Wendy Higgins, the author of the New York Times bestselling Sweet Evil series, reimagines a classic Brothers Grimm fairy tale with The Great Hunt, a dramatic, romance-filled fantasy with rugged hunters, romantic tension, and a princess willing to risk all to save her kingdom. When a monstrous beast attacks in Eurna, desperate measures must be taken. The king sends a proclamation to the best and bravest hunters: whoever kills the creature will win the hand of his daughter Princess Aerity as a reward. The princess recognizes her duty but cannot bear the idea of marrying a stranger—she was meant to marry for love—until a brooding local hunter, Paxton Seabolt, catches her attention. And while there's no denying the fiery chemistry between them, Princess Aerity feels that Paxton's mysteriousness is foreboding, maybe even dangerous. Paxton is not the marrying type. Nor does he care much for spoiled royals and their arcane laws. He is determined to keep his focus on the task at hand—ridding the kingdom of the beast—but the princess continues to surprise him, and the secrets he's buried begin to surface against his wishes. As you have probably noticed, there are quite a few investing books out there. Many of them were written by some of the world's greatest investors. So, why should you read our book? Stock investing is more prevalent than ever, whether directly or indirectly through brokerage accounts, exchange-traded funds, mutual funds, or retirement plans. Despite this, the vast majority of individual investors have no training on how to pick stocks. And, until now, there hasn't been a truly accessible, easy-to-understand resource available to help them. The Little Book of Investing Like the Pros was written to fill this void. We believe the simplicity and accessibility of our stock picking framework is truly unique. Using real-world examples and actual Wall Street models used by the pros, we teach you how to pick stocks in a highly accessible, step-by-step manner. Our goal is straightforward—to impart the skills necessary for finding high-quality stocks while protecting your portfolio with risk management best practices. Our practical approach is designed to help demystify the investing process, which can be intimidating. This training will help set you apart from others who are largely flying blind. Pilots require extensive training before receiving a license. Doctors must graduate medical school, followed by a multi-year residency. Even those providing professional investment advice require certification. But, anyone can buy a stock without any training whatsoever. While buying stocks on a hunch and a prayer may not endanger your life, it can certainly put your finances at risk. Most tech companies get marketing wrong because they don't know how to do product marketing right. The next in the bestselling SVPG series, LOVED shows what leaders like Apple, Netflix, Microsoft, and Salesforce do well and how to apply it to transform product marketing at your company. The best products can still lose in the marketplace. Why? They are beaten by products with stronger product marketing. Good product marketing is the difference between “also-ran” products versus products that lead. And yet, product marketing is widely misunderstood. Although it includes segmenting customers, positioning your product, creating product collateral, and

supporting sales teams, great product marketing achieves much more. It directs the best way to bring your product to market. It shapes what the world thinks about your product and category. It inspires others to tell your product's story. Part of the bestselling series including INSPIRED and EMPOWERED, LOVED explains the fundamentals of best-in-class product marketing for product teams, marketers, founders and any leader with a product and a vision. Sharing her personal stories as a former product and marketing leader at Microsoft and Netscape, and as an advisor to Silicon Valley startups, venture capitalist, and UC Berkeley engineering graduate school lecturer, Martina Lauchengco distills decades of lessons gleaned from working with hundreds of companies to make LOVED the definitive guide to modern product marketing. With dozens of stories from the trenches of market leaders as well as newer startups with products just beginning their journey, the book shows you: the centrality of product marketing to any product's success the key skills and actions required to do it well