Race, Ethnicity, and Consumption Apr 23 2020 Race, Ethnicity, and Consumption: A Sociological View looks at the central concerns of consumer culture through the lens of race and ethnicity. Each chapter illustrates the connections between race, ethnicity, and consumption by focusing on a specific theme: identity, crossing cultures, marketing and advertising, neighborhoods, discrimination, and social activism. By exploring issues such as multicultural marketing, cultural appropriation, consumer racial profiling, urban food deserts, and racialized political consumerism, students, scholars, and other curious readers will gain insight on the ways that racial and ethnic boundaries shape, and are shaped by, consumption. This book goes beyond the typical treatments of race and ethnicity in introductory texts on consumption by not only providing a comprehensive overview of the major theories and concepts that sociologists use to make sense of consumption, race, and ethnicity, but also by examining these themes within distinctly contemporary contexts such as digital platforms and activism. Documenting the complexities and contradictions within consumer culture, Race, Ethnicity, and Consumption is an excellent text for sociology courses on consumers and consumption, race and ethnicity, the economy, and inequality. It will also be an informative resource for courses on consumer culture in the broader social sciences, marketing, and the humanities.

Oxford Textbook of Global Public Health Feb 20 2020 Sixth edition of the hugely successful, internationally recognised textbook on global public health and epidemiology, with 3 volumes comprehensively covering the scope, methods, and practice of the discipline

'Race', Ethnicity and Racism in Sports Coaching Feb 14 2022 In recent years there has been a steady increase in the racial and ethnic diversity of the playing workforce in many sports around the world. However, there has been a minimal throughput of racial and ethnic minorities into coaching and leadership positions. This book brings together leading researchers from around the world to examine key questions around 'race', ethnicity and racism in sports coaching. The book focuses specifically on the ways in which 'race', ethnicity and racism operate, and how they are experienced and addressed (or not) within the socio-cultural sphere of sports coaching. Theoretically informed and empirically grounded, it examines macro- (societal), meso- (organisational), and micro- (individual) level barriers to racial and ethnic diversity as well as the positive action initiatives designed to help overcome them. Featuring multi-disciplinary perspectives, the book is arranged into three thematic sections, addressing the central topics of representation and racialised barriers in sports coaching; racialised identities, diversity and intersectionality in sports coaching; and formalised racial equality interventions in sports coaching. Including case studies from across North America, Europe and Australasia, 'Race', Ethnicity and Racism in Sports Coaching is essential reading for students, academics and practitioners with a critical interest in the sociology of sport, sport coaching, sport management, sport development, and

'race' and ethnicity studies.

Measuring Racial Discrimination Aug 08 2021 Many racial and ethnic groups in the United States, including blacks, Hispanics, Asians, American Indians, and others, have historically faced severe discrimination—pervasive and open denial of civil, social, political, educational, and economic opportunities. Today, large differences among racial and ethnic groups continue to exist in employment, income and wealth, housing, education, criminal justice, health, and other areas. While many factors may contribute to such differences, their size and extent suggest that various forms of discriminatory treatment persist in U.S. society and serve to undercut the achievement of equal opportunity. *Measuring Racial Discrimination* considers the definition of race and racial discrimination, reviews the existing techniques used to measure racial discrimination, and identifies new tools and areas for future research. The book conducts a thorough evaluation of current methodologies for a wide range of circumstances in which racial discrimination may occur, and makes recommendations on how to better assess the presence and effects of discrimination.

