A forma com que os indivíduos estabelecem suas relações com o mundo tem mudado constantemente. As Novas Mídias e as Tecnologias da Informação e Comunicação (TIC)

proporcionam maneiras diferenciadas no que diz respeito às práticas destes indivíduos, sejam essas em momentos de lazer, de estudo ou de trabalho. Os ambientes virtuais, através das mídias interativas, possibilitam a conexão de diferentes áreas do conhecimento e a convergência dos meios na potencialização dos mais variados campos, especialmente a partir da internet. Hoje em dia não basta apenas a disponibilidade de plataformas como forma de repositório de conteúdos. A interatividade é o ponto chave nesta nova era, focando, principalmente, a participação ativa dos usuários. Esta conexão entre professores e alunos, entre produtores e usuários das mídias inaugura um tempo em que a imersão e a participação são essenciais na geração das informações e na construção do conhecimento. Considerando este cenário, os capítulos que compõem este eBook trazem reflexões importantes para o momento atual em que a convergência das mídias e as novas tecnologias têm gerado desafios antes impensados, tanto para o campo da comunicação quanto para o da educação. A superação nas diversas áreas em que se refletem acerca de formatos diferenciados para que se estabeleçam novas práticas sociais e culturais é uma constante não somente para os profissionais em formação, mas para os usuários ávidos por novidades e na expectativa por serem inseridos neste mundo cada vez mais tecnológico, interativo e participativo. É nesse sentido que esta obra apresenta em suas páginas estudos e análises que vão além da fronteira do tradicional, incentivando ações inovadoras a partir dos dispositivos tecnológicos com os quais somos todos os dias confrontados. Focusing on Brazil, this book approaches the term

“ heritage ” from not only a historical and architectural point of view, but also considers its artistic, archaeological, natural, ethnological and industrial aspects. The book is divided into four thematic sections – 1) traditions and intangible heritage, 2) archaeological heritage, 3) natural heritage and landscapes, and 4) heritage of industrial and built environments – and presents chapters on a diverse range of topics, from samba and cultural identities in Rio de Janeiro, to the history of Brazilian archaeology, the value of scenic landscapes in Brazil, and the cultural landscape of Brazil. As an outcome of the First Heritage International Symposium, this unique book explores a variety of heritage dialogues, pursuing global and specific approaches, and combining different views, perceptions and senses. Abstract: Angolan Voluntary Arbitration Law requires arbitrators to be independent and impartial, as well as to be able to show other qualities that put into evidence the deontological principles applicable to arbitrators. Trust in arbitrators is the most fundamental principal that needs to be ensured in an arbitration, otherwise the lack of trust will lead the parties to refuse the arbitrators. Let's assume that in a given arbitration process both parties constantly refuse arbitrators; would it then be possible, when several substitute arbitrators are refused one after the other, to claim the abuse of the exercise of the right to refuse an arbitrator? The BRICS countries (Brazil, Russia, India, China and South Africa) are currently at the crossroads of major structural economic and political changes. This book provides a comparative analysis of the national innovation systems of the five BRICS countries (Brazil, Russia, India, China and South Africa) and the trends in each of their science, technology and innovation

policies. It makes use of an analytical framework, the concept 'systems of innovation and competence building' developed within 'Globelics' (the Global Research Network on the Economics of Learning, Innovation and Capacity Building Systems). Sub-Saharan Africa is a critical development priority-it has some of the world's poorest countries and during the past two decades the number of poor in the Region has doubled, to 300 million-more than 40 percent of the Region's population. Africa remains behind on most of the Millennium Development Goals (MDGs) and is unlikely to reach them by 2015. With some of the world's poorest countries, Africa is a development priority for the donor community. A major drag on Africa's development is the underperformance of the critical agriculture sector, which has been neglected both by donors and governments over the past two decades. The sector faces a variety of constraints that are particular to agriculture in Africa and make its development a complex challenge. Poor governance and conflict in several countries further complicate matters. IEG has assessed the development effectiveness of World Bank assistance in addressing constraints to agricultural development in Africa over the period of fiscal 1991-2006. In this book, Rafael R. Ioris critically revisits the postwar context in Brazil to reexamine traditional questions and notions pertaining to the nature of Latin America ' s political culture and institutions. It was in this period that the region lived some of its most intense and successful experiences of fast economic growth, which was paradoxically marred by heightened ideological divisions, political disruptions, and the emergence of widespread authoritarian rule. Combining original sources of political, diplomatic, intellectual, cultural, and labor histories,

