

***organization in critical and acute care nursing, providing a guide to essential nursing competencies. NEW! Updated content corresponds to the most recent CCRN® and PCCN® examination blueprints and reflects the latest research evidence, clinical studies, national and international treatment protocols, the AACN/ANA scope of practice, and AACN's ECCO 3.0. NEW! Updated table of contents, chapter format, and full-color design make the book easier to read and use. NEW! Additional full-color illustrations, boxes, and tables enhance understanding and provide quicker access to need-to-know information in clinical practice.***

***Youmans and Winn Neurological Surgery Dec 16 2019 Widely regarded as the definitive reference in the field, Youmans and Winn Neurological Surgery offers unparalleled, multimedia coverage of the entirety of this complex specialty. Fully updated to reflect recent advances in the basic and clinical neurosciences, the 8th Edition covers everything you need to know about functional and restorative neurosurgery, deep brain stimulation, stem cell biology, radiological and nuclear imaging, and neuro-oncology, as well***

***as minimally invasive surgeries in spine and peripheral nerve surgery, and endoscopic and other approaches for cranial procedures and cerebrovascular diseases. In four comprehensive volumes, Dr. H. Richard Winn and his expert team of editors and authors provide updated content, a significantly expanded video library, and hundreds of new video lectures that help you master new procedures, new technologies, and essential anatomic knowledge in neurosurgery. Discusses current topics such as diffusion tensor imaging, brain and spine robotic surgery, augmented reality as an aid in neurosurgery, AI and big data in neurosurgery, and neuroimaging in stereotactic functional neurosurgery. 55 new chapters provide cutting-edge information on Surgical Anatomy of the Spine, Precision Medicine in Neurosurgery, The Geriatric Patient, Neuroanesthesia During Pregnancy, Laser Interstitial Thermal Therapy for Epilepsy, Fetal Surgery for Myelomeningocele, Rehabilitation of Acute Spinal Cord Injury, Surgical Considerations for Patients with Polytrauma, Endovascular Approaches to Intracranial Aneurysms, and much more. Hundreds of all-new video lectures clarify key concepts in techniques, cases, and surgical management and***

***evaluation. Notable lecture videos include multiple videos on Thalamotomy for Focal Hand Dystonia and a video to accompany a new chapter on the Basic Science of Brain Metastases. An extensive video library contains stunning anatomy videos and videos demonstrating intraoperative procedures with more than 800 videos in all. Each clinical section contains chapters on technology specific to a clinical area. Each section contains a chapter providing an overview from experienced Section Editors, including a report on ongoing controversies within that subspecialty.***

***This updated and refined new edition is the only book to provide a comprehensive approach to the intensive care of neurologically injured patients from the emergency room and ICU through the operating room and post-surgical period. It reviews neuroanatomy, neuroradiology, and neurophysiology, examines the neurological problems most frequently seen in intensive care, and describes the various types of neurosurgery. General issues are discussed, such as cardiac care, fluids and electrolytes, nutrition, and monitoring as well as more specific conditions and complications including elevated intracranial pressure, seizures, and altered mental states.***

**Geothermal, Wind and Solar Energy Applications in Agriculture and Aquaculture**  
**Jul 23 2020** The agri-food chain consumes about one third of the world's energy production with about 12% of it for crop production and nearly 80% for processing, distribution, retail, preparation and cooking. The agri-food chain also accounts for 80-90% of total global freshwater use where 70% alone is for irrigation. Additionally, on a global scale, freshwater production consumes nearly 15% of the entire energy production. It can therefore be argued that making agriculture and the agri-food supply chain independent from fossil fuel use has a huge potential to contribute to global food security and climate protection not only for the next decades but also for the coming century. Provision of secure, accessible and environmentally sustainable supplies of water, energy and food must thus be a priority. One of the major objectives of the world's scientists, farmers, decisions makers and industrialists is to overcome the present dependence on fossil fuels in the agro-food sector. This dependency increases the volatility of food prices and affects economic access to sustenance. This

***book provides a critical review of recent developments in solar, wind and geothermal energy applications in agriculture and the agro-food sector such as processing, distribution, retail, preparation and cooking.***