Raciolinguistics Apr 16 2022 *Raciolinguistics* reveals the central role that language plays in shaping our ideas about race and vice versa. The book brings together a team of leading scholars—working both within and beyond the United States—to share powerful, much-needed research that helps us understand the increasingly vexed relationships between race, ethnicity, and language in our rapidly changing world. Combining the innovative, cutting-edge approaches of race and ethnic studies with fine-grained linguistic analyses, authors cover a wide range of topics including the struggle over the very term "African American," the racialized language education debates within the increasing number of "majority-minority" immigrant communities in the U.S., the dangers of multicultural education in a Europe that is struggling to meet the needs of new migrants, and the sociopolitical and cultural meanings of linguistic styles used in Brazilian favelas, South African townships, Mexican and Puerto Rican barrios in Chicago, and Korean American "cram schools" in New York City, among other sites. Taking into account rapidly changing demographics in the U.S. and shifting cultural and media trends across the globe—from Hip Hop cultures, to transnational Mexican popular and street cultures, to Israeli reality TV, to new immigration trends across Africa and Europe—*Raciolinguistics* shapes the future of scholarship on race, ethnicity, and language. By taking a comparative look across a diverse range of language and literacy contexts, the volume seeks not only to set the research agenda in this burgeoning area of study, but also to help resolve pressing educational and political problems in some of the most contested raciolinguistic contexts in the world.

The International Handbook of the Demography of Race and Ethnicity Jun 25 2020 Examining key countries in every region of world, this handbook presents population profiles and analyses concerning racial/ethnic disparities and changing intergroup relations. Inside, prominent scholars from various parts of the world and disciplines address the links between stratification, demography, and conflict across the globe. Organized by region/continent, coverage for each profiled country includes demographic information; a historical overview that addresses past racial/ethnic conflict; identification of the most salient demographic trends and issues that the country faces; theoretical issues related to the linkages between stratification, demography, and conflict; methodological issues including quality of data and cutting-edge methods to better understand the issue at hand; and details on the possible future of the existing trends and issues with particular emphasis on public policy and human rights. This handbook will help readers to better understand the commonalities and differences that exist globally in the interplay between stratification, demography, and conflict. In addition, it also provides an excellent inventory of theoretical perspectives and methodological approaches that are needed to better comprehend this issue. This handbook will appeal to students, researchers, and policy analysts in the areas of race and ethnic relations, demography, inequality, international sociology, international relations, foreign studies, social geography, and social development.

Not Quite White Jan 13 2022 *White trash*. The phrase conjures up images of dirty rural folk who are poor, ignorant, violent, and incestuous. But where did this stigmatizing phrase come from? And why do these stereotypes persist? Matt Wray answers these and other questions by delving into the long history behind this term of abuse and others like it. Ranging from the early 1700s to the early 1900s, *Not Quite White* documents the origins and transformations of the multiple meanings projected onto poor rural whites in the United States. Wray draws on a wide variety of primary sources—literary texts, folklore, diaries and journals, medical and scientific articles, social scientific analyses—to construct a dense archive of changing collective representations of poor whites. Of crucial importance are the ideas about

poor whites that circulated through early-twentieth-century public health campaigns, such as hookworm eradication and eugenic reforms. In these crusades, impoverished whites, particularly but not exclusively in the American South, were targeted for interventions by sanitarians who viewed them as “filthy, lazy crackers” in need of racial uplift and by eugenicists who viewed them as a “feebleminded menace” to the white race, threats that needed to be confined and involuntarily sterilized. Part historical inquiry and part sociological investigation, *Not Quite White* demonstrates the power of social categories and boundaries to shape social relationships and institutions, to invent groups where none exist, and to influence policies and legislation that end up harming the very people they aim to help. It illuminates not only the cultural significance and consequences of poor white stereotypes but also how dominant whites exploited and expanded these stereotypes to bolster and defend their own fragile claims to whiteness.

The Wiley Blackwell Encyclopedia of Race, Ethnicity and Nationalism Sep 28 2020 Arranged over five volumes and containing some 700 entries, this comprehensive and authoritative encyclopedia addresses some of the most vital and practical issues of the twenty first century Includes entries written by experts from across the social sciences and humanities, as well as other disciplines Global in scope with more contributors from Africa, China, Japan, Latin America, the Middle East, Russia, and South Asia than any other reference on the topic Explores the importance and impact of race, ethnicity and nationalism on private, public and not-for-profit organizations and institutions in the modern, global world In addition to covering basic terms and concepts, the encyclopedia also includes essays that incorporate discussion and analysis of exciting new developments in the field 5 Volumes www.raceethnicitynationalism.com
Representing Race Jan 21 2020 Offers a comparative analysis of the media's role in the expression of racism and ethnicity.

