Marc Jacob analyses in depth the most important justificatory and decision-making tool of one of the world's most powerful courts. This successful textbook remains the only offering for students of European company law, and has been fully updated. This is a legal evaluation of the ways in which the EU delivers policy. It assesses the role of law therein from a contextual and interdisciplinary perspective and considers in-depth the principles of EU judicial review applicable to EU administration and that of the Member States. Holyoak and Torremans Intellectual Property Law provides a complete introduction and overview of UK intellectual property law. It examines how the law has developed through key statutory provisions and leading cases, and highlights the increasing influence of the EU and other international jurisdictions in shaping the law in its global context. Economic analysis rarely appears on the judicial horizon in intellectual property litigation. In competition cases, by contrast, economists are familiar figures in the courtroom and the language of economics is scattered throughout the judgments of

even the highest courts. One might expect, therefore, that refusals to license intellectual property would generate the same fruitful symbiosis between law and economics when those refusals surface in competition proceedings. This however, has not been how the law on this subject has developed in most jurisdictions. Courts and enforcement agencies faced with a unilateral refusal to license have instead tended to retreat into sketchily articulated black letter rules and presumptions which then have to be fenced off from the rest of competition law by economically irrelevant qualifications and distinctions based on private law categorisations of, and rationales for, individual intellectual property rights. This bypassing of case-by-case analysis in favour of more traditional modes of legal reasoning is not entirely the fault of lawyers. Economists have contributed to this state of affairs by urging judges and regulators to convert empirically undernourished theories about the proper role of intellectual property in a market economy into rules of law and evidentiary presumptions intended to be binding in future cases. How this came about and what it means for the future of effective competition enforcement globally are the twin concerns of this book. This significantly revised and updated second edition addresses the rapid development of EU copyright law in relation to the advancement of new technologies, the need for a borderless digital market and the considerable number of EU legal instruments enacted as a result. Taking a comparative approach, the Commentary provides comprehensive coverage and in-depth commentary on each of the EU legal instruments and policies, both from an EU and an international perspective. Alongside full legislative analysis and article-by-article commentary, the Commentary illustrates the underlying basic principles of free movement and non-discrimination and provides insights into the influence of copyright on other areas of EU policy, including telecoms and bilateral trade agreements. A unique perspective on intellectual property law. It examines the complex policies that inform and guide modern intellectual property law at the domestic (including Scottish), European and international levels, giving the reader a true insight into the

discipline and the shape of things to come. Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning...[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the bitingly satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition. "a reference book in this area of EU competition law and a must-have companion for academics, enforcers and practitioners alike, as well as EU and national judges." Judge Nils Wahl, Court of Justice of the European Union

This seminal text offers an authoritative and integrated treatment of the legal and economic principles that underpin the application of Article 102 TFEU to the behaviour of dominant firms. Traditional concerns of monopoly behaviour, such as predatory pricing, refusals to deal, excessive pricing, tying and bundling, discount practices and unlawful discrimination are treated in detail through a review of the applicable economic principles, the case law and decisional practice and more recent economic and legal writings. In addition, the major constituent elements of Article 102 TFEU, such as market definition, dominance, effect on trade and applicable remedies are considered at length. The third edition involves a net addition of over 250 pages, with a substantial new chapter on Abuses In Digital Platforms, an extensively revised chapter on standards, and virtually all chapters incorporating substantial revisions reflecting key cases such as Intel, MEO, Google Android, Google Shopping, AdSense, Qualcomm. This book provides a comprehensive practitioner guide to the EU law

of State aid, covering all relevant legislation, case law, and the dominant themes shaping EU State aid policy. It discusses the concept of State aid and its development in the European Union, as well as practical aspects such as procedures for notification to the European Commission, and enforcement in the European Court and national courts. It offers extensive coverage of specific sectors, including transport and shipbuilding, media and communications, energy and environmental protection, culture and heritage, and agriculture. The third edition is fully updated to cover the extensive legislative changes in this area, including the new General Block Exemption Regulation and De Minimis Regulation, horizontal aid guidelines, and sectoral guidelines for aviation, cinemas, agriculture, and fisheries; as well as State aid cases in the national courts, particularly the UK, and recent European Court jurisprudence. Accessible to competition lawyers and non-specialists, the book's clarity and concision make it an invaluable reference to this area of law.

