The Big Ripoff May 05 2021 Praise for THE BIG RIPOFF "Politicians like to say that government is on the side of the little guy. But with impressive documentation and persuasive examples, Tim Carney shows how government power and regulation are typically used to assist the powerful." -Paul A. Gigot Editorial Page Editor, the Wall Street Journal "Exposes the dirty little secret of American politics: how big businesses work with statist politicians to diminish the prosperity and freedom of consumers, taxpayers, and entrepreneurs. Carney employs top-notch writing ability, passion for liberty, and understanding of

economics to demolish the myth that big business is a foe of big government. Everyone who seeks to understand who really benefits from big government should read this book, as should anyone who still believes that the interventionist state benefits the average person." -Congressman Ron Paul U.S. House of Representatives, 14th District of Texas "Small entrepreneurial businesses are the backbone success of our great economy. They are the biggest job and wealth creators. Is that why big corpocratic behemoth firms collude with big government for a liberal agenda of higher taxes and overregulation that will punish the small risk-takers? Tim Carney's new book describes how anti-business big business can be." -Lawrence Kudlow Host of CNBC's Kudlow & Company "Tim Carney explodes the myth that big business and big government are natural opponents. All too often, as he points out, they're both engaged in a common enterprise: picking your pocket." -Ramesh Ponnuru Senior Editor, National Review "A romping tour de force of the love affair

between big business and big government from Teddy Roosevelt and the Robber Barons to Enron and the Kyoto Treaty. Indispensable for understanding how government regulation really works."

-Donald Devine Grewcock Professor of Political Science, Bellevue University
"Every CEO in America should read this book today, issue new directives to their bureaucrat-appeasing Washington lobbyist tomorrow, and join in the fight for economic liberalization." -Fred L. Smith, Jr. Founder and President, Competitive Enterprise Institute

Climate Change Delusion and the Great Electricity Rip-Off Feb 20 2020 How did one of the world's largest exporters of coal, gas and uranium end up with unreliable and expensive energy? Massive subsidies for renewable energy, gaming of the electricity market and government mandates have closed coal-fired generators that previously provided cheap reliable electricity. Five hundred years ago, Martin Luther objected to indulgences. Today indulgences are sought as subsidies from consumers for renewable energy generators in the name of the environmental religion. It has never been shown that human emissions of carbon dioxide drive global warming and the recent massive increases in emissions produced no warming. This book shows that renewable energy creates more environmental damage than coal-fired electricity generation and much of the

generously funded climate "science" is underpinned by fraud. However, there is a simple solution to the suicidal energy policy which was created by pandering to green hysteria that forced upon us an unjustifiable commitment to renewable energy. This book is an exposure of the on-going greed, corruption, fiscal waste, skulduggery, moral and political ineptitude of governments and energy shysters the world over today. - Derek Wyness, reviewer

Life Is a Rip Off Dec 24 2022 LIFE IS A RIP OFF: THE COMPLETE BOOK is 404 pages and 12 months of record reviews--one record a day, every day, for one year. Yes, John "Inzane" Olson aka Inzane Johnny of Wolf Eyes aka American Tapes did that. And he reviewed everything from death metal demo cassettes to the Staples Singers' gospel. Enter into the OLZONE and find out about music you've never known, bands from places that you've never heard, and then read his review of classic rock cornerstones such as KANSAS. Reading LRIP will make you re-realize why blues is relevant, why every punk band in

America matters, why jazz is good for the heart, and metal will always ride by your side. "To write music op-ed this good, you have to tap the primordial sap sack, to butterfly stroke the ancient ooze of tune begatment, cave dwell with the knuckle draggers, scratch symbols into the dirt with the freaks and make it rain. He do and it did."--Henry Rollins "[Life is a Rip Off] is the best way [John Olson] can add another cubist layer to the sound and visuality he's already presented for the last twenty or so years. He's sharing something the people who don't know him personally don't get enough of--his textual, syntactical brain, stained as it is with dollar-store spray paint."-- Ben Hell Hall, Detroit artist. "When John agreed to write a record review a day, back in 20xx, I wasn't too keen on the idea. Not because I didn't think he could do it - but that I knew he would do it, even if it became a years-long all-encompassing obsessive task."--Tovah Olson, The Dead Machines. "[John Olson] didn't just introduce me to different worlds, the man introduced me