Below the Surface Jun 06 2021 A guide to the latest research on how young people can develop positive ethnic-racial identities and strong interracial relations Today's young people are growing up in an increasingly ethnically and racially diverse society. How do we help them navigate this world productively, given some of the seemingly intractable conflicts we constantly hear about? In *Below the Surface*, Deborah Rivas-Drake and Adriana Umaña-Taylor explore the latest research in ethnic and racial identity and interracial relations among diverse youth in the United States. Drawing from multiple disciplines, including developmental psychology, social psychology, education, and sociology, the authors demonstrate that young people can have a strong ethnic-racial identity and still view other groups positively, and that in fact, possessing a solid ethnic-racial identity makes it possible to have a more genuine understanding of other groups. During adolescence, teens reexamine, redefine, and consolidate their ethnic-racial identities in the context of family, schools, peers, communities, and the media. The authors explore each of these areas and the ways that ideas of ethnicity and race are implicitly and explicitly taught. They provide convincing evidence that all young people—ethnic majority and minority alike—benefit from engaging in meaningful dialogues about race and ethnicity with caring adults in their lives, which help them build a better perspective about their identity and a foundation for engaging in positive relationships with those who are different from them. Timely and accessible, *Below the Surface* is an ideal resource for parents, teachers, educators, school administrators, clergy, and all who want to help young people navigate their growth and development successfully.

Race, Ethnicity, Gender, and Class Oct 30 2020 Known for its clear and engaging writing, the bestselling *Race, Ethnicity, Gender, and Class: The Sociology of Group Conflict and Change* has been thoroughly updated to be fresher, more relevant, and more accessible to undergraduates. The text uses sociological perspectives and a consistent conceptual framework to tell the story of America's minority groups, today and throughout history. By presenting information, asking questions, and examining controversies, it demonstrates that understanding what it means to be an American has always required us to grapple with issues of diversity and difference. This title is accompanied by a complete teaching and learning package.

Race, Ethnicity, and Health Dec 24 2022 *Race, Ethnicity and Health, Second Edition*, is a critical selection of hallmark articles that address health disparities in America. It effectively documents the need for equal treatment and equal health status for minorities. Intended as a resource for faculty and students in public health as well as the social sciences, it will be also be valuable to public health administrators and frontline staff who serve diverse racial and ethnic populations. The book brings together the best peer reviewed research literature from the leading scholars and faculty in this growing field, providing a historical and political context for the study of health, race, and ethnicity, with key findings on disparities

in access, use, and quality. This volume also examines the role of health care providers in health disparities and discusses the issue of matching patients and doctors by race. New chapters cover: reflections on demographic changes in the US based on the current census; metrics and nomenclature for disparities; theories of genetic basis for disparities; the built environment; residential segregation; environmental health; occupational health; health disparities in integrated communities; Latino health; Asian populations; stress and health; physician/patient relationships; hospital treatment of minorities; the slavery hypertension hypothesis; geographic disparities; and intervention design.

Religion and the Creation of Race and Ethnicity Sep 09 2021 This volume, meant specifically for those new to the field, brings together an ensemble of prominent scholars and illuminates the role religious myths have played in shaping those social boundaries that we call "races" and "ethnicities".

Handbook of Race, Racism, and the Developing Child Oct 18 2019 Filling a critical void in the literature, *Race, Racism, and the Developing Child* provides an important source of information for researchers, psychologists, and students on the recent advances in the unique developmental and social features of race and racism in children's lives. Thorough and accessible, this timely reference draws on an international collection of experts and scholars representing the breadth of perspectives, theoretical traditions, and empirical approaches in this field.