loris provides a comprehensive history of the fruitful debates concerning national development in postwar Brazil, a time when the so-called country of the future faced one of its best moments for consolidating political democracy and economic prosperity. He argues that traditional views on political instability have been excessively grounded on an institutional focus, which should be replaced by in-depth analysis of events on the ground. In so doing, he reveals that as national development meant very different things to multiple different social segments of the Brazilian society, no unified support could have been provided to the democratically elected political regime when things rapidly became socially and politically divisive early in the 1960s. Innovating in its multidimensional analytical scope and interdisciplinary focus, *Transforming Brazil* provides a rich political, cultural, and intellectual examination of a historical period characterized by rapid socio-economic changes amidst significant political instability and the heightened ideological polarization shaping the political scenario of Brazil and much of Latin America in the Cold War era. *Participatory Planning for Climate Compatible Development in Maputo, Mozambique* is a practitioners' handbook that builds upon the experience of a pilot project that was awarded the United Nations 'Lighthouse Activity' Award. Building upon a long scholarly tradition of participatory planning, this dual-language (English/Portuguese) book addresses crucial questions about the relevance of citizen participation in planning for climate compatible development and argues that citizens have knowledge and access to resources that enable them to develop a sustainable vision for their community. In order to do so, the author proposes a Participatory Action

Planning methodology to organise communities, and also advances mechanisms for institutional development through partnerships. Hospitalidade: conceitos e aplicações apresenta um estudo completo não apenas para aqueles que buscam aprimorar seus conhecimentos, mas para todos que desejam se familiarizar com o mundo da hospedagem, dos alimentos e bebidas, de eventos, viagens e turismo, entre outros temas relacionados que compõem a indústria da Hospitalidade. A obra explora o mercado e o produto hoteleiro, incluindo seu passado e seu presente, apresenta estudos de caso, lista de siglas comumente utilizadas, sistemas de referência e de classificação, glossário, além de ajudar no desenvolvimento das habilidades de liderança tão importantes nessa área.

Amazonia is never quite what it seems. Despite regular attention in the media and numerous academic studies the Brazilian Amazon is rarely appreciated as a historical place home to a range of different societies. Often left invisible are the families who are making a living from the rivers and forests of the region. Broadly characterizing these people as peasants Amazon Peasant Societies in a Changing Environment seeks to bring together research by anthropologists, historians, political ecologists and biologists. A new paradigm emerges which helps understand the way in which Amazonian modernity has developed. This book addresses a comprehensive range of questions from the politics of conservation and sustainable development to the organization of women's work and the diet and health of Amazonian people. Apart from offering an analysis of a neglected aspect of Amazonia this collection represents a unique interdisciplinary exercise on the nature of one of the most beguiling regions of the world. In recent

