Unlike many classic works of fiction, literature of the fantastic enjoys mass popularity. Because the fantastic is so much a part of popular culture, fantasy literature can represent or address the racial attitudes of its audience. Representations of race in the fantastic provide a measure of the concern the culture has for racial matters. If a work is racist, whether consciously or not, it may perpetuate racist attitudes unless it is carefully examined. At the same time, literature of the fantastic is able to present possible worlds rather than real ones. It is thus a literature of possibility, in which racial matters may be addressed and exposed, so that readers may become more conscious of the evils of racist attitudes. This volume explores the significance of race and color in the works of a wide range of authors, including Octavia Butler, Robert Heinlein, Stephen King, and Robert Silverberg. This volume explores the significance of race and color in the works of a wide range of authors, including Octavia Butler, Joseph Conrad, Ursula Le Guin, Robert Heinlein, Stephen King, and Robert Silverberg. The chapters are written by expert contributors who approach their topics as both products of a particular cultural moment and as imagined alternatives. While most of the works examined are science fiction, the book also looks at horror and fantasy writing. Topics discussed include colonialism and empire, Creole identity politics, race in cyberspace, and witchcraft in Salem. On the future of international relations of the world. In their quest for meaning and higher truth, many people seek out a teacher or a path. The longing for higher consciousness, spiritual growth, and a connection to God directs us to someone or something we believe can provide answers and point the way. Power vs. Truth examines the teachings of David R. Hawkins, a psychiatrist-turned-guru who claims to have discovered a bulletproof method for discerning the absolute truth about anything. He heralds his muscle test for truth as the most important discovery in mankind's history. Written by Hawkins' authorized biographer-formerly one of his most devoted and outspoken students-Power vs. Truth is a brave examination of Hawkins' life and works. Including revelations uncovered during the research for Hawkins' biography, this book offers an intimate and sobering look at the teachings that have captivated tens of thousands of students worldwide. Peering Through a Frosted Window is a collection of essays and poems written by authors Virginia Monti and Andrea Monti Riffe some of which are memoir and others are merely ideas and insights from their imagination. National Geographic Explorer and TED Prize-winner Dr. Sarah Parcak welcomes you to the exciting new world of space archaeology, a growing field that is sparking extraordinary discoveries from ancient civilizations across the globe. In Archaeology from Space, Sarah Parcak shows the evolution, major discoveries, and future potential of the young field of satellite archaeology. From surprise advancements after the declassification of spy photography, to a new map of the mythical Egyptian city of Tanis, she shares her field's biggest

discoveries, revealing why space archaeology is not only exciting, but urgently essential to the preservation of the world's ancient treasures. Parcak has worked in twelve countries and four continents, using multispectral and high-resolution satellite imagery to identify thousands of previously unknown settlements, roads, fortresses, palaces, tombs, and even potential pyramids. From there, her stories take us back in time and across borders, into the day-to-day lives of ancient humans whose traits and genes we share. And she shows us that if we heed the lessons of the past, we can shape a vibrant future. Includes Illustrations The acclaimed bestseller that's teaching the world about the power of mass collaboration. Translated into more than twenty languages and named one of the best business books of the year by reviewers around the world, Wikinomics has become essential reading for business people everywhere. It explains how mass collaboration is happening not just at Web sites like Wikipedia and YouTube, but at traditional companies that have embraced technology to breathe new life into their enterprises. This national bestseller reveals the nuances that drive wikinomics, and share fascinating stories of how masses of people (both paid and volunteer) are now creating TV news stories, sequencing the human genome, remixing their favorite music, designing software, finding cures for diseases, editing school texts, inventing new cosmetics, and even building motorcycles. Our queer elders have a history full of personal struggles, joys, tragedies and daily routines. Peering Through shares their truly unique tales in an anthology set amongst the backdrop of criminalisation, religious interventions and eventual general social acceptance in Australia. Proceeds from the book's sale will support the Parkestone Foundation Inc. Peering Through: Sharing Decades of Queer Experience recollects the everyday lives of LGBTIQ elders. Their knowledge and stories cover decades of unique challenges, triumphs, tragedy, and daily routines. These stories provide detailed insight into the paths queer people took when