Why I'm No Longer Talking to White People About Race Oct 10 2021 'Every voice raised against racism chips away at its power. We can't afford to stay silent. This book is an attempt to speak' The book that sparked a national conversation. Exploring everything from eradicated black history to the inextricable link between class and race, *Why I'm No Longer Talking to White People About Race* is the essential handbook for anyone who wants to understand race relations in Britain today. THE NO.1 SUNDAY TIMES BESTSELLER WINNER OF THE BRITISH BOOK AWARDS NON-FICTION NARRATIVE BOOK OF THE YEAR 2018 FOYLES NON-FICTION BOOK OF THE YEAR BLACKWELL'S NON-FICTION BOOK OF THE YEAR WINNER OF THE JHALAK PRIZE LONGLISTED FOR THE BAILLIE GIFFORD PRIZE FOR NON-FICTION LONGLISTED FOR THE ORWELL PRIZE SHORTLISTED FOR A BOOKS ARE MY BAG READERS AWARD

Ethnicity and Race Dec 12 2021 Resource added for the Psychology (includes Sociology) 108091 courses.

Race-ethnicity and Society Jan 01 2021 Benjamin Ringer and Elinor Lawless argue that the treatment of racial minorities in America has been qualitatively different from that experienced by white immigrants; that racism is not a mere aberration in American society -- largely confined to the South -- but built into the very foundations of the society.

The Wiley Blackwell Companion to Race, Ethnicity, and Nationalism Jul 27 2020 A broad examination of the rise of nationalism, populism, xenophobia, and racism throughout the world *The Wiley Blackwell Companion to Race, Ethnicity, and Nationalism* provides expert insight into the complex, interconnected factors that are influencing patterns of human relations worldwide in a time of rising populist nationalism, intensified racial and religious tensions, and mounting hostilities towards immigrants and minorities. Analyzing the underlying forces which continue to drive global trends, this volume examines contemporary patterns based on the most recent evidence spanning five continents—offering a diversity of interpretations, models and perspectives that address the challenges facing the study of race, ethnicity, and nationalism. The Companion features original contributions by both established experts and emerging scholars that explore an expansive range of theoretical, historical, and empirical case studies. Organized into five sections, the text first discusses growing trends in the United States, the significance of populism in major societies around the globe, and how global changes are influencing regional variations in race, ethnicity, and nationalism. An investigation of global migration patterns is followed by examination of conflict and violence, from urban riots and boundary disputes to warfare and genocide. The final section focuses on the policy debates resulting from changing patterns and their impact on politics, the economy, and society. Timely and highly relevant, this book: Discusses contemporary issues such as the failure of school systems to provide equal opportunities to minorities, the evolution of the School-to-Prison pipeline, and the Black Lives Matter movement Explores shifts in American race relations, the influence of social media and the internet, and the links between increased globalization and contemporary forms of nationalism, racism, and populism Features essays on national and ethnic identity in China, Japan, and South Korea, India, Central Asia, Africa, Latin America, and Europe Analyzes policies regarding borders, immigration, refugees, and human rights in different countries and regions Offers perspectives on the radicalization of social movements, the creation of

ethnic, linguistic and other boundaries between groups, and the models used to understand intractable conflicts in many global settings **The Wiley Blackwell Companion to Race, Ethnicity, and Nationalism** is an indispensable resource for scholars, researchers, instructors, and students across the social sciences, including sociology, political science, global affairs, economics, comparative race and ethnic relations, international migration, social change, and sociological theory.

Race and Ethnicity in Latin America May 25 2020 For over ten years, **Race and Ethnicity in Latin America** has been an essential text for students studying the region. This second edition adds new material and brings the analysis up to date. Race and ethnic identities are increasingly salient in Latin America. Peter Wade examines changing perspectives on Black and Indian populations in the region, tracing similarities and differences in the way these peoples have been seen by academics and national elites. Race and ethnicity as analytical concepts are re-examined in order to assess their usefulness. This book should be the first port of call for anthropologists and sociologists studying identity in Latin America.

Race and Ethnicity Mar 15 2022 Featuring diverse authorship, **Race and Ethnicity: Sociology in Action** investigates topics from the most current scholarship on race. Built around thoughtful learning exercises, discussion questions, and real-world examples of sociologists in action, this innovative text helps students to learn sociology by doing sociology.