the four fundamentals of product marketing and how to apply them how to hire, lead, and organize product marketing how product marketers optimize crucial collaboration with other functions one-sheet frameworks, tools and agile marketing practices that help simplify and elevate product marketing LOVED is an invitation to rethink tired notions of product marketing and practice a more dynamic, customer and market-centric version that creates raving fans and helps products achieve their full market potential. Read Free Prize Inside and learn how to create something incredible that your customers won't be able to resist. Make something happen! Remember when cereal boxes came with a free prize inside? You already liked the cereal, but once you saw that there was a free prize inside - something small yet precious - it became irresistible. In his new book, Seth Godin shows how you can make your customers feel that way again. Here's a step-by-step way to get your organization to do something remarkable: quickly, cheaply and reliably. You don't need an MBA or a huge budget. All you need is a strategy for finding great ideas and convincing others to help you make them happen. Free Prize Inside is jammed with practical ideas you can use right now to MAKE SOMETHING HAPPEN, no matter what kind of company you work for. Because everything we do is marketing - even if you're not in the marketing department. A 2018 Caldecott Honor book There was a cat who lived alone. Until the day a new cat came . . . And so a story of friendship begins, following the two cats through their days, months, and years until one day, the older cat has to go. And he doesn't come back. This is a poignant story, told in measured text and bold black-and-white illustrations about the act of moving on. On August 15, 1914, the Panama Canal officially opened for business, forever changing the face of global trade and military power, as well as the role of the United States on the world stage. The Canal's creation is often seen as an example of U.S. triumphalism, but Noel Maurer and Carlos Yu reveal a more complex story. Examining the Canal's influence on Panama, the United States, and the world, The Big Ditch deftly chronicles the economic and political history of the Canal, from Spain's earliest proposals in 1529 through the final handover of the Canal to Panama on December 31, 1999, to the present day. The authors show that the Canal produced great economic dividends for the first quarter-century following its opening, despite massive cost overruns and delays. Relying on geographical advantage and military might, the United States captured most of these benefits. By the 1970s, however, when the Carter administration negotiated the eventual turnover of the Canal back to Panama, the strategic and economic value of the Canal had disappeared. And yet, contrary to skeptics who believed it was impossible for a fledgling nation plagued by corruption to manage the Canal, when the Panamanians finally had control, they switched the Canal from a public utility to a for-profit corporation, ultimately running it better than their northern patrons. A remarkable tale, The Big Ditch offers vital lessons about the impact of large-scale infrastructure projects, American overseas interventions on institutional development, and the ability of governments to run companies effectively. Provides pictures and brief facts about a variety of different kinds of dinosaurs. Everything in our world, from marketing to technology to distribution to the capital markets, is moving at a faster pace than ever. Yet most companies view change as a threat, and survival as the goal. This book

transforms all that. It contains a simple yet revolutionary idea: we can evolve our companies the same way nature evolves a species. Evolution is a fundamental force of nature, and Seth Godin demonstrates how it can be put to work in any organisation. The first step is to eliminate the anti-change reflex that's genetically coded into all of us. Once a company learns to 'zoom' (to change without panicking), it is much more likely to evolve. And a company that evolves can become ever more profitable. For the last five years, bestselling author Seth Godin has repeatedly demonstrated the power of his books by living their advice. He used the tactics in PERMISSION MARKETING to drive the book up the bestseller list. He followed the advice of UNLEASHING THE IDEA VIRUS to turn his treatise