governments, medical systems, and many other institutions followed policies that sought to harm or even erase the existence of LGBTIQ people. The structure of the anthology intertwines the unique personal stories chronologically alongside major queer historical events to highlight how these moments influenced our elders' lives. Proceeds from the sale of the book will go to The Parkestone Foundation Inc ([www.parkestonefoundation.org](http://www.parkestonefoundation.org)). "The Parkestone Foundation was initially constituted as an Association in 1982 following a generous bequest by an Adelaide gay man, Peter Nation which enabled the establishment of a Trust Fund. The Foundation is managed by a committee of honorary Trustees who ensure that the Trust Fund is used for its intended purpose which is to support LGBTIQ[A] community projects consistent with its objectives. Since its inception, the Foundation has allocated over \$40,000 to support community projects in South Australia." Peering Carrier Ethernet Networks begins by providing background information on the evolution of important concepts and building blocks that have led to the current state of high bandwidth and high performance Ethernet technology in order to support current and emerging customer applications. The background information covered includes an overview of Public Switched Telephone Networks (PSTN) to describe circuit switching, multiplexing, and voice digitization that lead to the development of T1/T3 and SONET/SDH for transport. It interweaves these developments with changes in the regulatory regime. Additional coverage includes Carrier Ethernet networks' technical standards, which describe how service providers can offer services to off-net customers using peered Carrier Ethernet networks and a description of the taxonomy of customers and their current and emerging applications at Layer 2 and Layer 3 on peered Carrier Ethernet networks. The book concludes by describing next steps in Ethernet technology to meet growing demands and emerging trends. Presents detailed coverage of end-to-end services across wide area data networks Consolidates, in one ready reference, the latest applied research in this rapidly evolving field Provides the context, advantages, and industry standards for peering Carrier Ethernet networks Police Chief Nalen Storrow faces the unthinkable when, while investigating the shocking murder of a local teenager, he learns that his own son must be considered a suspect, in an unsolved case that has profound repercussions eighteen years later, when his daughter, Rachel, is faced

This book provides a game theoretic model of interaction among VoIP telecommunications providers regarding their willingness to enter peering agreements with one another. The author shows that the incentive to peer is generally based on savings from otherwise payable long distance fees. At the same time, termination fees can have a countering and dominant effect, resulting in an environment in which VoIP firms decide against peering. Various scenarios of peering and rules for allocation of the savings are considered. The first part covers the relevant aspects of game theory and network theory, trying to give an overview of the concepts required in the subsequent application. The second part of the book introduces first a model of how the savings from peering can be calculated and then turns to the actual formation of peering relationships between VoIP firms. The conditions under which firms are willing to peer are then described, considering the possible influence of a regulatory body. A collection of poetry addressed to Hughes's late wife, poet Sylvia Plath, reexamines the psychological breakdown that led to both some of her greatest poems and to her untimely death. Reprint. "Peering" designates a legal practice of gazing at poor people. Legal actors literally peer, that is, look at the poor; they also peer in another fashion, which determines whether the visual subject is their peer. If the observed falls short of the observer's social class, the law fixes them in their "proper place." In the Fifth Amendment takings context, this means they are at risk for condemnation. This article traces peering's evolution in Fifth Amendment law. It notes peering's initial descent: From the 1920s until the 2000s, courts looked "down" at the poor, often describing them as monstrous. "Slums" - edifices typically depicted as housing contagious subhumans - proved perfect objects of condemnations since they threatened the upper strata. In the 1980s, however, another legal gaze flourished: One that looked "up," and whose bearers peered themselves with wealthy developers. In cases stemming from Michigan's 1981 Poletown Neighborhood Council v. City of Detroit to the Supreme Court's 2005 Kelo v. City of New London, we find rhetoric signaling legislative and judicial alignment with affluence. Here, lawmakers and judges approved condemnations that fostered "world class" and "cutting edge" corporate factories. I call this the ascendant or aspirational gaze, and in its exuberant optics, both the poor and the middle class find themselves vulnerable to "economic rejuvenation" takings. An active lobby of activists and judges challenge this gaze with petit bourgeois perspectives, leading to reform. But the