What We Now Know About Race and Ethnicity Aug 20 2022 Introduction : the paradox -- The scientific sources of the paradox -- The political sources of the paradox -- International pragmatism -- Sociological knowledge -- Conceptions of racism -- Ethnic origin and ethnicity -- Collective action -- Conclusion : the paradox resolved.

Understanding 'race' and ethnicity 2e Nov 18 2019 In the last few years, national and international politics have been characterised by the erasure of 'race' and ethnicity within public policy and discourse. Events such as the escalation in 'race' hate crime associated with the EU Referendum in the UK, the rise of the far right across European polities, or Donald Trump's promise to build a wall across Mexico, contradict the political rhetoric of the 'arrival' of a 'post-race' era. This new edition of a widely-respected textbook examines welfare policy and racism, alongside institutional racism and community cohesion within a broad policy framework. Fully updated, it contains: • a new foreword by Professor Kate Pickett, acclaimed co-author of *The Spirit Level* • two new chapters on ethnicity, disability and chronic illness, and education policy and 'race' respectively • recent changes in black and minority ethnic demographics in the UK • a post-script from a minority student on her struggle to make a new home in Britain Suitable for undergraduate and postgraduate courses in social policy, sociology and applied social sciences, it includes: • updated empirical data and examples • links to external sources for further reading • questions for discussion, reflection and further learning. Covering an unrivalled range of social welfare issues, the marriage of theory, history and contemporary data makes important and difficult debates about 'race', ethnicity, discrimination and social equality more accessible to a student audience as well as policy and welfare practitioners interested in its global themes of immigration, austerity and securitisation.

Race, Ethnicity, Crime, and Justice Dec 20 2019 This book provides case studies from countries around the world regarding the nature and scope of concerns related to race, ethnicity, crime and justice. The text centres primarily on English-speaking countries where they have encountered problems related to race, ethnicity, crime and justice. The book is designed to be used as either a main or supplementary text for courses focusing on race and crime, minorities and crime, and diversity in criminal justice. Additionally, it can also be used in sociology and ethnic studies courses that focus on race and crime.

Understanding Racial and Ethnic Differences in Health in Late Life Jan 25 2023 As the population of older Americans grows, it is becoming more racially and ethnically diverse. Differences in health by racial and ethnic status could be increasingly consequential for health policy and programs. Such differences are not simply a matter of education or ability to pay for health care. For instance, Asian Americans and Hispanics appear to be in better health, on a number of indicators, than White Americans, despite, on average, lower socioeconomic status. The reasons are complex, including possible roles for such factors as selective migration, risk behaviors, exposure to various stressors, patient attitudes, and geographic variation in health care. This volume, produced by a multidisciplinary panel, considers such possible explanations for racial and ethnic health differentials within an integrated framework. It provides a concise summary of available research and lays out a research agenda to address the many uncertainties in current knowledge. It recommends, for instance, looking at health differentials across the life course and deciphering the links between factors presumably producing differentials and

biopsychosocial mechanisms that lead to impaired health.

Racial and Ethnic Differences in the Health of Older Americans Feb 02 2021 Older Americans, even the oldest, can now expect to live years longer than those who reached the same ages even a few decades ago. Although survival has improved for all racial and ethnic groups, strong differences persist, both in life expectancy and in the causes of disability and death at older ages. This book examines trends in mortality rates and selected causes of disability (cardiovascular disease, dementia) for older people of different racial and ethnic groups. The determinants of these trends and differences are also investigated, including differences in access to health care and experiences in early life, diet, health behaviors, genetic background, social class, wealth and income. Groups often neglected in analyses of national data, such as the elderly Hispanic and Asian Americans of different origin and immigrant generations, are compared. The volume provides understanding of research bearing on the health status and survival of the fastest-growing segment of the American population.