decades there has been an exponential increase in large hydroelectric plants in Brazil, especially in the Amazon region. These large hydraulic structures impact the environment and the lives of people living in the places where they settle and require a special type of water governance. The dictatorial regime (1964-1985) created a "standard" for the construction of these great structures, through an institutional and legal framework, which benefited the Brazilian business elite but also, through the creation of a popular imagination, which shows itself lasting progress on the country's progress and development. The suspension of security, the fragility of institutional environmental structures, the disrespect for indigenous reserves, the lack of clarity about the concept of "affected population" and the non-payment of fair compensation were identified as one of the main challenges for a democratic water governance in the country. In the late 1970s, the Dam-Affected Movement (MAB) began its organization and is also studied in this research. The study is an important and insightful academic contribution to the understanding of the main bottlenecks of effective water governance in Brazil. This book brings together the emerging trends and techniques incorporated in regional science during the first two decades of this millennium. The book includes systematic and analytical notes making scientific commentary on the innovative methods of regional development, measurement of the development, regional development models, and policy measures that have significant implications and wide applicability instrumental for India as well as the other global south countries. There is clear evidence in the global south of the uneven spatial distribution of resources, economic activities, literacy, and health

conditions. The most striking fact is the coexistence of development and underdevelopment that makes the planning process complicated. This can hardly be explored without taking a deep insight into the matter of how the regional parameters are impacting regional society or economy to shape the development of that region. There can be no effective global policy framework that will be effective equally for each and every region to mitigate local issues of society or economy. It is here that the book integrates the efforts of practitioners working towards addressing these regional issues and striving for sustainable regional development through their innovative ideas. Through its contributions, the book addresses development issues, regional impact of climate change, social justice, migration, well-being, livelihood vulnerabilities, and regional urban-environmental issues from the standpoint of regional science. It is a significant resource for researchers of spatial science, and policy makers. This special issue of the Portuguese Studies Review presents studies by Emir Reitano, Oswaldo Truzzi and Ana Silvia Volpi Scott, Jo-Anne S. Ferreira, Marcelo J. Borges, Heloisa Paulo, Caroline B. Brettell, Zeila de Brito Fabri Demartini, Andrea Klimt, Roselyne de Villanova, Helena Carreiras, Diego Bussola, Maria Xavier, Beatriz Padilla, and Andrés Malamud. The studies cover Portuguese migration to Argentina, anti-Salazarist exiles in Brazil, early post-colonial Goa, post-1974 migration trends in São Paulo, identity and community formation among Portuguese immigrants in Germany and the United States, inter-generational processes characterizing Portuguese immigration to France, and collective identity processes spanning the borders of southern Brazil, Argentina, and Uruguay. Each new print copy of PHTLS: Prehospital Trauma Life Support, Eighth Edition also includes an access code that unlocks a complete eBook and skills videos. PHTLS: Prehospital Trauma Life Support, Eighth Edition is the premier and proven global prehospital trauma education program from NAEMT. For three decades, PHTLS has improved the quality of trauma patient care and has saved lives. The Eighth Edition of PHTLS continues the PHTLS mission to promote excellence in trauma patient management by all providers involved in the delivery of prehospital care through global education. This legendary program was first developed by the National Association of Emergency Medical Technicians (NAEMT) in the early 1980s in cooperation with the American College of Surgeons Committee on Trauma (ACS-COT). Its medical content is continuously revised and updated to reflect current, state-of-the-art knowledge and practice. PHTLS promotes critical thinking as the foundation for providing quality care. It is based on the belief that EMS practitioners make the best decisions on behalf of their patients when given a good foundation of knowledge and key principles. The Eighth Edition of PHTLS features a new chapter, Physiology of Life and Death. This chapter creates a solid understanding of the physiology of life and pathophysiology that can lead to death. This understanding is essential for the prehospital care provider if abnormalities are to be found and addressed quickly in the

trauma patient. Clear Approach to Assessing a Trauma Patient In the field, seconds count. PHTLS teaches and reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing any delays in initiating transport to an appropriate destination. The Oxford Handbook of Energy and Society presents an overview of this expanding area that has evolved dramatically over the past decade, away from one largely dominated by structural, political economic treatments on the one hand, and social-psychological studies of individual-level attitudes and behaviors on the other, toward a far more conceptually and methodologically rich and exciting field that brings in, for example, social practices, system complexity, risk theory, social studies of science, and social movements theories. This volume seeks to capture the variety of scales and methods, and range of both conceptual and empirical analyses that define the field, while drawing particular attention to indigenous peoples, poverty, political power, communities and cities. Organized into seven sections, chapters cover social theory and energy-society relations, political-economic perspectives, consumption dynamics, energy equity and energy poverty, energy and publics, energy and governance, as well as emerging trends. Reflecting on the processes of accumulation, concentration and centralisation of

