Cuaderno de actividades para la evaluación de competencias básicas. Incluye webquest. Material de Lectura del proyecto SM para facilitar el desarrollo de las habilidades lectores acorde con la

propuesta metodología del proyecto. A obra reúne pesquisas desenvolvidas pelos docentes, discentes, egressos e parceiros do curso de Bacharelado em Enfermagem da Universidade Federal do Piauí, Campus Amílcar Ferreira Sobral, localizado no município de Floriano, Piauí. A consolidação das pesquisas permitiu identificar três interfaces: fases do desenvolvimento humano, gestão e ensino, utilizando variados métodos científicos, com intuito de promover a reflexão e o fortalecimento da prática na atenção primária à saúde. Uma obra que agrega conhecimento à acadêmicos e profissionais de saúde, especialmente de Enfermagem, que pretendem se inserir ou atuam no Sistema Único de Saúde-SUS por meio da atenção primária à saúde. Permite, ainda, aos leitores reconhecer problemas e determinantes sociais de saúde, aumentando sua capacidade de promover assistência resolutiva e integral. Espera-se que a leitura inspire a troca de saberes e práticas na produção da saúde coletiva, ampliando estratégias destinadas à formação e educação permanente. Estimula a (re)significação da diversidade e complexidade dos processos de formar e cuidar em saúde. Contudo, a obra representa a continuidade de uma necessária discussão e crítica sobre a importância SUS para o Brasil. This compilation focuses on the theory and conceptualisation of statistics and probability in the early years and the development of young children 's (ages 3-10) understanding of data and chance. It provides a comprehensive overview of cutting-edge international research on the development of young learners ' reasoning about data and chance in formal, informal, and non-formal educational contexts. The authors share insights into young children 's statistical and probabilistic reasoning and provide early childhood educators and researchers with a wealth of illustrative examples, suggestions, and practical strategies on how to address the challenges arising from the introduction of

statistical and probabilistic concepts in pre-school and school curricula. This collection will inform practices in research and teaching by providing a detailed account of current best practices, challenges, and issues, and of future trends and directions in early statistical and probabilistic learning worldwide. Further, it will contribute to future research and theory building by addressing theoretical, epistemological, and methodological considerations regarding the design of probability and statistics learning environments for young children.