Researching 'Race' and Ethnicity Mar 03 2021 'Gunaratnam's framework is rich in its examination and synthesis of approaches to the study of "race"... the reward for the reader who does pick up the book is that the author deftly articulates the complicated view of research on "race" first from the quantitative perspective and then skilfully moves the reader to issues of "race" in qualitative research' - *Studies in Ethnicity and Nationalism* 'This is a welcome book for those engaged in policy and empirical work with an active research agenda... there is a level of theoretical sophistication in the text which is often missing from texts concerned with methods in this area' - *Race Relations Abstracts* 'The particular value of this book to readers lies in the discussion of "race", ethnicity and research issues within a political and social context. The author states her intention to explore some of the theoretical and practical dilemmas of researching "race" and ethnicity. This is, without question, achieved. I recommend it as essential reading for those concerned with increasing their awareness of issues relating to race, ethnicity and research practice' - *Nurse Researcher* 'This is a thought-provoking and challenging book which demonstrated the fractured and fluid nature of difference and power in the research process. Importantly it offers a guide to the ways in which research can be effectively and productively used in challenging the status quo' - *Diversity in Health and Social Care* **Researching 'Race' and Ethnicity** provides an innovative discussion of the methodological, epistemological and ethical challenges of doing qualitative research that is informed by questions of 'race', ethnicity and social difference. By identifying and challenging 'categorical thinking' and many longstanding assumptions about the meanings of 'race' and ethnicity, the author gets to the heart of many of the everyday dilemmas and difficulties that researchers confront in the field, but are rarely theorised or openly discussed. Yasmin Gunaratnam's insistence that 'race' and ethnicity are a significant part of all qualitative research, and are not the 'specialist' concerns of those whose work is explicitly focussed upon 'race', provokes a radical rethinking of current methodological debates. How do racial and ethnic categories inform our approaches to research? How does the racialised identity of the researcher and the research participants affect the research interaction and the knowledge that we produce? What are the assumptions that are made about racialised subjectivity and inter-subjectivity? How can we make sense of accounts in which 'race' and ethnicity are silent or are non-manifest? How can we work ethically across difference? In examining these and other questions, the wide-ranging discussions in the book are animated by examples drawn from the author's ethnographic research with white and minoritized research participants. Through these examples readers will be able to engage with some of the complexities of research relationships, power relations and ethical concerns about engagement, disconnection and complicity in research. The attention that the book gives to the excluded experiences of minoritized researchers will be of particular value to many readers. **Researching 'Race' and Ethnicity** is essential reading for students and academics in the social sciences.

Race, Class, and Gender in the United States Nov 30 2020 **Race, Class, and Gender in the United States: An Integrated Study** presents students with a compelling, clear study of issues of race, gender, and sexuality within the context of class. Rothenberg offers students 126 readings, each providing different perspectives and examining the ways in which race, gender, class, and sexuality are socially constructed. Rothenberg deftly and consistently helps students analyze each phenomena, as well as the relationships among them, thereby deepening their understanding of each issue surrounding race and ethnicity.

Researching Race and Racism Jul 19 2022 This new work brings together contributions from some of the leading researchers in the field, using the benefit of their experience to explore the practical and

ethical issues involved in researching in this often controversial field.

Race and Theology Mar 23 2020 Even in the Church, justice for some is justice for none.

Critical Perspectives on Racial and Ethnic Differences in Health in Late Life Nov 23 2022 In their later years, Americans of different racial and ethnic backgrounds are not in equally good-or equally poor-health. There is wide variation, but on average older Whites are healthier than older Blacks and tend to outlive them. But Whites tend to be in poorer health than Hispanics and Asian Americans. This volume documents the differentials and considers possible explanations. Selection processes play a role: selective migration, for instance, or selective survival to advanced ages. Health differentials originate early in life, possibly even before birth, and are affected by events and experiences throughout the life course. Differences in socioeconomic status, risk behavior, social relations, and health care all play a role. Separate chapters consider the contribution of such factors and the biopsychosocial mechanisms that link them to health. This volume provides the empirical evidence for the research agenda provided in the separate report of the Panel on Race, Ethnicity, and Health in Later Life.