***Interventional Neuroradiology Mar 31 2021 Interventional Neuroradiology, Volume 179, provides a basic outline of the field of interventional neuroradiology that is accessible to fellows, residents, clinicians and researchers in various disciplines, from diagnostic and interventional radiology to vascular neurology, general and vascular neurosurgery, and vascular biology. This volume offers a timely update to experienced clinical practitioners in a logical, easy-to-follow format. Content includes neurovascular anatomy, vascular biology, neurovascular physiology, vascular imaging, as well as sections on the diagnosis and therapeutic treatment of neurovascular disease. Explores the general scope of current clinical interventional neuroradiology, both for endovascular and percutaneous image-guided diagnosis and interventions in a variety of pathologies Defines basic physiological principles (e.g., cerebral perfusion pressure, intracranial pressure, vasospasm, tissue osmolality) with reference to those most***

***scope and opportunities for improvements are significant. To further the effort for sustainable development, a conference on Sustainable Construction Materials and Technologies was held at Coventry University, Coventry, U.K., from June 11th - 13th, 2007, to highlight case studies and research on new and innovative ways of achieving sustainability of construction materials and technologies. This book presents selected, important contributions made at the conference. Over 190 papers from over 45 countries were accepted for presentation at the conference, of which approximately 100 selected papers are published in this book. The rest of the papers are published in two supplementary books. Topics covered in this book include: sustainable alternatives to natural sand, stone, and Portland cement in concrete; sustainable use of recyclable resources such as fly ash, ground municipal waste slag, pozzolan, rice-husk ash, silica fume, gypsum plasterboard (drywall), and lime in construction; sustainable mortar, concrete, bricks, blocks, and backfill; the economics and environmental impact of sustainable materials and structures; use of construction and demolition wastes, and organic materials (straw bale, hemp, etc.) in construction; sustainable use of***

***knowledge on anatomy and physiology of swallowing, assessment of swallowing, and treatment of dysphagia. It's an easy-to-read, one-stop resource for staying up to date in this high-demand area. Features up-to-date information on assessment of swallowing, including the physical exam, FEES, TNE, MBSS, Barium Esophagram, and HRM. Offers current coverage of dysphagia treatment, including Neurologic Dysphagia; Chemoradiation-induced Dysphagia; Epiglottic Dysfunction; Cervical Osteophytes; Glottic Insufficiency; Cricopharyngeal Achalasia; Zenker's Diverticulum; Dysphagia After Laryngectomy; Esophageal Dysphagia; Eosinophilic Esophagitis; and Swallowing Therapy. Discusses future directions in dysphagia treatment. Consolidates today's available information on this timely topic into one convenient resource.***

***Field Evaluation of Corrosion Inhibitors for Concrete Feb 27 2021 One hundred and fifty-six exposure slabs have been constructed with and without a variety of combinations of corrosion inhibiting admixtures and topically applied inhibitors. To accelerate corrosion one hundred and thirty-six of the slabs were constructed with concrete that surrounded the top mat of reinforcement with chloride***

**contents of 3,6, 10, and 15 Ib/yd<sup>3</sup> (1.8,3.5,5.9, and 8.9 kg/m<sup>3</sup>). This paper presents the results from measurements made on the slabs in May 1998 after approximately 1 year of exposure. The measurements show that as the chloride ion content in the slabs increases, the macrocell current, macrocell potential, half-cell potential, and rate of corrosion increase and the resistance decreases. Macrocell currents exceed 10  $\mu$ A, indicating corrosion activity, in slabs cast with chloride in the concrete except those with 3 Ib/yd<sup>3</sup> (1.8 kg/m<sup>3</sup>) of chloride that were overlayed and patched or patched. Measurements taken to determine the rate of corrosion indicate high, moderate, low, and passive states of corrosion in 63,22, 12, and 3 percent, respectively, of the slabs. The measurements also show no significant difference between the slabs repaired with and without corrosion inhibitor admixtures and topical treatments. Slabs repaired with 7% silica fume showed half-cell potentials that were less negative than those repaired without silica fume.**