into a living example of an ideavirus. Now, as a committed zoomer, he shows his legions of fans how to turn their company into one that can zoom from one change to another. It's a formula for success whether the market is up or down, whether technology is hot or not, in all industries, from retail to tech to services. The basic text for Alcoholics Anonymous. "A stunning vibrant maximalist whirlwind of a novel. Oloixarac's wit and ambition are evident on every page. By comparison, most other contemporary fiction seems a little dull and simple-minded." —Hari Kunzru, author of White Tears and Gods Without Men A debut novel of seduction and madness, hate and love, set in the world of Argentine academia and animated by the spirits of Wittgenstein, Rousseau, Nabokov and Bolaño Rosa Ostreech, a pseudonym for the novel's beautiful but self-conscious narrator, carries around a trilingual edition of Aristotle's Metaphysics, struggles with her thesis on violence and culture, sleeps with a bourgeois former guerrilla, and pursues her elderly professor with a highly charged blend of eroticism and desperation. Elsewhere on campus, Pabst and Kamtchowsky tour the underground scene of Buenos Aires, dabbling in ketamine, group sex, video games, and hacking. And in Africa in 1917, a Dutch anthropologist named Johan van Vliet begins work on a theory that explains human consciousness and civilization by reference to our early primate ancestors—animals, who, in the process of becoming human, spent thousands of years as prey. Savage Theories wryly explores fear and violence, war and sex, eroticism and philosophy. Its complex and flawed characters grapple with a mess of impossible, visionary theories, searching for their place in our fragmented digital world. "A sexy NHL player, a sassy heroine, and a heartfelt romance that kept me engaged from beginning to end!" — NYT bestseller Mia Sheridan Hockey is my life. And it's a great one. There's an endless line of women, and I get to hang with my best friend Oli. Everything is perfect until she shows up. Oli's twin sister, Flynn...hates my guts. I don't blame her. I'm part of one of the worst nights of her life. Now she's next door and seeing her every day is killing me slowly. I wonder if we can ever get back to being friends. The way she looks at me sometimes, well, let's just say my hockey stick isn't the only thing that's feeling hard these days. But if she finds out the secrets I'm keeping, forgiveness will be the last thing on her mind. "I once ate more than eighty king cakes in a single Carnival," author Matt Haines proudly remembers, demonstrating his dedication to this delicious Mardi Gras tradition. "So you can imagine how amazed I was to learn there has never been a coffee table book dedicated to king cakes!" The Big Book of King Cake changes that, telling the thousands-year-old story through lush photography of more than one hundred and fifty unique king cakes, as well as stories from the diverse and talented bakers who make them. While king cakes are typically only available during Carnival season, readers can enjoy this book year-round. From the traditional cakes generations of New Orleanians have loved, to the unconventional creations that break all the rules, this book is your guide to the Crescent City's favorite baked good. The Big Book of King Cake is for anyone who loves food, history, sweets, culture, and of course, New Orleans. "I look to Scott for wisdom and leadership and he has delivered both with Big Love. This book opened my heart and mind and I'm forever grateful." — Glennon Doyle, author of #1 New York Times bestseller Love Warrior What happens when you fully commit yourself to love? Endless good, insists Scott Stabile, who found that out by overcoming plenty of bad. His parents were murdered when he was fourteen. Nine years later, his brother died of a heroin overdose. Soon after that, Scott joined a cult that dominated his life for thirteen years before he summoned the courage to walk away. In Big Love, his insightful and refreshingly honest collection of personal essays, Scott relates these profound experiences as well as everyday struggles and triumphs in ways that are universally applicable, uplifting, and laugh-out-loud funny. Whether silencing shame, rebounding after failure, or moving forward despite fears, Scott shares hard-won insights that consistently return readers to love, both of themselves and others. Don't panic - I'm Islamic!