poor submerge in these visuals, finding vanishing chances to escape "blight" condemnations. To understand and combat peering, I study Columbia University's recent expansion into West Harlem. I contemplate New York Court of Appeals' 2010 Matter of Kaur v. New York State Urban Development Corporation, which approved of Manhattanville's condemnation, and also the political rhetoric and blight reports that justified the taking. I additionally reference interviews with members of the Harlem community, and offer their home photographs as counter-images to the ones that filled the blight reports. Inspired by the legal history I recount, as well as the testaments and images offered by Harlem residents, I describe the racist, classist, and violent meanings of blight findings. I reject "blight" as unsalvageable, but sketch a Fifth Amendment doctrine that would foster what one Harlem leader describes as a "decent life." This fully illustrated chapter book follows Anna, a young Asian-American girl, as she navigates relationships with family, friends, and her fourth-grade classroom, and finds a true best friend. These Jewish scholars did not participate in the philosophical and religious

thought that concerned Christendom, and today they are seen as having played a limited role in mystical or esoteric studies. Ephraim Kanarfogel now challenges this conventional view of the tosafists, showing that many individuals were influenced by ascetic and pietistic practices and were involved with mystical and magical doctrines. He traces the presence of these disciplines in the pre-Crusade period, shows how they are intertwined, and suggests that the widely available Hekhalot literature was an important conduit for this material. He also demonstrates that the asceticism and esotericism of the German Pietists were an integral part of Ashkenazic rabbinic culture after the failure of Rashbam and other early tosafists to suppress these aspects of pre-Crusade thinking. The identification of these various forms of spirituality places the tosafists among those medieval rabbinic thinkers who sought to supplement their Talmudism with other areas of knowledge such as philosophy and kabbalah, demonstrating the compatibility of rabbinic culture and mysticism. These interests, argues Kanarfogel, explain both references to medieval Ashkenazic rabbinic figures in kabbalistic literature and the acceptance of certain ascetic and mystical practices by later Ashkenazic scholars. Drawing on original manuscript research, Kanarfogel makes available for the first time many passages produced by lesser known tosafists and rabbinic figures and integrates the findings of earlier and contemporary scholarship, much of it published only in Hebrew. "Peering through the Lattices" provides a greater appreciation for these texts and opens up new opportunities for scholarship in Jewish history and thought. Include abstracts. Adam Nicolson explores the marine life inhabiting seashore rockpools with a scientist's curiosity and a poet's wonder in this beautifully illustrated book. The sea is not made of water. Creatures are its genes. Look down as you crouch over the shallows and you will find a periwinkle or a prawn, a claw-displaying crab or a cluster of anemones ready to meet you. No need for binoculars or special stalking skills: go to the rocks and the living will say hello. Inside each rock pool tucked into one of the infinite crevices of the tidal coastline lies a rippling, silent, unknowable universe. Below the stillness of the surface course different currents of endless motion—the ebb and flow of the tide, the steady forward propulsion of the passage of time, and the tiny lifetimes of the rock pool's creatures, all of which coalesce into the grand narrative of evolution. In *Life Between the Tides*, Adam Nicolson investigates one of the most revelatory habitats on earth. Under his microscope, we see a prawn's head become a medieval helmet and a group of "winkles" transform into a Dickensian social scene, with mollusks munching on Stilton and glancing at their pocket watches. Or, rather, is a wrinkle more like Achilles, an ancient hero, throwing himself toward death for the sake of glory? For Nicolson, who writes "with scientific rigor and a poet's sense of wonder" (*The American Scholar*), the world of the rock pools is infinite and as intricate as our own. As Nicolson journeys between the tides, both in the pools he builds along the coast of Scotland and through the timeline of scientific discovery, he is accompanied by great thinkers—no one can escape the pull of the sea. We meet Virginia Woolf and her Waves; a young T. S. Eliot peering into his own rock pool in Massachusetts; even Nicolson's father-in-law, a classical scholar who would hunt for amethysts along the shoreline, his mind on Heraclitus and the other philosophers of ancient Greece. And, of course, scientists populate the pages; not only their discoveries, but also

their doubts and errors, their moments of quiet observation and their thrilling realizations. Everything is within the rock pools, where you can look beyond your own reflection and find the miraculous an inch beneath your nose. "The soul wants to be wet," Heraclitus said in Ephesus twenty-five hundred years ago. This marvelous book demonstrates why it is so.