capital, this volume explains the transnationalisation of capital and its impact on Latin America and Brazil. A concep ç ã o desta organiza ç ã o é resultado do encontro de docentes, discentes e parceiros de pesquisa que v ê m se dedicando a discutir o papel da cultura e do trabalho daqueles que atuam neste setor da economia capitalista, tendo por base dados emp í ricos e an á lise de pol í ticas culturais no Brasil. The concept of this book is the outcome of a series of meetings between teachers, students and fellow researchers who have dedicated themselves to discussing the role of culture and the work of those who act within this sector of the capitalist economy, based on empirical data and an analysis of cultural policies in Brazil. In ' Reclaiming Nature ', leading environmental thinkers from across the globe explore the relationship between human activities and the natural. This is a bold and comprehensive text of major interest to both students of the environment and professionals involved in policy-making. A publicacao de "Melhorar a nutricao atraves das hortas familiares. Modulo de formacao destinado a Tecnicos de Extensao Agricola em Africa" tem como finalidade a formacao de tecnicos de extensao rural, de economia domestica, de nutricao,

de saúde e de outros agentes de desenvolvimento que trabalhem com famílias e comunidades. As hortas familiares existem em muitas zonas húmidas e sub-húmidas de África. Essas hortas, tendo uma funda tradição, constituem um enorme potencial de melhoria do aprovisionamento alimentar das famílias, podendo ser usadas para cultivar diversas espécies vegetais, frutos, cereais, plantas medicinais e especiarias, bem como para criar animais, incluindo peixes. Se devidamente tratada, mesmo uma pequena porção de terra pode contribuir substancialmente para aumentar o nível nutricional familiar, indo ao encontro das suas necessidades alimentares. Este módulo de formação abrange a produção de alimentos e questões nutricionais, fornecendo um vasto leque de materiais para a formação de técnicos de campo que desejem ajudar as famílias e respectivas comunidades a melhorarem a produção alimentar e a aumentarem o valor nutritivo das suas dietas." The overall objective of Reservoir Eutrophication: Preventive Management is to present the environmental and anthropogenic factors associated with the process of eutrophication and algal blooms in the Rio Verde reservoir and propose lake use and management technologies in order to minimize the problem. Eutrophication process in Rio Verde reservoir with the occurrence of intense algal blooms is a consequence of the interconnection of different climatological, hydrological, morphological, physico-chemical and biological factors, which occur not only in the watershed but also in the reservoir. Reservoir Eutrophication: Preventive Management compiles the information gathered from the development of a broad research program in Rio Verde watershed, from 2008 until 2010. Rio Verde reservoir, which was built in 1976, is located in

the Metropolitan Region of Curitiba, capital of the state of Paraná in South Brazil. This reservoir is mainly used for supplying water to one of PETROBRAS Refinery. However, the reservoir is to be used for supplying drinking water to the population and that is why better understanding this system dynamics is a great concern. The book is the result of an interdisciplinary research program, which has involved more than 150 researchers, with the aim of defining a watershed management preventive system in order to prevent eutrophication processes. This way, the book combines academic rigor with practical applicability and is of interest for both researchers and technologists working in watershed management. Reservoir Eutrophication: Preventive Management is of interest to researchers and technologists that wish to examine specific characteristics of tropical climates. It is of specific interest to developing countries and for researchers interested in knowing the developed methodology adapted for temperate conditions. Assim, esta disserta ç ã o examina as rela ç õ es entre as migra ç õ es internacionais e o desenvolvimento econ ó mico dos pa í ses emissores, bem como as implica ç õ es pol í ticas dessas rela ç õ es, em tr ê s momentos: em primeiro lugar, leva-se a cabo uma an á lise de tipo dedutivo, com base numa revis ã o cr í tica da literatura, dos impactes da emigra ç ã o sobre o desenvolvimento dos pa í ses emissores tal como indicado pelos seus impactes sobre os stocks dos diversos factores de produ ç ã o (em particular, trabalho e v á rias formas de capital). Com vista a alcan ç ar este objectivo, é primeiramente sugerido o recurso à “ matriz migra ç õ es-desenvolvimento ” – uma ferramenta anal í tica que é apresentada com o objectivo de auxiliar a