Amal is a 16-year-old Melbourne teen with all the usual obsessions about boys, chocolate and Cosmo magazine. She's also a Muslim, struggling to honour the Islamic faith in a society that doesn't understand it. The story of her decision to "shawl up" is funny, surprising and touching by turns. The instant #1 NEW YORK TIMES Bestseller "A must read for anyone hoping to live a creative life... I dare you not to be inspired to be brave, to be free, and to be curious." —PopSugar From the worldwide bestselling author of Eat Pray Love and City of Girls: the path to the vibrant, fulfilling life you've dreamed of. Readers of all ages and walks of life have drawn inspiration and empowerment from Elizabeth Gilbert's books for years. Now this beloved author digs deep into her own generative process to share her wisdom and unique perspective about creativity. With profound empathy and radiant generosity, she offers potent insights into the mysterious nature of inspiration. She asks us to embrace our curiosity and let go of needless suffering. She shows us how to tackle what we most love, and how to face down what we most fear. She discusses the attitudes, approaches, and habits we need in order to live our most creative lives. Balancing between soulful spirituality and cheerful pragmatism, Gilbert encourages us to uncover the "strange jewels" that are hidden within each of us. Whether we are looking to write a book, make art, find new ways to address challenges in our work, embark on a dream long deferred, or simply infuse our everyday lives with more mindfulness and passion, Big Magic cracks open a world of wonder and joy. The Knot, the #1 resource for brides, compiled their all-time best wedding details (cakes, bouquets and centerpieces, vows, décor and more), planning advice, and ideas for celebrations big and small within this beautiful box set of four colorful mini books. Whether you're looking for a breathtaking bouquet, an unforgettably original cake, or the perfect reading for your ceremony, these books offer hundreds of ways to make the day your own. With more than 200 photographs and inspiration for: Invitations * cakes * bridal bouquets in every hue * aisle and altar decorations * ceremony readings * guidance for writing your own vows * escort cards * table settings * centerpieces * reception décor * toasts * favors * and more A forward-thinking manifesto from three Stanford professors--experts who have worked at ground zero of the tech revolution for decades--which reveals how big tech's obsession with optimization and efficiency has sacrificed fundamental human values and outlines steps we can take to change course, renew our democracy, and save ourselves. In no more than the blink of an eye, a naïve optimism about technology's liberating potential has given way to a dystopian obsession with biased algorithms, surveillance capitalism, and job-displacing robots. Yet too few of us see any alternative to accepting the onward march of technology. We have simply accepted a technological future designed for us by technologists, the venture capitalists who fund them, and the politicians who give them free rein. It doesn't need to be this way. System Error exposes the root of our current predicament: how big tech's relentless focus on optimization is driving a future that reinforces discrimination, erodes privacy, displaces workers, and pollutes the information we get. This optimization mindset substitutes what companies care about for the values that we as a democratic society might choose to prioritize. Well-intentioned optimizers fail to measure all that is meaningful and, when their creative disruptions achieve great scale, they impose their values upon the rest of us. Armed with an understanding of how technologists think and exercise their power, three Stanford professors--a philosopher working at the intersection of tech and ethics, a political scientist who served under Obama, and the director of the undergraduate Computer Science program at Stanford (also an early Google engineer)--reveal how we can hold that power to account. Troubled by the values that permeate the university's student body and its culture, they worked together to chart a new path forward, creating a popular course to transform how tomorrow's technologists approach their profession. Now, as the dominance of big tech becomes an explosive societal conundrum, they share their provocative insights and concrete solutions to help everyone understand what is happening, what is at stake, and what we can do to control technology instead of letting it control us. Blasting clichéd career advice, the contrarian pundit and creator of Dilbert recounts the humorous ups and downs of his career, revealing the outsized role of luck in our lives and how best to play the system. Scott Adams has likely failed at more things than anyone you've ever met or anyone you've even heard of. So how did he go from hapless office worker and serial failure to the creator of Dilbert, one of the world's most famous syndicated comic strips, in just a few years? In How to Fail at Almost Everything and Still Win Big, Adams shares the game plan he's followed since he was a teen: invite failure in, embrace it, then pick its pocket. No career guide

can offer advice that works for everyone. As Adams explains, your best bet is to study the ways of others who made it big and try to glean some tricks and strategies that make sense for you. Adams pulls back the covers on his own unusual life and shares how he turned one failure after another—including his corporate career, his inventions, his investments, and his two restaurants—into something good and lasting. There's a lot to learn from his personal story, and a lot of entertainment along the way. Adams discovered some unlikely truths that helped to propel him forward. For instance:

- Goals are for losers. Systems are for winners.
- "Passion" is bull. What you need is personal energy.
- A combination of mediocre skills can make you surprisingly valuable.
- You can manage your odds in a way that makes you look lucky to others.