The European Union (EU) Merger Directive removes certain tax disadvantages encountered by companies and their shareholders in the course of a restructuring operation. However, in spite of amendments and European Court of Justice's (ECJ) interpretations of its provisions, various shortcomings remain. This thoroughgoing analysis, broader and deeper than any prior work on the subject, addresses all the Directive's subtopics methodically, following the paragraphs of Articles 1-15 in their logical succession. The author analyses the points in which the Merger Directive falls short of attaining its stated objective, and he also examines how these shortcomings could be scaled. To do so, he tests the Merger Directive against its own objective, primary EU law (the fundamental freedoms and the unwritten general principles of EU law) and non-discrimination provisions in relevant treaties. Each of the following questions is addressed and responded to in depth: - Which entities have access to the Merger Directive and which entities should have access to it? - Which operations are covered by the Merger Directive and which operations should be covered? - Which tax disadvantages to cross-border restructuring operations does the Merger Directive aim to remove, which tax

disadvantages have been actually removed, which tax disadvantages remain, and how should the Merger Directive be amended to remove the remaining tax disadvantages? – How tax avoidance should be combated under Article 15(1)(a) of the Merger Directive, which possible types of tax avoidance can be identified, and how the Merger Directive should be amended? – Which cases of double taxation does a taxpayer engaging in cross-border restructuring operations potentially encounter, and how they can be taken away by the Merger Directive? The key shortcomings that are identified are: the Merger Directive's objective is not stated precisely; minimum harmonisation does not lead to a common tax system; exhaustive lists are used as legislative technique; the Merger Directive does not add much to the outcomes reached through negative harmonisation; and the definitions of qualifying operations are not fully aligned with corporate law. Chapter 6 contains a deeply informed and viable proposal for the amendment of the Merger Directive. This is the first treatment not only to evaluate the Directive's efficacy in detail but also to offer real solutions to its shortcomings. It will be welcomed by policymakers, judges, practitioners and academics, and the recommendations it contains are sure to affect ongoing amendments and jurisprudence on the Merger Directive. This book provides a detailed examination of the law and practice of the preliminary reference procedure in EU law. It is designed to be of practical use in litigation and case preparation. An Introduction to e-Business provides the contemporary knowledge of the key issues affecting the modern e-business environment and links theory and practice of management strategies relating to e-business. This book brings together the most cogent themes for an introduction to e-business and constitutes a valuable contribution to formalising common themes for teaching the subject in higher education. These concepts are further explored in the six case studies that follow the set chapters. This new textbook integrates the main themes to provide a complete picture of the key elements relevant to an introductory text in e-business. To

fully appreciate the e-business environment it is necessary to understand the links between the different disciplines that come together to form Mapping appropriately the content of courses on EC competition law, this book guides students through a wide range of carefully chosen cases and materials with insightful commentary and analysis. This is a complete stand-alone resource designed for use on EC competition law courses.

European Intellectual Property Law offers a full account of the main areas of substantive European intellectual property law - including the law of copyright and related rights, patents and plant variety rights, trademarks, design rights, and rights in data and information. An in-depth and detailed examination of, and commentary on the key areas of institutional and of substantive EU law covered on most EU law syllabi, this new textbook successfully combines authoritative text with all of the latest case summaries and judgments. This textbook provides an account of intellectual property law. The underlying policies influencing the direction of the law are explained and explored and contemporary issues facing the discipline are tackled head-on. The international and European dimensions are covered together with the domestic position. The involvement of the EU in regulating private conduct and relationships between individuals is increasing. As a result, EU law affects the scope of private autonomy in ever wider contexts, sparking tensions with fundamental concepts of national private law systems. This volume offers a descriptive and normative account of the involvement of EU law in private law relationships. The recurring theme in the collected papers is the scope of policy objectives which are apt to legitimise the European Union's as yet unsystematic tendency to serve as a source of restrictions of private autonomy. The nature and purpose of the involvement of European Union law in private law relationships is investigated by the authors from both the substantive and the constitutional perspective. The papers look at such sectors regulating private law relationships as consumer law, labour law, competition law, equal treatment law and the law of remedies. While focusing on private law relationships the authors investigate more general

concepts of EU law, such as the Internal Market freedoms and general principles of law, and the different modes of ensuring the effective application of EU secondary law. "Ms. Penner does an excellent job of presenting the information and using case examples to increase the readers understanding of the various concepts. While I expected this book to be informative I was surprised by how interesting it is. I would highly recommend this book to any nurse entrepreneur."--Nurse Entrepreneur Network