classificação dos diversos efeitos da emigração sobre a capacidade produtiva, de acordo com o momento lógico do processo migratório em que ocorrem e com o factor produtivo afectado. Em segundo lugar, procede-se a uma tentativa de formalização das conclusões procedentes da discussão realizada nos capítulos anteriores com vista à apresentação de um versão preliminar de um modelo geral “ migração esdesenvolvimento ” . Finalmente, apresenta-se uma revisão de algumas das políticas mais comuns e/ou interessantes que têm vindo a ser adoptadas com o objectivo de maximizar os benefícios e minimizar os custos associados ao nexo migração es-desenvolvimento. O objectivo último deste trabalho consiste, assim, em reexaminar os contributos da literatura “ migração es-desenvolvimento ” a partir de uma perspectiva especificamente macroeconómica, de modo a contribuir para uma melhor compreensão de um dos mais cruciais e controversos aspectos da globalização. Many people regard Hegel's work as obscure and extremely difficult, yet his importance and influence are universally acknowledged. Professor Singer eliminates any excuse for remaining ignorant of the outlines of Hegel's philosophy by providing a broad discussion of his ideas and an account of his major works. an excellent introduction to Hegel's thought...Hegel is neatly placed in historical context;the formal waltz of dialectic and the dialectic master and slave are economically illumined; Singer's use of analogy is at times inspired.' Galen Strawson, Sunday Times Singer's book forms an ideal introduction to Hegel; to have made so much clear in ninety pages is a remarkable feat.' Anthony Manser Times Higher Educational Supplement. As the

importance of sustainability in strategy and development grows, so does the importance of cross-border cooperation (CBC) to facilitate green projects. Border territories, however, are complex and fragile areas, and thus, their planning through CBC projects should be deeply analyzed and studied. It has become crucial to understand this issue across many different disciplines. Cross-Border Cooperation (CBC) Strategies for Sustainable Development is a pivotal reference source that provides relevant theoretical frameworks and trends in border area dynamics as well as cross-border cooperation ' s influence on sustainable development. Highlighting topics such as CBC in insular territories, biodiversity policy, and sustainable planning and development, this book is ideally designed for culture analysts, sustainability specialists, policymakers, researchers, academicians, and students. FDI in Angola has been highly volatile and concentrated in the extractive sector. Initiatives to improve investment attractiveness are hampered by various challenges affecting the policy environment. The IPR provides action-oriented recommendations to create an environment conducive to investment and leverage the FDI potential to progress towards sustainable development. The report contributes to the Government ' s efforts to achieve the dual objective of graduating from least developed country (LDC) status and meeting the SDGs. This volume considers the teaching of writing in computer-supported and traditional classrooms. It is divided into three main sections which consider: literary processes - access to a symbolic system; learning and meaning in childhood; and literacy and activity contexts in adulthood. The book provides conceptual and theoretical elaborations on human values from a cultural