Adams hopes you can laugh at his failures while discovering some unique and helpful ideas on your own path to personal victory. As he writes: "This is a story of one person's unlikely success within the context of scores of embarrassing failures. Was my eventual success primarily a result of talent, luck, hard work, or an accidental just-right balance of each? All I know for sure is that I pursued a conscious strategy of managing my opportunities in a way that would make it easier for luck to find me." Great Granny Webster is Caroline Blackwood's masterpiece. Heiress to the Guinness fortune, Blackwood was celebrated as a great beauty and dazzling raconteur long before she made her name as a strikingly original writer. This macabre, mordantly funny, partly auto-biographical novel reveals the gothic craziness behind the scenes in the great houses of the aristocracy, as witnessed through the unsparing eyes of an orphaned teenage girl. Great Granny Webster herself is a fabulous monster, the chilliest of matriarchs, presiding with steely self-regard over a landscape of ruined lives. Escape with Russ Manning, the Southeast's hiking expert, into the deep gorges and rock shelters that make this area a natural utopia. He has trekked along every trail and behind every waterfall, from Yahoo Falls to the Gentleman's Swimming Hole--in 100 Trails of the Big South Fork, he guides you to and through the land's best of best! Dave Barry makes his fiction debut with a ferociously funny novel of love and mayhem in south Florida. In the city of Coconut Grove, Florida, these things happen: A struggling adman named Eliot Arnold drives home from a meeting with the Client From Hell. His teenage son, Matt, fills a Squirtmaster 9000 for his turn at a high school game called Killer. Matt's intended victim, Jenny Herk, sits down in front of the TV with her mom for what she hopes will be a peaceful evening for once. Jenny's alcoholic and secretly embezzling stepfather, Arthur, emerges from the maid's room, angry at being rebuffed. Henry and Leonard, two hit men from New Jersey, pull up to the Herks' house for a real game of Killer, Arthur's embezzlement apparently not having been quite so secret to his employers after all. And a homeless man named Puggy settles down for the night in a treehouse just inside the Herks' yard. In a few minutes, a chain of events that will change the lives of each and every one of them will begin, and will leave some of them wiser, some of them deader, and some of them definitely looking for a new line of work. With a wicked wit, razor-sharp observations, rich characters, and a plot with more twists than the Inland Waterway, Dave Barry makes his debut a complete and utter triumph. Thomas' Big Book of Beginner Books offers the following Thomas & Friends backlist favorites: Stop, Train, Stop!; A Crack in the Track; Go, Train, Go!; Blue Train, Green Train; Trains, Cranes & Troublesome Trucks; and Fast Train, Slow Train. The texts are tailored to beginning readers and will delight boys ages 3-6, whether they read them solo or listen to them read aloud. Large Rivers: Geomorphology and Management explores an important topic in geomorphology and sedimentology: the form and function of major rivers. Our knowledge of the big rivers of the world is limited. It is currently difficult to recognise large rivers of the past from relict sedimentary deposits or to structure management policies for long international rivers. This exciting book brings together a set of papers on large rivers of the world, as a unique introduction to a demanding subject. The book includes thirty chapters and is organised into three sections. The first part is on the environmental requirements for creating and maintaining a major river system. The second is a collection of case studies on 14 large rivers from different continents, covering a range of physical environments. The third section includes chapters on the measurement and management of large rivers. First book to offer in a single volume state-of-the-art knowledge on management and geomorphology of large rivers of the world A pioneering study, pushing the boundaries of our knowledge related to big rivers Includes comprehensive case studies covering the major large rivers of the world including Amazon, Mississippi, Nile, Congo, Indus, and Mekong Written by a leading team of distinguished, international contributors Large Rivers: Geomorphology and