"This is an excellent book for an undergraduate nursing program."--Doody's Medical Reviews

This is a key health care financial management textbook designed to build the economics and financial management skills nurses and nurse leaders need to use daily. This second edition provides several new features that will add to its value as a timely and highly relevant text for RN-to-BSN, BSN, and MSN students in a variety of academic nursing programs. It is aligned with the standards established by AONE, AACN, and other health care professional organizations for economics and financial management education. The text has been significantly revised to simplify its content and to be useful within both traditional in-class formats and hybrid and on-line distance courses and programs. The book provides multiple opportunities for experiential learning such as writing business plans and health program grant proposals. The text discusses patient advocacy and interdisciplinary teamwork as they relate to economic and financial issues. Its engaging format promotes the synthesis of economics and finance across the nursing curriculum through the use of case examples, end-of-chapter exercises, discussion questions, and games based on concepts within the text. Additionally, tips throughout the book alert students about the need to apply concepts from other aspects of their education to economic and financial situations. The text also includes on-line supplemental material for teachers and students including Excel spreadsheets,

games, a test bank, and PowerPoint slides. Key Features: Aligned with AACN and AONE guidelines Serves as a primary financial management text for a great variety of nursing academic programs Facilitates experiential learning through end-of-chapter exercises, games, tips for synthesizing knowledge, and case examples Designed for use in traditional classrooms and for hybrid and on-line distance programs Presents new chapter on measuring nursing care with indicators for capacity, staffing, patient acuity, performance, and patient flow

The fourth edition of Conor Quigley's highly acclaimed book provides lawyers, regulators and public officials with a definitive statement of the law and practice of State Aid. The book places State Aid law and policy in its economic, commercial and industrial context, exploring the concept of State Aid and its function as a tool of EU law. All of this is achieved by a thorough examination of the jurisprudence of the European Courts and the decisions, legislation and guidelines of the Commission in declaring aid compatible or incompatible with the internal market. The fourth edition includes new chapters on: - COVID-19 and Ukraine emergency measures - Brexit - EU foreign subsidy regulation - UK Subsidies Control and updated guidelines and block exemption regulations on: - Regional aid - R&D&I - Environmental protection and climate change

Written by two prominent experts in the field, the fourth edition of the market-leading EU Law: Text, Cases and Materials offers the reader an authoritative and comprehensive guide to the main fields of EU Law, both institutional and substantive. Through the distinctive mix of 50% text and 50% cases and materials, the fully revised and updated fourth edition addresses the significant recent developments in EU legislation, including four new chapters on topics of central importance. The new enlarged format includes a two-colour text design which easily distinguishes between author commentary and cases and materials. Craig and de Burca's EU Law: Text, Cases and Materials is the bestselling EU Law textbook - recommended by many institutions as a core text for LLB courses and trusted by thousands of students to provide an authoritative commentary on EU Law. Accompanied by an Online