to entire universes."--Bryan Ramirez,

The Pharmacy Rip Off List Oct 10 2021
The frustration of watching for over 20 years as rip offs disguised under a prescription label went out the pharmacy door has built up like lava under Krakatoa and I'm finally calling it....
Pharmaceutical manufacturers never hesitate to tell you prescription prices are so high because of the staggering costs involved in researching and developing new medicines. The truth is though, that while it does cost big bucks to bring a truly innovative product to market, pharmacy shelves are also stocked with blatant rip offs. Tiny manipulations of prescription strengths that make them no more effective but incredibly more expensive. Combination pills of meds that have been available separately for years treated as if they were a new product. A topical foam that contains the same product as a cream but is priced over a hundred dollars more. A glaucoma medicine that is repackaged with a little brush and sold, for more money, as an eyelash

thickener. Even, in some cases, medicines that are less effective or even more dangerous than cheaper alternatives, but are promoted as the next new breakthrough. My plan with this book is to help empower you to become a smarter health care consumer by arming you with facts the pharmaceutical industry doesn't want you to know. Remember, your goal as a patient is to get better, while the goal of the drug company is to collect each and every last dollar it can. Sometimes those goals coincide, but many times they do not, so it can pay handsomely to do some research before getting that prescription filled. I wrote this book to give you an idea what could be at stake. Good luck.

How Do I Tax Thee? Dec 12 2021 "We all know the government taxes our income. Federal, state, and local taxes are withheld by employers, as are Social Security payments. But what about the many other ways the government covertly drains money from our wallets? Have you studied your cell phone bill? Customers in New York State pay an average of

24.36% in combined taxes on their wireless bills. They're also charged for obscure services they didn't ask for and don't understand, like a universal service fund fee, an FCC compliance fee, a line service fee, and an emergency services fee. These aren't taxes, strictly speaking. The government imposes these administrative and regulatory costs, and your wireless provider passes them along to you. What about your cable bill? Your power bill? Your trash bill? The cost of groceries, a gallon of gas, a cab ride, a hotel stay, and a movie ticket are all inflated by hidden fees. How much of what you pay at the grocery store, pump, airport, or the box office is really an indirect tax? In a series of short, pointed, fact-laden, humorous chapters, Kristin Tate exposes how up to half of your income is siphoned straight into federal, state, and city government coffers--and also where these hidden taxes and fees come from."--Dust jacket.

Landscapes of Fraud Feb 02 2021 From the actions of Europeans in the seventeenth century to the real estate deals of the modern era, people making a living off the land in southern Arizona have been repeatedly robbed of their way of life. History has recorded more than three centuries of speculative failures that never amounted to much but left dispossessed people in their wake. This book seeks to excavate those failures, to examine the new social spaces the schemers struggled to create and the existing social spaces they destroyed. *Landscapes of Fraud* explores how the penetration of the evolving capitalist world-system created and destroyed communities in the Upper Santa Cruz

Valley of Arizona from the late 1600s to the 1970s. Thomas Sheridan has melded history, anthropology, and critical geography to create a penetrating view of greed and power and their lasting effect on those left powerless. Sheridan first examines how O'odham culture was fragmented by the arrival of the Spanish, telling how autonomous communities moving across landscapes in seasonal rounds were reduced to a mission world of subordination. Sheridan then considers the fate of the Tumacacori grant and Baca Float No. 3, another land grant. He tells the unbroken story of land fraud from Manuel Mar'a Gndara's purchase of the abandoned Tumacacori grant at public auction in 1844 through the bankruptcy of the shady real estate developers who had fraudulently promoted housing projects at Rio Rico during the 1960s and 70s. As the Upper Santa Cruz Valley underwent a wrenching transition from a landscape of community to a landscape of fraud, the betrayal of the O'odham became complete when land, that most elemental form of human space, was transformed from a

communal resource into a commodity bought and sold for its future value. Today, Mission Tumacacori stands as a romantic icon of the past while the landscapes that supported it lay buried under speculative schemes that continue to haunt our history.