Management is essential reading for postgraduate students and researchers in fluvial geomorphology, hydrology, sedimentary geology, and river management. It is also of relevance to engineers and environmental consultants in the private and public sectors working on major rivers of the world. Every industry around the globe is being completely disrupted. Stalwart brands are losing market share to upstarts that capture our collective consciousness. Trillions of dollars are at stake. Brands know a new approach is needed. But most don't realize the strategic underpinnings need to change. Great brands are no longer built through interruptive advertisements. Friction argues that brands don't simply need clever messages or new, shiny technologies. They need a fundamental change in strategy. Friction provides a system for embracing transparency, engaging audiences, creating evangelists, and unleashing unprecedented growth. The authors of Friction have worked on some of the industry's most innovative assignments for the world's most successful brands. This groundbreaking book reveals how corporations can divorce themselves from legacy business models to create a passion brand. A brand that breaks its addiction to traditional advertising. A brand that empowers its customers. A brand that dominates the competition. There is little debate that health care in the United States is in need of reform. But where should those improvements begin? With insurers? Drug makers? The doctors themselves? In Big Med, David Dranove and Lawton Robert Burns argue that we're overlooking the most ubiquitous cause of our costly and underperforming system: megaproviders, the expansive health care organizations that have become the face of American medicine. Your local hospital is likely part of one. Your doctors, too. And the megaproviders are bad news for your health and your wallet. Drawing on decades of combined expertise in health care consolidation, Dranove and Burns trace Big Med's emergence in the 1990s, followed by its swift rise amid false promises of scale economies and organizational collaboration. In the decades since, megaproviders have gobbled up market share and turned independent physicians into salaried employees of big bureaucracies, while delivering on none of their early promises. For patients this means higher costs and lesser care. Meanwhile, physicians report increasingly low morale, making it all but impossible for most systems to implement meaningful reforms. In Big Med, Dranove and Burns combine their respective skills in economics and management to provide a nuanced explanation of how the provision of health care has been corrupted and submerged under consolidation. They offer practical recommendations for improving competition policies that would reform megaproviders to actually achieve the efficiencies and quality improvements they have long promised. This is an essential read for understanding the current state of the health care system in America—and the steps urgently needed to create an environment of better care for all of us. Living with his alcoholic father on a broken-down sailboat on Puget Sound has been hard on seventeen-year-old Chance Taylor, but when his love of running leads to a high-paying job, he quickly learns that the money is not worth the risk. Reprint. Open the huge fold-out pages to discover some of the biggest and most powerful machines ever made. From giant excavators and monster trucks, to super jumbos and enormous ships, this exciting book will delight children of all ages. As one of today's most influential business thinkers, Seth Godin helps his army of fans stay focused, stay connected, and stay dissatisfied with the status quo, the ordinary, the boring. His books, blog posts, magazine articles, and speeches have inspired countless entrepreneurs, marketing people, innovators, and managers around the world. Now, for the first time, Godin has collected the most provocative short pieces from his pioneering blog—ranked #70 by Feedster (out of millions published) in worldwide readership. This book also includes his most popular columns from Fast Company magazine, and several of the short e-books he has written in the last few years. A sample:

- Bon Jovi And The Pirates
- Christmas Card Spam
- Clinging To Your Job Title?
- How Much Would You Pay to Be on Oprah's Show?
- The Persistence of Really Bad Ideas
- The Seduction of "Good Enough"
- What Happens When It's All on Tape?
- Would You Buy Life Insurance at a Rock Concert?

Small is the New Big is a huge bowl of inspiration that you can gobble in one sitting or dip into at any time. As Godin writes in his introduction: "I guarantee that you'll find some ideas that don't work for you. But I'm certain that you're smart enough to see the stuff you've always wanted to do, buried deep inside one of these riffs. And I'm betting that once inspired, you'll actually make something happen." Share the joys of becoming a big brother! With the arrival of a new baby comes many transitions, and big brothers may need a little extra tender loving care to adjust to a new family situation. This sweet story with adorable toddler illustrations by Caroline Jayne Church is just right to

share with and prepare an older brother getting ready for an expanding family.