Resource Centre containing an: - interactive map of Europe with hot-spots on all EU member states, providing factual information on each member country - interactive timeline tracking key dates in EU legal history 'EC Employment Law' provides a thorough and authoritative guide to EC law on employment, within a social and economic context. Extensive coverage is given of complex equality caselaw and legislation, and many issues not covered elsewhere are examined. The seventh edition of this two-volume set brings a comprehensive and systematic survey of European Tax Law up to January 2018. It provides a state of the art clarification and analysis of the implications of the EU Treaties and secondary EU law for national and bilateral tax law. From the consequences of the EU free movement rights - to the soft law meant to put a halt to harmful tax competition. The seventh edition of European Tax Law offers a cutting-edge analysis of the field surrounding tax law across Europe. It puts forward a thought-provoking discussion of the current EU tax rules, as well as of the EU Court's case law in tax matters. Previous editions were highly regarded as a staple overview of EU tax law among EU tax law practitioners, policymakers, the judiciary and academics alike. With its updated legislation and case-law up to January 2018, this new edition maintains its unparalleled depth and clarity as the go-to reference book in the field. This first volume of the abridged student edition of 'European Tax Law' covers: 1. The consequences of the EU free movement rights, the EU State aid prohibition, the EU Charter of Fundamental Rights and the general principles of EU law for national tax law, tax treaties, national (tax) procedure, State liability and relations with third States, as they appear from the case law of the Court of justice of the EU 2. Secondary EU law in force and proposed on direct taxes: the Parent-Subsidiary Directive, the Tax Merger Directive, the Interest and Royalties Directive, cross-border tax dispute settlement instruments, the Anti-Tax Avoidance Directive and the C(C)CTB proposal 3. The exchange of information and other administrative assistance in the assessment and recovery of taxes between the EU Member States 4. Soft Law on Harmful Tax Competition 5. Procedural matters and the extent of judicial

protection The upcoming second volume of this set will cover harmonization of indirect taxation, energy taxation and capital duty, as well as administrative cooperation in the field of indirect taxation. Recoge: 1. The judicial organisation of the European Union - 2. Enforcement of community law - 3. protection against acts of the institutions - 4. Special forms of procedure. The third edition of EU Administrative Law provides comprehensive coverage of the administrative system in the EU and the principles of judicial review that apply in this area. This revised edition provides important updates on each area covered, including new case law; institutional developments; and EU legislation. These changes are located within the framework of broader developments in the EU. The chapters in the first half of the book deal with all the principal variants of the EU administrative regime. Thus there are chapters dealing with the history and taxonomy of the EU administrative regime; direct administration; shared administration; comitology; agencies; social partners; and the open method of coordination. The coverage throughout focuses on the legal regime that governs the particular form of administration and broader issues of accountability, drawing on literature from political science as well as law. The focus in the second part of the book shifts to judicial review. There are detailed chapters covering all principles of judicial review and the discussion of the law throughout is analytical and contextual. It begins with the principles that have informed the development of EU judicial review. This is followed by a chapter dealing with the judicial system and the way in which reform could impact on the subject matter of the book. There are then chapters dealing with competence; access; transparency; process; law, fact and discretion; rights; equality; legitimate expectations; two chapters on proportionality; the precautionary principle; two chapters on remedies; and the Ombudsman. Taking a text, cases and materials approach, de Luca's successful textbook remains the only offering for students of European company law, and has been thoroughly updated in this new edition. Chapters have been expanded to cover the latest legislation and directives on cross-

border mergers, the use of digital tools, and cross-border insolvency, while figures and graphs have been introduced to help illustrate complex processes and relationships. Clearly differentiated explanatory textboxes from the first edition have been revised, and allow students to quickly identify sources such as EU legislation, official documents and excerpts from scholarly papers. The book explores a diverse range of topics, from what European company law is, to the structure of the Societas Europaea Statute, capital markets and takeover law. It continues to be an essential resource for the growing number of graduate courses in European company law, European business law, and comparative corporate law. The internationalization and consolidation of retailing is turning the traditional retail industry on its head. International purchasing, fast and efficient operational models and new technologies constantly challenge retailers. Real price competition is just beginning. The Retail Value Chain analyses the changes in the retail industry and the strategic options now open to companies. The book describes the key concepts of Efficient Consumer Response (ECR) and provides several illustrative cases to demonstrate the results. The following key topics are explored: • Why have hard discounters succeeded in many markets? • What are the key success factors of premium retailing? • How can traditional retailing respond to competition from new entrants? • How will private labels change product development processes and the balance of power in the retail value chain? • How can different manufacturers benefit from ECR-collaboration? • How do retailers share and use information in collaboration with manufacturers? • How will new technologies change the retail value chain? Including expert opinions, real-life case examples and a global study of shopper information sharing, The Retail Value Chain is essential reading for both retail practitioners and students of retail and channel marketing.