Superior Aug 28 2020 2019 Best-Of Lists: 10 Best Science Books of the Year (Smithsonian Magazine) · Best Science Books of the Year (NPR's Science Friday) · Best Science and Technology Books from 2019" (Library Journal) An astute and timely examination of the re-emergence of scientific research into racial differences. Superior tells the disturbing story of the persistent thread of belief in biological racial differences in the world of science. After the horrors of the Nazi regime in World War II, the mainstream scientific world turned its back on eugenics and the study of racial difference. But a worldwide network of intellectual racists and segregationists quietly founded journals and funded research, providing the kind of shoddy studies that were ultimately cited in Richard Herrnstein and Charles Murray's 1994 title *The Bell Curve*, which purported to show differences in intelligence among races. If the vast majority of scientists and scholars disavowed these ideas and considered race a social construct, it was an idea that still managed to somehow survive in the way scientists thought about human variation and genetics. Dissecting the statements and work of contemporary scientists studying human biodiversity, most of whom claim to be just following the data, Angela Saini shows us how, again and again, even mainstream scientists cling to the idea that race is biologically real. As our understanding of complex traits like intelligence, and the effects of environmental and cultural influences on human beings, from the molecular level on up, grows, the hope of finding simple genetic differences between "races"—to explain differing rates of disease, to explain poverty or test scores, or to justify cultural assumptions—stubbornly persists. At a time when racialized nationalisms are a resurgent threat throughout the world, Superior is a rigorous, much-needed examination of the insidious and destructive nature of race science—and a powerful reminder that, biologically, we are all far more alike than different.

Unequal Treatment Oct 22 2022 Racial and ethnic disparities in health care are known to reflect access to care and other issues that arise from differing socioeconomic conditions. There is, however, increasing evidence that even after such differences are accounted for, race and ethnicity remain significant predictors of the quality of health care received. In *Unequal Treatment*, a panel of experts documents this evidence and explores how persons of color experience the health care environment. The book examines how disparities in treatment may arise in health care systems and looks at aspects of the clinical encounter that may contribute to such disparities. Patients' and providers' attitudes, expectations, and behavior are analyzed. How to intervene? *Unequal Treatment* offers recommendations for improvements in medical care financing, allocation of care, availability of language translation, community-based care, and other arenas. The committee highlights the potential of cross-cultural education to improve provider-patient communication and offers a detailed look at how to integrate cross-cultural learning within the health professions. The book concludes with recommendations for data collection and research initiatives. *Unequal Treatment* will be vitally important to health care policymakers, administrators, providers, educators, and students as well as advocates for people of color.

Changing Race Apr 04 2021 An introduction to the dynamic complexity of American ethnic life and Latino identity Latinos are the fastest growing population group in the United States. Through their language and popular music Latinos are making their mark on American culture as never before. As the United States becomes Latinized, how will Latinos fit into America's divided racial landscape and how will they define their own racial and ethnic identity? Through strikingly original historical analysis, extensive personal interviews and a careful examination of census data, Clara E. Rodriguez shows that

Latino identity is surprisingly fluid, situation-dependent, and constantly changing. She illustrates how the way Latinos are defining themselves, and refusing to define themselves, represents a powerful challenge to America's system of racial classification and American racism.

Theories of Race and Ethnicity Jul 07 2021 An authoritative and cutting-edge collection of theoretically grounded and empirically informed essays exploring the contemporary terrain of race and racism.

Race and Ethnicity Sep 21 2022 Broad-ranging and comprehensive, this completely revised and updated textbook is a critical guide to issues and theories of 'race' and ethnicity. It shows how these concepts came into being during colonial domination and how they became central – and until recently, unquestioned – aspects of social identity and division. This book provides students with a detailed understanding of colonial and post-colonial constructions, changes and challenges to race as a source of social division and inequality. Drawing upon rich international case studies from Australia, Guyana, Canada, Malaysia, the Caribbean, Mexico, Ireland and the UK, the book clearly explains the different strands of theory which have been used to explain the dynamics of race. These are critically scrutinised, from biological-based ideas to those of critical race theory. This key text includes new material on changing multiculturalism, immigration and fears about terrorism, all of which are critically assessed. Incorporating summaries, chapter-by-chapter questions, illustrations, exercises and a glossary of terms, this student-friendly text also puts forward suggestions for further project work. Broad in scope, interactive and accessible, this book is a key resource for undergraduate students of 'race' and ethnicity across the social sciences.