psychological approach. The authors illustrate their original contributions with empirical data, allowing for productive discussion on the topic of ontogenesis of values from a historical-cultural perspective. Controversies about History, Development and Revolution in Brazil is a critical history of Brazilian economic thought from the perspective of the country ' s own historical and political development in the 20th century bringing into question its consequences in the present day. This book examines the implementation of science, technology and innovation (STI) policy in eight Latin American countries and the different paths these policies have taken. It provides empirical evidence to examine the extent to which STI policies are contributing to the development of the region, as well as to the solution of market failures and the stimulus of the region ' s innovation systems. Since the pioneering work of Solow (1957), it has been recognized that innovation is critical for economic growth both in developed and in less-developed countries. Unfortunately Latin America lags behind world trends, and although over the last 20 years the region has established a more stable and certain macroeconomic regime, it is also clear that these changes have not been enough to trigger a process of innovation and productivity to catch-up. Against this rather grim scenario there is some optimism emerging throughout the region. After many years of inaction the region has begun to invest in science, technology and engineering once again. Furthermore, after many changes in innovation policy frameworks, there is now an emerging consensus on the need for a solution to coordination failures that hinder the interaction between supply and demand. Offering an informative and analytic insight into STI policymaking within Latin America, this

book can be used by students, researchers and practitioners who are interested in the design and implementation of innovation policies. This book also intends to encourage discussion and collaboration amongst current policy makers within the region.

Nas últimas três décadas, muitos países da América Latina e Caribe reconheceram a saúde como um direito humano. Desde o início dos anos 2000, 46 milhões de pessoas nos países estudados recebem cobertura de programas de saúde com direitos explícitos a atendimento. Essas reformas foram acompanhadas por um aumento do gasto público com saúde, financiado em grande medida pelas receitas gerais que priorizam ou visam explicitamente a população que não tem capacidade de pagamento. O compromisso político em geral se traduziu em orçamentos maiores e na aprovação de legislação que insula recursos para a saúde. Muitos países priorizaram o atendimento de saúde primária com boa relação de custo-benefício e adotaram métodos de pagamento que incentivam a eficiência e a prestação de contas por resultados, proporcionando às autoridades do setor de saúde mais poder para induzir os prestadores a cumprirem as prioridades de saúde pública. Apesar do progresso, ainda persistem disparidades no financiamento e na prestação de serviços de qualidade entre os subsistemas de saúde. Cumprir o compromisso da cobertura universal de saúde exigirá esforços concertados para melhorar a geração de receitas de forma fiscalmente sustentável e aumentar a produtividade em termos de despesas. Em Rumo a uma Cobertura Universal de Saúde e Equidade na América Latina e Caribe: Evidência de Países Seleccionados, os autores mostram que a evidência da análise de 54 pesquisas

domiciliares corrobora que os investimentos para ampliar a cobertura de saúde estão gerando resultados. Embora os pobres ainda apresentem resultados de saúde piores que os ricos, as disparidades diminuíram consideravelmente — em particular nos estágios iniciais da vida. Os países alcançaram altos níveis de cobertura e equidade na utilização de serviços de saúde materna e infantil. O quadro tem mais nuances e não é totalmente positivo quando se trata da situação de saúde dos adultos e da prevalência de doenças e condições crônicas de saúde. A cobertura para doenças não transmissíveis não é alta e continua a pender mais para os mais abastados. A prevalência de doenças não transmissíveis não ocorreu como esperado, tendo em vista a queda na mortalidade; o melhor acesso a serviços de diagnósticos entre as pessoas mais ricas pode estar mascarando mudanças na prevalência efetiva. Gastos catastróficos com saúde caíram na maior parte dos países. No entanto, o quadro com respeito à equidade é mais misto e indica limitações na medição. Embora a taxa de empobrecimento em razão de gastos com saúde seja baixa ou em declínio, 2 a 4 milhões de pessoas nos países estudados ainda ficam abaixo da linha da pobreza em razão de gastos com saúde. Esforços de monitoramento sistemático da qualidade do atendimento de saúde na região são ainda incipientes. No entanto, a análise da literatura revela deficiências importantes na qualidade da saúde, bem como diferenças substanciais entre os subsistemas. Melhorar a qualidade do atendimento e garantir a sustentabilidade dos investimentos em saúde continuam a ser itens pendentes da agenda.