Ethnicity Jun 18 2022 This text discusses key debates in the sociology of ethnicity and race, arguing that ethnicity is culturally expressed and politically and economically contextualised. The historical trajectories of slavery, colonialism and nation-state formation have seen ethnicities and racisms develop along some parallel, and some quite different, lines. Drawing on examples from all around the globe, including Britain, Continental Europe, the USA, Hawaii and Malaysia, this book offers a theoretically informed account of a major sociological issue in a truly international and comparative perspective.

Racism and Ethnicity Feb 26 2023 **Racism and Ethnicity: Global Debates, Dilemmas, Directions** examines in detail the theories, histories and principal debates of race, racism and ethnicity within a global context. The text offers critical evaluation of the work of major figures from Du Bois to Goldberg, and presents new research on pre-modern racisms, contemporary scientific racisms, racist violence, racism reduction, ethnicity in the UK and European patterns of exclusion and discrimination. Richly illustrated throughout with examples and case studies drawn from across the world and time, the book also offers a range of in-text features to aid study, including: chapter summaries, key concept boxes, chapter activities and further reading. **Racism and Ethnicity: Global Debates, Dilemmas, Directions** will be core reading for students at all levels across the social sciences and the humanities ranging from history and cultural studies through sociology to political and policy analysis. It will also be of significant interest to researchers and policy makers in a range of fields.

Mental Health May 17 2022

The Changing Terrain of Race and Ethnicity Nov 11 2021 The legal institutions of overt racism in the United States have been eliminated, but social surveys and investigations of social institutions confirm the continuing significance of race and the enduring presence of negative racial attitudes. This shift from codified and explicit racism to more subtle forms comes at a time when the very boundaries of race and ethnicity are being reshaped by immigration and a rising recognition that old systems of racial classification inadequately capture a diverse America. In **The Changing Terrain of Race and Ethnicity**, editors Maria Krysan and Amanda Lewis bring together leading scholars of racial dynamics to study the evolution of America's racial problem and its consequences for race relations in the future. **The Changing Terrain of Race and Ethnicity** opens by attempting to answer a puzzling question: how is it that so many whites think racism is no longer a problem but so many nonwhites disagree? Sociologist Lawrence Bobo contends that whites exhibit what he calls "laissez faire racism," which ignores historical and structural contributions to racial inequality and does nothing to remedy the injustices of the status quo. Tyrone Forman makes a similar case in his chapter, contending that an emphasis on "color blindness" allows whites to be comforted by the idea that all races are on a level playing field, while not recognizing the advantages they themselves have reaped from years of inequality. The book then moves to a discussion of the new ways that Americans view race. Eduardo Bonilla-Silva and Karen Glover argue that the United States is moving from a black-white divide to a tripartite system, where certain light-skinned, non-threatening minority groups are considered "honorary whites." The book's final section

reexamines the theoretical underpinnings of scholarship on race and ethnicity. Joe Feagin argues that research on racism focuses too heavily on how racial boundaries are formed and needs to concentrate more on how those boundaries are used to maintain privileges for certain groups at the expense of others. Manning Marable contends that racism should be addressed at an institutional level to see the prevalence of "structural racism"—deeply entrenched patterns of inequality that are coded by race and justified by stereotypes. *The Changing Terrain of Race and Ethnicity* provides an in-depth view of racism in modern America, which may be less conspicuous but not necessarily less destructive than its predecessor, *Jim Crow*. The book's rich analysis and theoretical insight shed light on how, despite many efforts to end America's historic racial problem, it has evolved and persisted into the 21st century.
